

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

NARRATIVE SUMMARY

This Military Family Housing request supports the Congressional emphasis on providing excellent housing for all military members and their families and that continual improvement in quality is the measure of excellence. We depend first on the local community to meet our housing needs. When local community housing is not available, we will construct military family housing which meets contemporary community living standards. This budget requests funds to operate and maintain our inventory at a standard that protects from asset deterioration, and maintains the quality level established by Congressional appropriations and guidance. Our goal is to provide quality homes that meet contemporary whole-house standards.

Family housing is one of the most important quality of life issues in the Air Force. Improving or replacing our aging housing inventory is our top facility priority. Our military members and their families expect and deserve homes which meet current standards of livability. In the era of downsized forces, we cannot risk losing highly-trained, experienced Air Force members because of poor housing. Small investments in quality family housing pay great dividends in retaining trained, responsible, ready Air Force members. We cannot afford to let our existing military family housing inventory deteriorate or fail to modernize it to contemporary standards to achieve quality of life incentives, so that we retain highly trained, motivated members.

This budget provides a balanced program between construction, operations, maintenance, and lease funding. The construction funding level indicates the Air Force's commitment to replace or revitalize our existing inventory to meet contemporary standards. We are concentrating on our oldest homes and improving or replacing where economically justifiable. We continue to propose projects that provide new support facilities at installations with the greatest need.

The operations, day-to-day maintenance and leasing accounts predominately support "must pay" requirements such as service contracts, lease contracts, utilities, and required maintenance for the cost of ownership to keep existing homes open and occupied. The maintenance account also supports our goal to arrest, then eliminate, deferred maintenance and repair (DMAR) growth as much as possible within our fiscal constraints. Unfortunately to date we have not eliminated DMAR. The Air Force is committed to the development of private sector-funded housing revitalization where it makes economic sense.

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

Current funding levels do not support the required revitalization schedule projected by the Air Force, directly impacting quality of life, retention, and ultimately readiness. Private sector investments will speed the revitalization of family housing and provide safe, comfortable housing for service members without government investment above current Military Family Housing funding. It may be necessary to use many different approaches to meet family housing needs.

The business climate at some locations may not support establishment of privatized housing areas. To help provide the most reliable information to decisionmakers, the Air Force has initiated a Family Housing Master Plan. The Master Plan will define the most effective housing strategy and associated costs. It will integrate construction, operations and maintenance, and privatization efforts to build new, revitalize, continue to maintain, or privatize each asset to achieve optimal life cycle costs.

Lackland AFB, Texas and Robins AFB, Georgia are in the forefront of the Air Force's housing privatization process:

At Lackland AFB, a project appears feasible to privatize 272 enlisted housing units on base. The contractor will be charged with revitalizing, maintaining, and providing services for the 272 families eventually housed in this development. Members who choose to accept housing in the privatized neighborhood will forfeit their entitlements as they currently do to live in housing on base. The contractor will receive the equivalent of each family's entitlements as "rent". The Air Force will pay for utilities for the privatized units outside the deal.

The Air Force is developing a privatization project for 670 units on a geographically separated off-base site at Robins AFB. Member's forfeited entitlements will make up the contractor's income stream. In this proposed agreement, the contractor will provide utilities to the occupants. In keeping with Office of Management and Budget guidance, the contractor will not be reimbursed for utilities for privatized units outside the agreement in future projects, so each future privatization project will follow the Robins model, not the Lackland model.

While austere, we believe this funding profile represents a well balanced, fiscally constrained program that achieves quality of life goals for military families within the budget request. We respectfully request full support for the Air Force family housing needs presented herein.

(b) PLANNING AND DESIGN. - Using amounts appropriated pursuant to the authorization of appropriations in section 2304(a)(5)(A), the Secretary of the Air Force may carry out architectural and engineering services and construction design activities with respect to the construction or improvement of military family housing units in an amount not to exceed \$11,342,000

SEC. 2303. IMPROVEMENT TO MILITARY FAMILY HOUSING UNITS

Subject to section 2825 of Title 10, United States Code, and using amounts appropriated pursuant to the authorization of appropriations in section 2304(a)(5)(A), the Secretary of the Air Force may improve existing military family housing units in an amount not to exceed \$81,778,000.

SEC. 2304. AUTHORIZATION OF APPROPRIATIONS, AIR FORCE

(a) IN GENERAL

(5) for Military Family Housing functions -

(A) For construction and acquisition, planning and design, and improvement of military family housing and facilities, \$226,035,000.

(B) For support of military family housing (including functions described in section 2833 of Title 10, United States Code), \$789,995,000.

FY 1999 Appropriation Language

For expenses of family housing for the Air Force for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operations and maintenance, including debt payment, leasing, minor construction, and insurance premiums, as authorized by law as follows: for [FY98] FY99 Construction, [\$293,709,000) \$226,035,000, for Operation and Maintenance, and Debt Payment[\$817,534,000] \$789,995,000; in all [\$1,111,243,000] \$1,016,030,000: Provided: That the amount for construction shall remain available until September 30, [2003] 2004.

FISCAL YEAR 1999 BUDGET REQUEST

FY 1999 NEW/CURRENT MISSION ACTIVITIES

In compliance with the Senate Appropriations Committee Report (100-380) on the FY 1989 Military Construction Appropriation Act, the Air Force has included the following exhibit that displays construction projects requested in two separate categories: new mission and current mission. "New Mission" projects are projects that support deployment and beddown of new weapon systems, new program initiatives, and major mission expansions. "Current Mission" projects are projects that either replace inadequate existing facilities or construct new facilities which are not available to meet current requirements.

FY 1999 NEW CONSTRUCTION

Program (In Thousands)

FY 1999 Program \$140,499
FY 1998 Program \$159,943

Purpose and Scope

This program provides for the construction of new homes where the local community cannot provide adequate housing and replacement of existing homes, where improvements for Air Force personnel are not economically feasible, and support facilities where existing facilities are inadequate. Costs reflect all amounts necessary to provide complete and usable facilities.

Program Summary

Authorization of \$140,499,000 is requested for: Construction of 64 new units, replacement of 784 units and 3 support facilities.

A summary of the funding program for FY 1999 is as follows:

<u>AUTHORIZATION</u> <u>Type/Locations</u>	<u>Mission</u>	<u>Number of</u> <u>Units</u>	<u>Requested</u> <u>Amount (\$000)</u>

				143	9,961,910

11. REQUIREMENT: 4,428 UN ADEQUATE: 2,902 UN SUBSTANDARD: 1,526 UN
PROJECT: Replace Military Family Housing (Phase 1). (Current Mission)
REQUIREMENT: This project is required to provide modern and efficient replacement housing for military members and their dependents stationed at Maxwell AFB. All units will meet "whole house" standards and are programmed in accordance with Housing Community Plan phases C and D. Replacement will provide a safe, comfortable, and appealing living environment comparable to the off-base civilian community. This is the first of multiple phases to provide adequate housing for base personnel. Of the 327 housing units to be replaced in this multi-phase initiative, 186 will follow in subsequent phases. The replacement housing will

1. COMPONENT	FY 1999 MILITARY CONSTRUCTION PROJECT DATA (computer generated)	2. DATE
3. INSTALLATION AND LOCATION MAXWELL AIR FORCE BASE, GUNTER ANNEX, ALABAMA		
4. PROJECT TITLE	5. PROJECT NUMBER	
REPLACE MILITARY FAMILY HOUSING (PHASE 1)	JUBJ984049	
<p>provide a modern kitchen, living room, family room, bedroom and bath configuration, with ample interior/exterior storage and a carport or garage. Exterior parking will provide for a second vehicle and guests. Neighborhood improvements include landscaping and playgrounds.</p> <p><u>CURRENT SITUATION:</u> This project replaces 143 housing units which were constructed in 1941. These 58-year-old houses are showing the effects of age and continuous heavy use. They have had no major upgrades since construction and do not meet the needs of today's families, nor do they provide a modern home environment. The units are not energy efficient and housing density is overcrowded. Play areas for children are either too small, not appropriate for toddlers, or nonexistent; presently the youngsters use the streets as playgrounds. Following normal rainfall, numerous sunken areas near house porches and neighborhood walkways accumulate water which becomes stagnant, breeding insects and unhealthful bacteria. Roof structures, walls, foundations, and exterior pavements require major repair or replacement owing to the effects of age and the environment. Off-street parking does not meet minimum requirement of 2.5 parking spaces per unit nor one covered space. Foundations and pavements are showing signs of failure due to settlement. Housing interiors are inadequate by any modern criteria. Bedrooms lack adequate closet space. 95% of 3 and 4 bedrooms units have one bathroom per unit, and all bathroom fixtures are outdated and energy-inefficient. Kitchens have inadequate storage and counter space, cabinets are old, and countertops and sinks are badly worn. Flooring throughout the houses is worn out, and contains evidence of asbestos. Plumbing and electrical systems are antiquated and do not meet modern building codes, nor current standards for efficiency and safety. Lighting systems throughout the houses are inefficient and require replacement. Heating and air conditioning systems require upgrade and replacement. Units are not compatible to reconfiguration.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Major morale problems will result if this replacement initiative is not supported. Some families will continue to live in unsuitable housing while others are in improved or new, replaced units. The housing will continue to be occupied until it becomes totally uninhabitable because adequate, affordable off-base housing is not available. The current Housing Market Analysis shows an on-base housing deficit of 875 units. Without this and subsequent phases of this initiative, costly piecemeal repairs will continue, with no improvement in the living quality.</p> <p><u>ADDITIONAL:</u> An economic analysis has been prepared comparing the alternatives of new construction, revitalization, leasing and status quo operation. Based on the net present values and benefits of the respective alternatives, new construction was found to be the most cost efficient over the life of the project. The cost to improve this housing is 75% of the replacement cost. Since this is replacement housing, there will be no increase in the student population or impact on the ability of the local school district to support base dependents. This project meets the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide". Base Civil Engineer: Lt Col Gregory Coker, (334) 953-6944.</p>

10. Description of Proposed Construction: Replace 46 housing units. Includes demolition, site work, replacement of utility systems, roads and asbestos/lead-based paint removal. Provides amenities including parking, appliances, patios, privacy fencing, and playgrounds/landscaping. Includes 28 net square meters of arctic recreation space for harsh climate area. Foundations will be salvaged. 72 units will be demolished.

11. REQUIREMENT: 1,948 UN ADEQUATE: 1,106 UN SUBSTANDARD: 842 UN PROJECT: Replace Military Family Housing (Phase 3). (Current Mission) REQUIREMENT: This project is required to provide modern and efficient replacement housing for military members and their dependents stationed at Eielson AFB. All units will meet "whole house" standards and are programmed in accordance with phase four of the Housing Community Plan. Replacement housing will provide a safe, comfortable, and appealing living environment comparable to the off-base civilian community. This is the third of multiple phases to provide adequate housing for base personnel. Of the 932 housing units to be replaced/improved in this multi-phased initiative, 321 are completed or included in prior programs, and 611 will follow in subsequent phases. CURRENT SITUATION: This project replaces 72 units which were constructed in 1953 with 46 units. These 43 year-old houses are showing the effects of age and continuous heavy use. They have had no major upgrades since

4. PROJECT TITLE	5. PROJECT NUMBER
REPLACE FAMILY HOUSING PHASE 3	FTQW984002

construction, and do not meet the needs of today's families, nor do they provide a modern home environment. Roofs, wall, foundations and exterior pavements require major repair or replacement owing to the effects of age and the environment. Roof structures show signs of rot; leaks have made insulation (already inadequate by today's standards) less effective. Foundation and pavements are showing signs of failure owing to settlement. Housing interiors are generally inadequate by any modern criteria. Bedrooms are small and lack adequate closet space. Bathrooms are small, and fixtures are outdated and energy-inefficient. Kitchens have inadequate storage and counterspace, cabinets are old, and countertops and sinks are badly worn. Flooring throughout the house is worn out, and contains evidence of asbestos. Plumbing and electrical systems are antiquated and do not meet current standards for efficiency or safety. There is no ground fault interrupter circuit protection, and many electrical outlets lack grounding protection. Lighting systems throughout the houses are inefficient and require replacement. Heating and air conditioning systems require upgrade and replacement.

IMPACT IF NOT PROVIDED: Major morale problems will result if this replacement initiative is not supported. Some families will continue to live in unsuitable housing while others are in new, replaced units. The housing will continue to be occupied until it becomes totally uninhabitable because adequate affordable off-base housing is not available. The current Housing Market Analysis shows an on-base housing deficit of 32 units. Without this and subsequent phases of this initiative, costly piecemeal repairs will continue, with no improvement in the living quality.

ADDITIONAL: This project meets the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide". An economic analysis has been prepared comparing the alternatives of new construction, revitalization, leasing and status quo operation. Based on the net present values and benefits of the respective alternatives, new construction was found to be the most cost efficient over the life of the project. The cost to improve this housing is 87% of the replacement cost. Since this is a replacement project, there will be no increase in the student population or impact on the ability of the local school district to support base dependents. Base Civil Engineer: Lt Col David Barnes, (907) 377-5213

11. REQUIREMENT: 2,410 UN ADEQUATE: 988 UN SUBSTANDARD: 1,422 UN
PROJECT: Replace Military Family Housing (Phase 4). (Current Mission)
REQUIREMENT: This project is required to provide modern and efficient replacement housing for military members and their dependents stationed at Edwards AFB. All units will meet "whole house" standards and are programmed in accordance with Phase 4 of the Housing Community Plan. Replacement housing will provide a safe, comfortable, and appealing living environment comparable to the off-base civilian community. The replacement housing will provide modern kitchen, living room, family room, bedroom and bath configuration, with ample interior and exterior storage and a single car garage. Exterior parking will be provided for a second occupant vehicle and guests. The basic neighborhood support infra-structure will be upgraded to meet modern housing needs.

4. PROJECT TITLE REPLACE AREA B HOUSING PHASE 4	5. PROJECT NUMBER FSPM994501	
<p>Neighborhood improvements will include landscaping and playgrounds.</p> <p><u>CURRENT SITUATION:</u> This project replace 48 housing units which were constructed in the 1950s. These 40+ year old houses are showing the effects of age and continuous heavy use. They have not had any major upgrades since construction, and do not meet the needs of today's families, nor do they provide a modern home environment. Plumbing systems, electrical systems, heating and air conditioning system are antiquated and do not meet current standards for efficiency and safety. Systems are in such poor repair that constant maintenance is required to maintain operability. The harsh environment has taken its toll and the units have deteriorated beyond economical repair. Asbestos-containing building materials contribute significantly to the high repair cost. The exteriors of these facilities have deteriorated to the point that all wooden surfaces need to be replaced. This housing area is very congested and presents a traffic flow safety hazard when cars park on the streets because the units lack driveways and adequate garages.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Asbestos will continue to limit maintainability, and future repair costs will be exorbitant due to the environmental abatement requirements. Mechanical and electrical systems will fail, adding to the already heavy workload and high cost to maintain. The units will continue to be occupied until they become uninhabitable because adequate, affordable housing is not available for junior enlisted families.</p> <p><u>ADDITIONAL:</u> An economic analysis has been prepared comparing the alternatives of new construction, revitalization, leasing and status quo operation. Based on the net present values and benefits of the respective alternatives, new construction was found to be the most cost efficient over the life of the project. The initial cost to improve the housing is 92% of the replacement cost. This project meets the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide". Since this is replacement housing, there will be no increase in the student population or impact on the ability of the local school district to support base dependents. Base Civil Engineer: Col Steven D. Kukuk (805) 277-2910.</p>

11. REQUIREMENT: 2,245 UN ADEQUATE: 731 UN SUBSTANDARD: 1,514 UN
PROJECT: Replace Military Family Housing (Phase 6) (Current Mission).
REQUIREMENT: This project is required to provide modern, efficient, and safe housing for military members and their dependents stationed at Vandenberg AFB. All units will meet "whole house" standards and are programmed in accordance with Phase 6 of the Housing Community Plan (HCP). Replacement housing will provide a living environment comparable to the off-base civilian community. This is the sixth of thirteen phases to provide adequate housing for base personnel. Of the 2076 units to be replaced in this multi-phase initiative, 657 are completed or included in prior programs, and 1324 will follow in subsequent phases. New housing will provide a modern kitchen, family room, bedroom, bathroom, ample storage, single-car garage, and parking for guests. Basic neighborhood support infrastructure will be upgraded to modern standards. Landscaping,

REPLACE MILITARY FAMILY HOUSING PHASE 6	XUMU994000	
<p>playgrounds, walks, handicap access, signs, lights, irrigation, recreation areas, fitness course, and utility upgrades will be provided.</p> <p><u>CURRENT SITUATION:</u> Units are over 37 years old and have deteriorated to the point where replacement is the most economical alternative. Wiring and fixtures have been identified by the Fire Department and Base Safety as a fire hazard; wiring is brittle and exposed. There are no ground fault interrupters (a life safety hazard). Fixtures are energy inefficient. Plumbing systems have succumbed to the effects of hard water and corrosion, resulting in severe flow constriction and pipe leakage. Overhead pipes in the attics leak, causing ceiling and property damage. Corroded sewer lines leak in and under the floor slab. Roof structures are sagging. There is no family room and insufficient bulk storage. Kitchens have inefficient work space/circulation and worn out/insufficient cabinets. Bathroom fixtures, vanities, and appointments are worn and outmoded. Plumbing fixtures are worn and failing. Baths are deteriorated and outdated; shower enclosures and medicine cabinets are corroded, discolored, and pitted. The present configuration of units is inefficient and provides no privacy for residents. These houses have had no major upgrades since construction, do not meet the needs of today's families, nor provide a modern home environment. Roofs, walls, foundations, and sidewalks require replacement due to the effects of age and the environment. Housing interiors are inadequate by any modern criteria. Utility wires and poles clutter the streetscape. There is a lack of trees on streets, lawns, and open spaces.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Air Force members and their families will continue to be housed with minimal water and electrical services. The occupants of these housing units will suffer continual water leaks in their ceilings damaging light fixtures and interior finishes. A living environment that promotes pride, professionalism, and individual dignity will not be provided. Without this and subsequent phases of this initiative, costly piecemeal repairs will continue out of necessity, with no improvement in the living quality.</p> <p><u>ADDITIONAL:</u> This project meets the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide." An economic analysis has been prepared comparing the alternatives of new construction, revitalization, and status quo operation. Based on the net present values and benefits of the respective alternatives, new construction was found to be the most cost efficient over the life of the project. The cost to improve this housing is 96% of the replacement cost. Since this is replacement housing, there will be no increase in the student population or impact on the ability of the local school district to support base dependents. Base Civil Engineer: Col William R. Quinn (805) 734-6855.</p>

11. REQUIREMENT: 2,771 UN ADEQUATE: 1,135 UN SUBSTANDARD: 1,636 UN PROJECT: Replace Military Family Housing (Current Mission)								
REQUIREMENT: This project is required to provide modern and efficient replacement housing for military members and their dependents at Dover AFB. All units will meet "whole house" standards and are programmed in accordance with the Housing Community Plan, Phase A. Replacement housing will provide a safe, comfortable, and appealing living environment comparable to the off-base civilian community. This is the first of multiple phases to provide adequate housing for base personnel. The replacement housing will provide a modern kitchen, living room, family room, bedroom and bath configuration, with ample interior and exterior storage and a single car garage. Exterior parking will be provided for a								
31 second occupant vehicle and guests. The basic neighborhood support

4. PROJECT TITLE REPLACE FAMILY HOUSING	5. PROJECT NUMBER FJXT994012R	
<p>infrastructure will be upgraded to meet modern housing standards.</p> <p><u>CURRENT SITUATION:</u> This project replaces 55 housing units which were built in 1958. These 39-year-old houses are showing the effects of age and continuous heavy use. They have had no major upgrades since construction and do not meet the needs of today's families nor do they provide a modern home environment. Plumbing and electrical systems are antiquated and do not meet current standards for efficiency or safety. Housing interiors are generally inadequate by any modern criteria. Bedrooms are small and lack adequate closet space. Bathrooms are small, and fixtures are outdated and energy inefficient. Kitchens have inadequate storage and counter space. Flooring throughout the houses is outdated and contains asbestos. Lighting systems throughout the houses are inefficient and require replacement. Outdoor living space, community areas, and individual patios are either very limited or nonexistent.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Major morale problems will result if this initiative is not supported. The housing will continue to be occupied until it becomes totally uninhabitable because adequate, affordable off-base housing is not available. The current Housing Market Analysis shows an on-base housing deficit of 87 units. Without this and subsequent phases of this initiative, costly piecemeal repairs will continue with no improvement in the quality of life.</p> <p><u>ADDITIONAL:</u> This project meets the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide." An economic analysis has been prepared comparing the alternatives of new construction, revitalization, leasing and status quo operation. Based on the net present values and benefits of the respective alternatives, new construction was found to be the most cost efficient over the life of the project. The cost to improve this project is 74% of replacement cost. Since this is replacement, there will be no increase in student population. Base Civil Engineer: Lt Col Willie Dean, (302) 677-6766.</p>

MACDILL AIR FORCE BASE, FLORIDA		
4. PROJECT TITLE		5. PROJECT NUMBER
REPLACE FAMILY HOUSING PHASE 3		NVZR993702

recreational areas are included. Climatic considerations require special construction measures to withstand hurricanes and tidal surges.

CURRENT SITUATION: This project replaces housing which is over 45 years old and is showing the effects of age and continuous heavy use. They've had no major upgrades since construction and do not meet the needs of today's families. Existing houses are well below the authorized net area. Roofs, walls, foundations, and exterior pavements require major repair or replacement. Plumbing and electrical systems are antiquated and do not meet current standards for efficiency or safety. Lack of adequate parking spaces for occupants has created excessive congestion and safety hazards. Housing interiors are generally inadequate by any modern criteria. Bedrooms are small and lack adequate closet space. Bathrooms are small and fixtures are outdated and energy inefficient. Kitchens have inadequate storage and counter space; cabinets are old and unsightly; and counter tops and sinks are badly worn. Flooring throughout the house is outdated and contains evidence of asbestos. Utility systems require excessive maintenance and repair. Dining rooms are nonexistent, so living room space is sacrificed for family dining. Housing density is excessive, creating an undesirable living environment.

IMPACT IF NOT PROVIDED: Air Force members and their families will continue to live in extremely small, outdated, and unsatisfactory housing. The housing will continue to deteriorate, resulting in escalating and unacceptable maintenance and repair costs as well as extreme inconvenience to the occupants. Without this and subsequent phases of this initiative, repairs will continue in a costly, piecemeal fashion with little or no improvement in occupant quality of life. These deficiencies will continue to adversely effect the moral of all personnel and their family members assigned to the base. The current Housing Market Analysis shows a projected deficit of 16 units.

ADDITIONAL: This project meets the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide." Since this is replacement housing, there will be no increase in the student population or impact on the ability of the local school district to support dependents. An economic analysis has been prepared comparing the alternatives of new construction, revitalization, and status quo. Based on the net present values and benefits of the respective alternatives, new construction was found to be the most cost efficient over the life of the project. The cost to improve these units is 88% of the replacement cost. The design/construction agent for this project is the Corps of Engineers resulting in Supervision, Inspection, and Overhead costs of 6 percent. Base Civil Engineer: Lt Col William R. Floyd, (813)828-3677.

11. REQUIREMENT: 2,136 UN ADEQUATE: 1,129 UN SUBSTANDARD: 999 UN
PROJECT: Replace Military Family Housing (Phase 1) (Current Mission).
REQUIREMENT: This project is required to provide modern and efficient replacement housing for military members and their dependents stationed at Patrick AFB. This is the first phase of a multi-phased initiative. This housing replacement will provide a safe, comfortable, and appealing living environment comparable to off-base civilian communities. The replacement housing will provide a modern kitchen, living/dining room, bedrooms and baths, with adequate interior and exterior storage, and a single garage. Exterior parking will be provided for a second occupant vehicle and guest. The basic neighborhood support infrastructure will be replaced to meet modern housing needs. Neighborhood enhancements will include landscaping and recreational areas.
CURRENT SITUATION: Project replaces 46 housing units that were constructed in 1958. The existing units are one story, concrete block

4. PROJECT TITLE REPLACE SOUTH HOUSING, PHASE 1	5. PROJECT NUMBER SXHT9940051	
<p>with built up roofs. These houses are showing the effects of age, continuous heavy use, and the degradation due to the corrosive environment on Florida's coast. The built up gravel flat roofs have deteriorated to the point of replacement. Exterior walls have cracks that allow water and moisture to deteriorate housing interiors. The infrastructure (sewer, water, electrical) has deteriorated beyond economic repair. The plumbing and heating/air conditioning systems inside the units have also deteriorated beyond economic repair. The bathrooms are small. Fixtures are outdated and are energy inefficient. Bedrooms are small and lack adequate closet space. Lighting systems throughout the houses are inefficient and are in need of replacement. The units have asbestos in roofs, floor tiles, walls. Lead based paint is present on walls and ceilings.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Air Force members and their families would continue to be housed in unsatisfactory conditions affecting morale and the retention of quality personnel. Without this project, various costly repairs will be required for these units with no improvement in the quality of life.</p> <p><u>ADDITIONAL:</u> An economic analysis has been prepared comparing the alternatives of new construction, revitalization, leasing and status quo operation. Based on the net present values and benefits of the respective alternatives, new construction was found to be the most cost efficient over the life of the project. The cost to improve this housing is 78% of the replacement cost. This project meets the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide." Since this is replacement housing, there will be no increase in the student population or impact on the ability of the local school district to support base dependents. Base Civil Engineer: Lt Col Bryan L. Kuhlmann, (407) 494-4041.</p>

11. REQUIREMENT: 1,846 UN ADEQUATE: 502 UN SUBSTANDARD: 1,344 UN
PROJECT: Replace Military Family Housing (Phase 6). (Current Mission).
REQUIREMENT: This project is required to provide modern and efficient replacement housing for military members and their dependents stationed at Tyndall AFB. All units will meet "whole house" standards and are programmed in accordance with the Housing Community Plan. Replacement housing will provide a safe, comfortable, and appealing living environment comparable to the off-base civilian community. This is the fifth of multiple phases to provide adequate housing for base personnel. Of the 337 housing units to be replaced in this multi-phase initiative, 111 will follow in subsequent phases. The replacement housing will provide a

AIR FORCE	(computer generated)	
3. INSTALLATION AND LOCATION		
TYNDALL AIR FORCE BASE, FLORIDA		
4. PROJECT TITLE	5. PROJECT NUMBER	
REPLACE MILITARY FAMILY HOUSING (PHASE 5)	XLWU960101	
<p>modern kitchen, living room, family room, bedroom and bath configuration, with ample interior and exterior storage and a single car garage. Exterior parking will be provided for a second occupant vehicle and guests. The basic neighborhood support infrastructure will be upgraded to meet modern housing needs. Neighborhood improvement will include landscaping and playgrounds.</p> <p><u>CURRENT SITUATION:</u> This project replaces 122 housing units which were constructed in the 1950's. These 41-year-old houses are showing the effects of age and continuous heavy use. They have had no major upgrades since construction, and do not meet the needs of today's families, nor do they provide a modern home environment. Roofs, walls, foundations and exterior pavements require major repair or replacement owing to the effects of age and the environment. Roof structure show signs of rot; leaks have made already inadequate (by todays standards) insulation even less effective. Walls systems are failing due to extensive termite damage. Plumbing and electrical systems are antiquated and do not meet current standards for efficiency or safety. Housing interiors are generally inadequate by any modern criteria. Bedrooms are small and lack adequate closet space. Bathrooms are small, and fixtures are outdated and energy inefficient. Kitchens have inadequate storage and counterspace, cabinets are old, and countertops and sinks are badly worn. Flooring throughout the house is worn out, and contains evidence of asbestos. Plumbing and electrical systems do not meet modern building codes. There is no ground fault interruptor circuit protection, and many electrical outlets lack grounding protection. Lighting systems throughout the houses are inefficient and require replacement. Heating and air conditioning systems require upgrade and replacement.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Major morale problems will result if this replacement initiative is not supported. Some families will continue to live in unsuitable housing while others are in new, replaced units. The housing will continue to be occupied until it becomes totally uninhabitable because adequate, affordable off-base housing is not available. The current Housing Market Analysis shows an on-base housing deficit of 174 units. Without this and subsequent phases of this initiative, costly piecemeal repairs will continue, with no improvement in the living quality.</p> <p><u>ADDITIONAL:</u> An economic analysis has been prepared comparing the alternatives of new construction, revitalization, leasing and status quo operation. Based on the net present values and benefits of the respective alternatives, new construction was found to be the most cost efficient over the life of the project. The cost to improve this housing is 78% of the replacement cost. Since this is replacement housing, there will be no increase in the student population or impact on the ability of the local school district to support base dependents. This project meets the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide". Base Civil Engineer: Maj James Holland, (904) 283-3283.</p>

11. REQUIREMENT: 2,694 UN ADEQUATE: 366 UN SUBSTANDARD: 2,230 UN PROJECT: Replace Military Family Housing (Phase 4). (Current Mission) REQUIREMENT: This project is required to provide modern and efficient housing for military members and their dependents stationed at Offutt AFB. All units will meet "whole house" standards and are programmed in accordance with Phase 1 of the Housing Community Plan. Replacement housing will provide a safe, comfortable, and appealing living environment comparable to the off-base civilian community. This is the first of multiple phases to replace 545 Wherry housing units. The replacement housing will provide a modern kitchen, living room, dining room and bath configuration, with ample interior and exterior storage, and a garage. The basic neighborhood support infrastructure will be upgraded to meet modern housing needs. Neighborhood enhancements will include landscaping, playgrounds, and recreation areas. Climatic and site conditions require special consideration be given to foundation design and will require

REPLACE MILITARY FAMILY HOUSING (PH 4)	SGBP990004	
<p>extensive excavation and soil stabilization, and may require basements.</p> <p><u>CURRENT SITUATION:</u> This project replaces housing units that were constructed in the 1950s and are showing the effects of age and continuous heavy use. Foundations are failing and several units have been demolished for safety of the personnel. Roofs, floors, and exterior pavements require major repairs or replacement. Plumbing and electrical systems are antiquated, require frequent maintenance and repair, and do not meet current standards for efficiency or safety. Housing interiors are generally inadequate by modern standards. Bedrooms are small and lack closet space. Bathrooms are small and fixtures are outdated. Kitchens have inadequate storage and counter space. Cabinets, countertops and sinks are badly worn. Heating for each eight-plex is provided by a central boiler resulting in significant problems regulating temperatures for the various needs of personnel in adjacent units. There are no garages, and existing parking is insufficient and inconvenient. Housing density is excessive with mostly eight-plex units, creating an undesirable living environment. Replacement units will be spread out over adjacent vacant space to reduce density. This project demolishes and replaces 48 existing units, and replaces an additional 34 units which became uninhabitable and were demolished for safety reasons in FY93 (roof and foundation failures).</p> <p><u>IMPACT IF NOT PROVIDED:</u> Air Force members and their families will continue to live in extremely unsuitable housing. The housing will continue to deteriorate with age, resulting in increased maintenance and repair costs, and extreme inconvenience to the occupants. Units will fail structurally and endanger the lives of the occupants. Piecemeal repairs will continue to be accomplished with little or no substantive improvement in occupant quality of life. These deficiencies will continue to adversely affect the morale of all personnel assigned to the base. The current Housing Market Analysis shows an on-base deficit of 98 housing units.</p> <p><u>ADDITIONAL:</u> his project meets the c riteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide". Since this is replacement housing, there will be no increase in the student population or impact on the ability of the local school district to support base dependents. An economic analysis has been prepared comparing the alternatives of new construction, revitalization, leasing and status quo operation. Based on the net present values and benefits of the respective alternatives, new construction was found to be the most cost efficient over the life of the project. The improvement cost option is 90% of the replacement cost. The supervision, inspection and overhead is 6 percent due to the Army Corp of Engineer is the design/construction agent. Base Civil Engineer: Col Michael Patrick, (402) 294-5500.</p>

10. Description of Proposed Construction: Replace housing management office. Includes site preparation, slab on grade, splitface concrete masonry walls, sloped standing seam metal roof, and decorative interior finishings. Provides offices, restrooms, counseling/meeting rooms, customer waiting area, computer equipment room, and interior/exterior child play areas. Includes utilities, parking, landscaping, & demolition. Air Conditioning: 15 KW.

11. REQUIREMENT: 465 SM ADEQUATE: 0 SUBSTANDARD: 445 SM
PROJECT: Replace Housing Management Office. (Current Mission)
REQUIREMENT: An adequate facility is required for managing base owned and operated accompanied and unaccompanied housing assets, for assisting all arriving personnel in finding adequate on or off-base housing, and for managing furnishings for authorized base personnel. The facility must be located for convenient access by all personnel. It must be handicapped accessible and have adequate parking for vehicles pulling trailers, and small trucks which may be used by arriving personnel. The facility must provide office space, a conference room, private counseling rooms, administrative space, a reception and customer waiting area, a customer referral area with multiple telephones, a computer room, and storage space for equipment and publications, a kitchen area for use by families, and interior and exterior play areas for children of customers. Exterior play areas must be provided with recreation equipment and be fenced for security. The facility exterior requires landscaping to enhance customer appeal.
CURRENT SITUATION: The existing Housing Management facility is located on the main base, approximately four miles from the base housing area and 79

4. PROJECT TITLE HOUSING MANAGEMENT FACILITY	5. PROJECT NUMBER SGBP970004	
<p>percent of managed housing units. The facility is located in a very crowded and congested industrial area with no expansion capability. Parking is inadequate and a continuous problem as customers compete with the heavy traffic, including major truck traffic in this industrial complex. It is poorly located for serving accompanied or unaccompanied customers and for effective conduct of normal housing management activities. Considerable extra time is spent each time housing inspectors travel between the office and area of greatest work. The housing management office provides a vital service to over 10,500 permanent party personnel and manages 2,632 family housing units. In addition, the office serves all base unaccompanied personnel and manages 846 dormitory rooms. The existing facility will be demolished upon completion of this project.</p> <p><u>IMPACT IF NOT PROVIDED:</u> The ability to service customers will be degraded by the poor accessibility of the current location. The majority of customers and the housing inspection staff will spend an extra half-hour per trip transiting the base and traveling to and from the primary housing area. Facilities will not be located as recommended in the Housing Community Plan.</p> <p><u>ADDITIONAL:</u> This project meets the criteria and scope specified in the "Air Force Housing Support Facilities Guide." The supervision, inspection and overhead is 6 percent due to the Army Corp of Engineer is the design.construction agent. Base Civil Engineer: Col Michael Patrick, (402) 294-5500.</p>

10. Description of Proposed Construction: Construct housing maintenance facility. Includes site preparation, and exterior appearance compatible with the surrounding housing area. Project will include off-street customer and employee parking, sidewalks, exterior lighting, exterior covered storage, landscaping, and demolition of three existing facilities. Also includes asbestos and lead based paint removal. Air Conditioning: 15 KW.					
11. REQUIREMENT: 863 SF ADEQUATE: 0 SUBSTANDARD: 464 SF PROJECT: Replace Housing Maintenance Facility. (Current Mission) REQUIREMENT: Construct a new Housing Maintenance Facility designed in accordance with the Housing Support Facilities Guide for a Large Housing Maintenance Facility. Consolidate two separate working stock storage locations into one and increase the square footage by 885 sf. Demolish the existing maintenance facility and restore the site to green space. Vacate and demolish two unoccupiable housing units currently used for working stock storage. CURRENT SITUATION: The existing Housing Maintenance Facility is an uninsulated metal building constructed in 1966. The facility has deteriorated electrical and sewer systems. The roof structure has failed causing extensive damage to the interiors. There is inadequate parking to support U-Fix-It Store customers, maintenance contractor vehicles, and delivery trucks. There is no automated fire suppression system or fire alarm system. Wing Safety has evaluated the existing maintenance facility and determined that "Storage and working space is inadequate for items stored and job tasks performed." Working stock for housing maintenance is stored in two unoccupiable housing units located five miles from the main

4. PROJECT TITLE	5. PROJECT NUMBER	
REPLACE LOOP MILITARY FAMILY HOUSING PHASE 5	MHMV994002	
<p>will be upgraded to meet modern housing needs.</p> <p><u>CURRENT SITUATION:</u> This project replaces 37 housing units that were constructed in 1947-48. These 50-year-old houses are showing the effects of age and continuous heavy use. They have had no major upgrade since construction, and do not meet the needs of today's families, nor do they provide a modern home environment. The units lack common features found in homes off-base such as family rooms and master baths. The flat roofs require frequent emergency stop-gap maintenance. Asbestos is present in the flooring, insulation, interior walls, and roofing of each of these units. The plumbing and electrical systems are antiquated and do not meet current standards for efficiency or safety. These units have outlived their useful life; replacement is the most logical method to provide acceptable housing for these members and their families.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Major morale problems will result if this replacement initiative is not supported. Some people will continue to occupy unsuitable housing while neighbors are in new, replaced units. Asbestos and lead-based paint will remain in the units, possibly exposing people to a known hazardous material. The housing will continue to be occupied until it becomes uninhabitable because adequate, affordable housing is not available. Maintenance of these units will be costly due to the deteriorating building systems and inadequate energy conservation design.</p> <p><u>ADDITIONAL:</u> This project meets the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide". An economic analysis has been prepared comparing the alternatives of replacement, improvement, leasing and status quo operation. The cost to improve this housing is 82% of the replacement cost. Based on the net present values and benefits of the respective alternatives, replacement construction was found to be the most cost efficient over the life of the project. Since this is replacement housing, there will be no increase in the student population or impact on the ability of the local school district to support base dependents. Base Civil Engineer: Col Michael Cuddihee (505) 846-7916.</p>

10. Description of Proposed Construction: Demolish 90 family housing units and replace 40 units. Project consists of demolition, asbestos/lead-based paint removal, and construction of housing units with associated single car garages. Provides appliances, patios with privacy fences, storage areas, and trash can enclosures. Site preparation support includes utility repair and landscaping.

11. REQUIREMENT: 5,422 UN ADEQUATE: 4,083 UN SUBSTANDARD: 1,339 UN PROJECT: Demolish 90 and replace 40 Military Family Housing Units. (Current Mission) REQUIREMENT: This project is required to provide modern and efficient replacement housing for military members and their dependents assigned to Wright-Patterson AFB. All units will meet "whole house" standards and are programmed in accordance with phase A of the Housing Community Plan. Replacement housing will provide a safe, appealing living environment comparable to that found in the civilian community. This is the twelfth of multiple phases but the first phase of replacement construction to provide adequate housing for base personnel. The replacement housing will provide a modern kitchen, living room, family room, bedroom and bath configuration, with ample interior and exterior storage and single car

<p>garage. The basic neighborhood infrastructure will be upgraded to meet modern housing needs.</p> <p><u>CURRENT SITUATION:</u> This project replaces 40 Wherry housing units constructed in the 1950s. These old houses are showing the effects of age and continuous heavy use. They have had no major upgrades since construction, and do not meet the needs of today's families, nor do they provide a modern home environment. The units lack common features found in homes off-base such as family rooms and master baths. The flat roofs require frequent emergency maintenance. Asbestos is present in the flooring, insulation, interior walls, and roofing of each of these units. Lead-based paint is present on both the interior and exterior of the units. The plumbing and electrical systems are antiquated and do not meet current standards for efficiency or safety. These units are at the end of their useful life; replacement is the most economical method to provide acceptable housing for these members and their families.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Major morale problems will result if this replacement initiative is not supported. Some people will continue to occupy unsuitable housing while neighbors and friends are in new, replaced units. Asbestos and lead-based paint will remain in the units. The housing will continue to be occupied until it becomes uninhabitable because adequate, affordable housing is not available. Maintenance and operation of these units will be costly due to the deteriorating building systems and non-existent energy efficient construction.</p> <p><u>ADDITIONAL:</u> An economic analysis has been prepared comparing the alternatives of new construction, revitalization, leasing and status quo operation. Based on the net present values and benefits of the respective alternatives, replacement construction was found to be the most cost efficient over the life of the project. The cost to improve this housing is 81.4% of the replacement cost. This project meets the criteria/scop specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide". Since this is replacement housing, there will be no increase in the student population or impact on the ability of the local school district to support base dependents. Base Civil Engineer: Col Louis F. Hauck (937)257-6214.</p>

4. PROJECT TITLE CONSTRUCT MILITARY FAMILY HOUSING (PH 2)	5. PROJECT NUMBER FNWZ990002	
<p>safety of the occupants, including construction of a bridge over a storm drainage creek.</p> <p><u>CURRENT SITUATION:</u> The community surrounding the base does not have sufficient housing to adequately support base personnel. The current Housing Market Analysis indicates a deficit of 592 housing units (after execution of 70 units in the FY98 program). The largest deficiency is in the 2-bedroom junior NCO category. These families can least afford to live off base.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Families will continue to live in expensive and substandard off-base housing, or be forced to endure involuntary separations pending assignment into military family housing. Mission execution will suffer from the affects of low morale and increased stress due to poor living conditions and financial strains on families.</p> <p><u>ADDITIONAL:</u> This project meets the criteria and scope specifications in Part II of Military Handbook 1190, "Facility Planning and Design Guide." Siting is in compliance with the Housing Community Plan and the Base Comprehensive Plan. The local school authority has been contacted and indicated it has the capability to accept the increase in student population generated by this project. An economic analysis has been prepared comparing the alternatives of construction, leasing, and status quo. Based on the net present values and benefits of the respective alternatives, construction was found to be the most cost effective. The supervision, inspection and overhead is 6 percent due to the Army Corp of Engineer is the design/construction agent. Base Civil Engineer: Lt Col David Sweat, (915) 696-2250.</p>

11. REQUIREMENT: 2,401 UN ADEQUATE: 1,748 UN SUBSTANDARD: 653 UN PROJECT: Replace Military Family Housing (Current Mission). REQUIREMENT: Project will provide modern and efficient housing for military members and their families assigned to Fairchild AFB. All units will meet "whole house" standards and provide a safe, comfortable, and appealing living environment comparable to the off-base civilian community. Project is programmed in accordance with the Housing Community Plan. CURRENT SITUATION: This project replaces houses constructed in 1952. These 45-year old units are showing the effects of age and continuous heavy use. They have had no major upgrades since construction and do not meet the needs of today's families. Roofs, walls and exterior pavements require major repair or replacement resulting from the effects of age and the environment. Roof structures are rotting and leaks have made already inadequate insulation even less effective. Foundations and pavements are

REPLACE FAMILY HOUSING	GJKZ990030	
<p>showing signs of failure from settlement. Plumbing and electrical systems are antiquated and do not meet current standards for efficiency or safety. Housing interiors are generally inadequate by any modern standards. Bedrooms are small and lack adequate closet space. Bathrooms are small, and fixtures are outdated and energy-inefficient. Kitchens have inadequate storage and counterspace, cabinets are old, and countertops and sinks are badly worn. Flooring throughout the house is worn out and contains asbestos. Plumbing and electrical systems do not meet modern building codes. There is no Ground Fault Interruptor Circuit protection, and many electrical outlets lack grounding protection. Lighting systems throughout the houses are inefficient and require replacement. Heating systems require upgrade and replacement.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Air Force members and families will continue to be inadequately housed. Low morale and retention problems can be expected. Units will continue to deteriorate resulting in escalating operations, maintenance and repair costs to the Government. The current Housing Market Analysis shows an on-base deficit of 22 housing units.</p> <p><u>ADDITIONAL:</u> This project meets the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide." An economic analysis has been prepared comparing the alternatives of new construction, revitalization, leasing and status quo operation. Based on the net present values and benefits of the respective alternatives, new construction was found to be the most cost efficient over the life of the project. The cost to improve this housing is 90% of the replacement cost. Since this is replacement housing, there will be no increase in the student population or impact on the ability of the local school district to support base dependents. The net square meter cost to replace this housing is based on actual bids. Base Civil Engineer: Lt Col Waylon Patterson, (509) 247-2291.</p>

10. Description of Proposed Construction: Replace housing management and maintenance facilities. Includes concrete foundation, masonry exterior walls with brick veneer, and metal roof. Provides offices, restrooms, customer waiting/counseling area, computer equipment room, indoor/outdoor child play areas, workshop, self-help area, breakroom, and storage. Includes all utilities, parking, landscaping, and fire protection.					
11. REQUIREMENT: 915 SM ADEQUATE: 0 SUBSTANDARD: 664 SM PROJECT: Replace Housing Management and Maintenance Facility (Current Mission). REQUIREMENT: An adequate facility is required for managing base owned and operated family housing assets, for assisting arriving personnel in finding on- or off-base housing, and for managing furnishings for authorized base personnel. It must be located for convenient access by personnel, be handicapped accessible, and have adequate parking for vehicles pulling trailers or small trucks utilized by inbound personnel. CURRENT SITUATION: Existing housing management office and maintenance functions are housed in a World War II wooden facility located in the base industrial area. The management office is 40% undersized and there is no space for expansion. The maintenance and self-help functions are in separate locations and floor areas are half the recommended sizes. Handicapped access is impractical since the facility is built on a 4 ft high concrete foundation. Access is difficult given the inconvenient location and vehicle congestion in this industrial area. It would be impractical and unsafe to provide a children's outdoor play area at this site. This facility is one of the first stops for inbound families and it leaves a poor initial impression of the installation. IMPACT IF NOT PROVIDED: Customers will continue to be served in an

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

FY 1999 POST ACQUISITION CONSTRUCTION

	<u>Program (In Thousands)</u>
FY 1999 Program	\$ 81,778
FY 1998 Program	\$121,795

Purpose and Scope

The Air Force operates approximately 110,000 family housing units for FY 1999. The average age of housing units in the Air Force inventory is about 35 years. About 61,000 of these units now require improvement or renovation to meet contemporary living standards during the next decade. Many of these units require major expenditures to repair or replace deteriorated mechanical, electrical, or structural components, and to provide some of the modern amenities found in comparable community housing. The Post Acquisition Construction Program provides this needed revitalization. Each project also includes a significant amount of concurrent maintenance and repair to maximize the project cost effectiveness (average per project is 60%).

The Air Force is the acknowledged DoD leader in developing the "whole house" revitalization concept. Whole house is the combination of needed maintenance and repair together with improvements to bring the unit to contemporary standards. In addition, we are looking beyond the house to the entire housing area in our requirements plan. Our "whole neighborhood" concept is being developed and includes the development of neighborhood vehicular and pedestrian circulation concepts to consider siting, density, landscaping, parking, playgrounds, recreation areas and utilities, in addition to the housing unit itself.

Consistent with Authorization and Appropriation Committees' language in FY 1990, the Air Force is seeking to maintain funding in this account to continue revitalizing our aging homes. Consistent with Appropriation Committees' language in FY 1985, the Air Force has gathered data on the post acquisition construction projects to detail past projects on these units and any future work being programmed within a three year period. This information is provided as a part of this submittal.

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

Program Summary

Authorization is requested for:

- (1) Various improvements to existing public quarters, as described on DD Form 1391.
- (2) Appropriation of \$81,778,000 to fund projects in FY 1999.

NOTE: Projects within the program are within the statutory limitation of \$50,000 per unit adjusted by area cost factor, except as identified by separate DD Form 1391.

SUBTOTAL					81,778
TOTAL CONTRACT COST					81,778
TOTAL REQUEST					81,778
10. Description of Proposed Construction: Includes all work necessary to revitalize military family housing by providing: air conditioning, where authorized; modern functional layouts; soundproofing; and utility and site improvements. Energy conservation actions include new and additional insulation, storm windows, solar screens, and more efficient heating and cooling systems. (Continued on next pages.)					
11. PROJECT: This request is for appropriation of \$81.778 million to accomplish improvements in family housing units. REQUIREMENT: To revitalize and improve the livability of older, obsolete family housing units, to conserve energy in these older housing units, and to bring utility systems up to current safety standards. Whole-house improvements includes but are not limited to: kitchen upgrades, bathroom additions/upgrades; repair/replacement of roofs, upgrade of mechanical & electrical systems, replacement of windows, doors, floors and exterior improvements (patios, fences, etc.) CURRENT SITUATION: The majority of these housing units were constructed since the late 1940's using various design and construction criteria, with different types of material, installed equipment, appliances, livability, and appearance. Many utility and structural systems were designed and constructed during years of plentiful, inexpensive energy resources. Insulation, storm windows, etc., not previously cost effective, are now wise investments. This program will prolong the useful life of many of our older, less modern units by enhancing livability, reducing operation costs and improving safety aspects. ADDITIONAL: These projects meet the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide" unless noted on the individual DD Form 1391s.

10. Description of Proposed Construction: Improves 36 housing units. Provides general interior and exterior modernization and renovation of housing units. Includes utility upgrade and additions to meet current standards. Upgrades kitchens, bathrooms, improves floor plans, provides increased energy efficiency, patios, playgrounds, and recreation areas. Includes asbestos/lead-based paint removal.					
11. REQUIREMENT: 3,195 UN ADEQUATE: 884 UN SUBSTANDARD: 2,188 UN PROJECT: Improve Military Family Housing (Phase 4). (Current Mission) REQUIREMENT: This project is required to provide modern and efficient housing for military members and their dependents stationed at Hickam AFB. Housing must be upgraded to meet current life safety codes and to provide a comfortable and appealing living environment comparable to the off-base civilian community. This is the fourth of multiple phases to upgrade housing units. Three hundred one units have been upgraded or are approved in previous phases and 2,188 units remain to be accomplished. All units will meet whole house standards and are programmed in accordance with phase two of the Housing Community Plan. Renovated housing will provide modern kitchen, living room, family room, bedroom, and bath configuration with ample interior and exterior storage. Carports will be provided where deficient. Units will be air conditioned. Neighborhood improvements are required and will include landscaping, playgrounds and recreation areas. CURRENT SITUATION: This project upgrades and modernizes houses which were constructed in 1959 and in 1964. These 38-year-old Capehart and 33-year-old Earhart housing units require major renovation and repair to correct deterioration resulting from age and heavy use. They have had no major upgrades since construction, do not meet the needs of today's families, and do not provide a modern home environment. Kitchens do not

IMPROVE FAMILY HOUSING, PHASE 4	KNMD994401	
<p>provide adequate storage, cabinet space or countertop area, and are not functionally arranged. Plumbing and lighting fixtures are deteriorated. The electrical and smoke alarm systems do not meet modern construction codes. Ground fault circuit interrupter protection is not provided for bathrooms, kitchens, and exterior circuits. Flooring, windows, and roofing require replacement. The units have inadequate living space and storage. Playgrounds, parking areas, and landscaping are inadequate to nonexistent.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Units will continue to deteriorate rapidly, resulting in increasing operations, maintenance and repair costs to the Government and inconvenience to residents. Low morale and retention problems can be expected if such conditions are permitted to continue. The most recent Housing Market Analysis shows a housing deficit of 123 units.</p> <p><u>WORK ACCOMPLISHED IN PREVIOUS THREE YEARS:</u> None</p> <p><u>WORK PROGRAMMED FOR NEXT THREE YEARS:</u> None.</p> <p><u>ADDITIONAL:</u> An economic analysis has been prepared comparing the alternatives of new construction, revitalization, leasing and status quo operation. Based on the net present values and benefits of the respective alternatives, improvement was found to be the most cost efficient over the life of the project. The cost to improve this housing is 67 percent of the replacement cost. Base Civil Engineer: Lt Col Linden Torchia, (808) 449-1660.</p>

TOTAL REQUEST					4,860
MOST EXPENSIVE UNIT					\$128,000
AREA COST FACTOR					0.96
10. Description of Proposed Construction: Improve 47 units including one General Officer Quarter (GOQ). Renovate kitchens and bathrooms, add/renovate living space, replace windows, mechanical, electrical systems, improve exterior finish, provide patios, privacy fences, and carports. Replace utility lines to domestic potable water main, improve drainage, landscaping, signage and environmental hazard remediation.					
11. REQUIREMENT: 4,680 UN ADEQUATE: 2,693 UN SUBSTANDARD: 1,717 UN PROJECT: Improve Family Housing (Phase A, part 2). (Current Mission) REQUIREMENT: To provide a comfortable and appealing living environment comparable to the off-base civilian community for military members and their families at Andrews AFB. This project is programmed to meet "whole house" standards in accordance with the Housing Community Plan. CURRENT SITUATION: These wood-frame, concrete slab on grade units were constructed in 1966. They have received no major upgrades since construction and do not meet the needs of today's families. Kitchens lack dishwashers, have insufficient countertop and cabinet area, and wood cabinets are dated. Bathrooms lack vanities. No family rooms exist. Gas-fired water heater, furnace, range, plumbing fixtures, and air-conditioning are nearing the end of their useful life and are energy inefficient. The bathroom and outdoor outlets have no ground-fault circuit interrupters, electric panel is located in the kitchen, and circuit breakers are not reliable. Windows need to be replaced with vinyl-clad wood and insulating glass and screen. All exterior wood siding, fascia and trim need to be replaced. Bathroom wall covering, ceramic tile, tub, shower, and fixtures need to be replaced. The GOQ requires roof replacement, kitchen renovation, exterior finish system, window and exterior door replacement, and HVAC upgrade.

IMPROVE FAMILY HOUSING	AJXF994003	
<p><u>IMPACT IF NOT PROVIDED:</u> Air Force members and families will continue to be inadequately housed. Units will continue to deteriorate resulting in escalating operations, maintenance and repair costs to the Government.</p> <p><u>WORK ACCOMPLISHED IN PREVIOUS THREE YEARS:</u> FY96 (GOQ) replace furnace, \$1.7K; replace carpet, \$5.4K; FY97 (GOQ) upgrade bathrooms, \$6.0K; interior doors, \$2.9K; patio carpet, \$1.1K; garage door, \$1.0K; and routine maintenance and repair.</p> <p><u>WORK PROGRAMMED FOR NEXT THREE YEARS:</u> None</p> <p><u>ADDITIONAL:</u> An economic analysis has been prepared comparing the alternatives of new construction, revitalization, and status quo operation. Based on the net present values and benefits of the respective alternatives, improvement was found to be the most cost effective over the life of the project. The cost to improve these units is 60% of the replacement cost. Unit costs are based on an actual bid from a contractor on FY95 Improve Family Housing project (AJXF904000R). The construction agent for this project is the Naval Facilities Engineering Command resulting in Supervision, Inspection, and Overhead costs of 6 percent. Base Civil Engineer: Col Gus G. Elliott (301) 981-7281.</p>

10. Description of Proposed Construction: Interior and exterior modernization of two housing units. Upgrades floor coverings, improves floorplans, increases energy efficiency, and provides new landscaping. Includes demolition and asbestos/lead-based paint removal. Grade Mix: 2 ES-E9.					
11. REQUIREMENT: 2,991 UN ADEQUATE: 1,353 UN SUBSTANDARD: 1,638 UN PROJECT: To improve Senior Enlisted Advisors' (SEA) quarters. REQUIREMENT: This project is required to provide modern and efficient quarters for SNCOs and their dependents at McGuire AFB; to ensure that quarters meet life, safety, NEC and BOCA codes; and to provide a comfortable and appealing living environment comparable to the off-base civilian community. This project provides new lighting fixtures, replacement of flooring, interior doors, finishes throughout, landscaping, and site improvements. Project is programmed to meet "whole house" standards IAW the McGuire AFB Housing Community Plan. CURRENT SITUATION: These quarters do not meet AMC's "whole house" standards. The quarters do not meet the needs of today's families, nor do they provide a modern, comfortable home environment. The walls, floors, ceilings in the quarters are old, badly worn and deteriorated. The plumbing and lighting fixtures are old and deteriorated. Cable and telephone wiring are exposed. The electrical system does not meet current safety codes. Units have inadequate storage and backyard privacy. The floor in the living room is warped, cracked, seperating, and has made one unit uninhabitable. Both of these units meet the Level I criteria relative to the need to accomplish this work within the next two years and these quarters significantly impact the morale occupants living in them. Building 2756 is in such poor condition that it is vacant and closed to

10. Description of Proposed Construction: Improve 100 and demolish 8 housing units. Includes utilities and required storage space. Upgrades bathrooms and kitchens. Improves floors, finishes, layouts, and energy efficiency. Provides playgrounds, patios, and privacy fencing. Installs double paned windows and sliding doors. Includes appliances, demolition, and asbestos/lead based paint abatement.					
11. REQUIREMENT: 1,710 UN ADEQUATE: 200 UN SUBSTANDARD: 1,498 UN PROJECT: Improve Military Family Housing (Ph 4). (Current Mission). REQUIREMENT: This project is required to provide modern and efficient housing for military members and their dependents stationed at Seymour Johnson AFB. All units must be upgraded to whole house standards to provide a safe, comfortable and appealing living environment comparable to the off-base living community. This project is the fourth phase of a multi-phase program to upgrade 1,498 substandard family housing units. All units are programmed in accordance with Phase 2 of the Housing Community Plan. Renovated housing will provide a modern kitchen, living room, dining room, bedroom and bath configuration, with sufficient interior and exterior storage areas. Neighborhood improvements will provide playgrounds and landscaping. Existing overhead utility lines will be buried, deteriorated sewer lines will be replaced, and street layouts will be adjusted to improve neighborhood identity and reduce traffic safety problems. CURRENT SITUATION: This project improves units built in 1958, which are showing the affects of age and heavy use. Livability and energy efficiency are at unacceptable standards. Doors and frames are extremely warped. Hot water heaters and HVAC systems have reached the end of their useful life, are extremely inefficient, and are producing serious

<p>condensate problems resulting in peeling paint, deteriorating plaster walls, and mold and mildew problems. Patio doors and windows are poorly fitted, single pane units. Bathrooms are exceptionally small and in poor condition. They have undersized sinks and vanities and cracked and deteriorated gel-coated tubs and showers. Additionally, weatherbeaten exterior trim, combined with limited insulation and poor roofs is resulting in increased maintenance costs and reduced energy efficiency. Overhead primary electrical distribution systems need to be replaced. Sanitary sewer lines are deteriorating and in some cases have failed completely.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Air Force members and their families will continue to live in outdated and unsatisfactory housing conditions. Without improvements, these houses will continue to deteriorate resulting in increased maintenance and repair costs, increased inconvenience to the occupants, and will ultimately become uninhabitable facilities. These conditions will have an adverse effect on morale and degrade mission execution.</p> <p><u>WORK ACCOMPLISHED IN PREVIOUS THREE YEARS:</u> None.</p> <p><u>WORK PROGRAMMED FOR NEXT THREE YEARS:</u> None.</p> <p><u>ADDITIONAL:</u> Eight units will be demolished in this project to reduce the density of the housing area and improve neighborhood conditions. This project meets the criteria/scope specified in Part II of Military Handbook 1190, "Facility Planning and Design Guide." The cost to improve these units is 68% of the replacement cost. An economic analysis has been prepared comparing the alternatives of new construction, revitalization, leasing and status quo operation. Based on the net present values and benefits of the respective alternatives, improvement was found to be the most cost efficient over the life of the project. The supervision, inspection and overhead is 6 percent due to the Army Corp of Engineer is the design/construction agent. BCE: Lt Col Quincy Purvis, (919) 736-5511.</p>

10. Description of Proposed Construction: Improve 110 housing units. Includes renovating kitchen and baths, replacing interior lights and wiring, redesigning floor plans, improving interior and exterior finishes, repairing pavements, and upgrading an additional 28 SM. Provides air conditioning, appliances, landscaping, playgrounds and recreation areas. Includes asbestos and lead paint removal. Replaces privacy fences.					
11. REQUIREMENT: 2,604 UN ADEQUATE: 252 UN SUBSTANDARD: 2,207 UN PROJECT: Improve Military Family Housing (Phase 5). (Current Mission) REQUIREMENT: This project is required to provide modern and efficient housing for military members and their dependents stationed at Minot AFB. All units will be "whole house" improved to provide a safe, comfortable, and appealing living environment comparable to the off-base civilian community. This project is programmed in accordance with Phase B of the Housing Community Plan. This is the fifth of multiple phases to improve 2459 housing units for base personnel. 252 units have been or are approved for upgrade. These improvements will provide a modern kitchen, living room, and bath configuration with ample interior and exterior storage plus upgrading 28 square meters per unit to provide an arctic recreation room. Parking will be provided for a second vehicle. The neighborhood support infrastructure will be upgraded to meet modern housing needs, to include landscaping, playgrounds and recreation areas. CURRENT SITUATION: This project improves housing units built in 1964, which are showing the affects of age and continuous heavy use. They have had no major upgrades since construction, and do not meet the needs of today's family, nor do they provide a modern home environment. Kitchens are narrow and dark, and do not provide adequate cabinet and counter top space. The bathrooms are very small and in poor condition. Bathroom

Renovated housing will provide a modern kitchen, living room, family room, bedroom, and bath configuration with ample interior and exterior storage. Units will be expanded to meet current space authorizations. Single car garages and off street parking will be provided where deficient. Neighborhood improvements are required and will include landscaping, playgrounds, and recreation areas. CURRENT SITUATION: The project upgrades and modernizes housing which was constructed in 1935. These 62 year old houses require major renovation

FY 1999 ADVANCE PLANNING AND DESIGN

Program (In Thousands)
FY 1999 Program \$11,342
FY 1998 Program \$11,971

Purpose and Scope

This program provides for preliminary studies to develop additional family housing facilities, one time multi-phase design, and housing community plan developments; studies for site adaptation and determination of type and design of units; and working drawings, specifications, estimates, project planning reports and final design drawings of family housing construction projects. This includes the use of architectural and engineering services in connection with any family housing new or post acquisition construction program.

Program Summary

Authorization is requested for:

- (1) Advance planning and design for future year housing programs;
- (2) FY 1999 appropriation of \$11,342 to fund this effort as outlined in the following exhibit:

FISCAL YEAR 1999 BUDGET REQUEST

OPERATIONS, UTILITIES AND MAINTENANCE
(Excluding Leasing and Debt)

Program (\$ in Thousands)
FY 1999 Program \$671,892
FY 1998 Program \$699,332

Purpose and Scope: Provides operations and maintenance resources to pay for the cost of ownership in terms of property management and day-to-day maintenance.

a. Operations. This portion of the program provides for operating expenses in the following sub-accounts:

(1) Management. Includes installation-level management such as housing office operations, quality assurance evaluators, administrative support, community liaison, and annual service fees paid to the Corporation-Trust Company. Provides the required corporate presence in Delaware for the United States Air Force Housing, Inc., which continues as the entity holding title to Capehart and Wherry real property. The housing referral program assists the two-thirds of Air Force families that live in local communities to find quarters in the private sector and implements the Fair Housing Act of 1968. Services include counseling on housing decision-making, providing advance information on new base of assignment, and assisting through settling-in and home-finding services.

(2) Services. Provides basic support services including refuse collection and disposal; fire and police protection; entomology and pest control; and snow removal and street cleaning.

(3) Furnishings. Procures household equipment (primarily stoves and refrigerators) and, in limited circumstances, furniture; controls furnishings inventories; and, maintains and repairs furniture and appliances.

(4) Miscellaneous. Includes mobile home hookups, leased office and warehouse space supporting family housing, payments to other federal agencies or foreign governments to operate permit housing units occupied by Air Force personnel, and similar costs.

b. Utilities. Includes all heat, electricity, water, sewer, and gas utilities serving family housing, purchased and base produced, except occupant purchased utilities such as telephone and cable TV.

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

c. Maintenance. Provides upkeep of family housing real property, as follows:

(1) Maintenance/Repair of Dwellings. Service calls, routine maintenance, repairs, and replacement of deteriorated facility components.

(2) Exterior Utilities. Maintenance and repair of water, sewer, electric, steam and gas lines supporting family housing areas.

(3) Other Real Property. Upkeep of grounds, common areas, roads, parking areas, and other property for the exclusive use of family housing occupants not discussed above.

(4) Alterations and Additions. Minor alterations to housing units or housing support facilities. Large scope and high dollar value projects are included in the construction program.

The Air Force family housing budget requests essential resources to provide military families with housing either in the private market through assistance from a housing referral office, or in government housing. Increased emphasis has been placed on the proper funding of the family housing operations and maintenance program. The Air Force's FY 1999 Operation and Maintenance program emphasizes the following goals:

* Identify affordable housing for military members. Where shortages exist, accomplish housing surveys and identify project proposals to request new construction or leasing of housing for military families.

* Invest wisely in maintenance and repairs to preserve and restore the existing required housing inventory worldwide.

* Reduce utility consumption through increased management emphasis on energy conservation and whole-house improvements.

* Reduce furnishings inventories in accordance with transfers and realignments. Redistribute excess furnishings from realigned bases.

* Fund government appliances and furniture consistent with cost/benefit studies and the delivery of new housing units which need government-supplied appliances.

* Continue the Quarters Cleaning Initiative (QCI) which helps limit expensive overseas temporary housing allowances (TLAs) to

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

approximately three days in lieu of the 10-day maximum. QCI program costs are offset by known savings in TLA accounts.

* Schedule maintenance and repair activities along with whole-house improvements to obtain the greatest enhancement in livability while increasing the useful life of housing units with the minimum capital investment and minimum impact on occupants.

* Pursue privatization ventures that will transfer operation and maintenance responsibility to the private sector where cost effective. Accelerated revitalization of housing assets is the biggest benefit of privatization.

* Continue efforts to decrease operations and maintenance costs in certain high-cost quarters.

* Continue installation, operation, maintenance, and improvement of the Automated Civil Engineer System-Housing Module (ACES-HM, formerly identified as Housing Information Management System (HIMS)), an Air Force-wide computer system designed to assist in all phases of housing management. Ongoing initiatives include beta-testing of software needed to fulfill daily assignment, scheduling, maintenance, and inspection of units. Improved customer service and reduced operations costs are anticipated through the fielding of this system.

This budget request is for funds needed to meet must-pay operations and utilities expenses, as well as the maintenance and repair of existing housing inventory. The Air Force shares the concerns of Congress to improve support to military families and to properly maintain the required existing housing inventory. This budget supports a long-range program responsive to Congressional desires while considering the current environment of budget restraint.

Operation and Maintenance FY 1999 Program Summary - Highlights
Authorization/Appropriation is requested in FY 1999 for \$671,892,000. This amount, together with estimated reimbursements of \$9,400,000, will fund the FY 1999 Operation and Maintenance program of \$681,292,000.

A summary of the funding program for FY 1999 is as follows (\$ in thousands):

FISCAL YEAR 1999 BUDGET REQUEST

Analysis of Change in Management

The Management sub-account is a relatively stable program and is predominately fixed costs such as salaries and required administrative support supplies and equipment. As part of our management activity, we are continuing to develop new computer-based work tools to improve customer service and management of resources. This effort includes further refinement and operational implementation of the Automated Civil Engineer System-Housing Module (ACES-HM). This system improves customer services and data sharing for overall program management, and provides interactive training to ensure field acceptance and use.

As part of the continuing effort to develop alternatives for more cost effective activities, the Management sub-account provides funds for studies of privatization projects at selected installations. The management sub-account also provides funds for Housing Market Analyses at each base to determine the proper amount of housing needed to support the assigned population.

The Management sub-account is not per-unit specific since there is a basic level of support and manning for the base housing office regardless of the number of units. Minor adjustments were included in the budget request based on small changes in the inventory as well as increases for inflation.

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

Services. Provides basic support services such as refuse collection and disposal; fire and police protection; entomology and pest control; snow removal; and street cleaning.

Military family housing activities are affected by many new environmental standards. The environmental legislative changes in states and foreign countries continue to evolve leading to an uncertain ability to predict program growth. Initiatives to remove lead based paint and asbestos, install leak detection on underground heating fuel storage tanks, and provide spill/overflow protection and corrosion control are also covered within this account. Increases in landfill costs are programmed and we anticipate these to continue in the future.

13. Program Decreases:	None
14. FY 1999 Budget Request:	\$36,066

Analysis of Changes in Services

The Services budget request has been increased to meet the cost growth for service contracts. The most significant cost increases are for refuse removal contracts which are being modified to accommodate more costly environmental standards. This cost growth is primarily for increased tipping fees (landfill dumping costs) due to additional environmental requirements for safer containment of landfill runoff. In FY 1996 and FY 1997, new mandatory and voluntary recycling programs were implemented. Following initial recycling start-up costs, these programs have leveled off for FY 1998 and 1999.

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

Furnishings. Includes the procurement for initial issue and replacement of household equipment (primarily stoves and refrigerators) and in limited circumstances, furniture; the control, moving, and handling of furnishings inventories; and the maintenance and repair of such items.

This Fiscal Year 1999 Budget reflects the "Sense of Congress" for increased burden sharing with foreign governments. Force structure reductions overseas have allowed the Air Force to reduce overseas furnishings inventories. However, overseas realignments are still occurring which increases operating costs for moving furnishings, as well as making it necessary to maintain adequate backup stock of appliances and furnishings for our overseas dependent families.

Loaner sets of furniture are issued to military families overseas so they may occupy permanent quarters prior to the arrival of personally owned furniture. Loaner sets are very cost effective because they reduce the cost of temporary quarters. Other items of household furnishings normally built into CONUS houses which are limited or not available in foreign countries, such as wardrobes (clothes closets), kitchen cabinets and appliances, are also issued to military families.

Leases in Europe also require closets and cabinets to be issued along with appliances since leased units overseas do not have the same accommodations available as in the United States.

The furnishings account funds essential furnishings at levels consistent with cost/benefit studies and the needs of the Air Force. Much of the funding requested in the furnishings account results from an analysis of the most economical use of funds for the government and avoids higher costs in other accounts such as military allowances and other support appropriations.

13.	Program Decreases:	\$-2,519
	Stabilized investment in Italian appliances, PACAF and USAFE unanticipated requirements satisfied	
14.	FY 1999 Budget Request:	\$37,218

Analysis of Changes in Furnishings

Furnishings costs are trending downward from over \$50 million per year in the late 1980's to \$37.2M in FY 1999. Base closures and realignments from overseas have been the primary cause of these reductions. Also, the Air Force reduced the number of locations with limited Joint Travel Regulation status which alleviated some of the requirement for furnishings support. During realignments in Europe furniture was moved to new locations to support continued operations. This FY 1999 budget request takes into consideration force structure drawdowns and closures and related shifts of furnishings. Even so, this request addresses the needs of newly constructed and leased housing units being added to the CONUS Air Force inventory to compensate for housing deficits. Also, mission requirements and realignments have resulted in build-up of activities at several locations in Europe, to include increases in concurrent family travel at Lakenheath AB England and Aviano AB Italy. With more families at these locations to support, the furnishings requirements have increased. Changes to Italian Law drive purchases of non-US manufactured gas appliances for use at Italian locations.

FISCAL YEAR 1999 BUDGET REQUEST

Analysis of Changes in Miscellaneous

Minor adjustments are made to a stable program which covers incidental costs in support of the family housing accounts. The decrease results from costs of units supported in Australia are subject to foreign currency gains or losses which are not covered in the FCF account. These accommodation costs are incurred in accordance with requirements in host country agreements and are budgeted as "must pay" expenses. In addition, costs have increased due to the implementation of the International Cooperative Administrative Support Services (ICASS) Program which is a new system for managing and sharing the administrative support costs of overseas operations of US Foreign Affairs agencies and other US Government agencies that operate as part of the country team at US Embassies.

RECONCILIATION OF INCREASES AND DECREASES

EXHIBIT OP-5

Utilities. This program provides for all utilities consumed in government-owned family housing. Electricity, purchased heating, water, sewage and waste systems are included. Military Family Housing facilities consume approximately one-fifth of Air Force facility energy usage; therefore, Military Family Housing residents and management share a significant role in the achievement of Air Force energy reduction goals. Since Military Family Housing occupants are not billed for their energy consumption, conservation motivation is rooted in other than individual financial incentives. The single most effective motivator is command emphasis. Energy projects to install set back thermostats, water heater jacket insulation, insulation in crawl and attic spaces, and thermal doors and windows are also achieving good results toward the attainment of Air Force energy conservation goals.

14. FY 1999 Budget Request:		\$152,214

Analysis of Changes in Utilities

The requirement for FY 1999 is based on historical obligation trends which continue to be influenced by weather and energy conservation savings resulting from whole-house improvements and energy conservation projects. In addition, conversion of Military Family Housing units in Germany from base-produced heat to heat purchased from a local plant helped reduce overall utility costs. In general, the continuing trend for utilities is cost growth below normal inflation as a result of on-going programs and initiatives to conserve energy. The consumption usage stream shown in the following table is consistent with the Air Force goals of reducing energy consumption and costs through conversion to natural gas and installation of energy saving materials in housing units.

UTILITIES (000)

PROJECTED ENERGY CONSUMPTION	<u>FY 1997</u>	<u>FY 1998</u>	<u>FY 1999</u>
Electricity (KWH)	1,740	1,687	1,636
Fuel Oil (Bbls)	388	380	372
Natural Gas (KCF)	6,290	6,227	6,164
Coal (MBTUs)	352	348	345
Purchased Steam (MBTUs)	576	564	552

Overall, utility rates are stable. Continued conservation efforts are reducing consumption and costs. The primary reason for cost growth is due to inflation which is offset by continued emphasis on conservation of utilities and investment in energy savings housing materials.

Analysis of Changes in Maintenance Program

Previously limited maintenance funding and a high occupant turnover have accelerated deterioration of the Air Force's aging housing inventory. Constrained funding has resulted in a greater reliance on temporary fixes which in the long run only exacerbates the deterioration of our housing units. In addition, the infrastructure which supports the units is now beyond its projected economic life at most of our installations. Several systems have failed and many are near failure.

The family housing assets maintained by the Air Force are valued at over \$16.5 billion in replacement costs. Sound property management must be applied to preserve and protect this major investment to ensure that these facilities can be occupied continuously. Budget constraints have had an adverse impact on the Air Force's program to contain the growth of deferred maintenance.

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

SUMMARY OF BACKLOG OF DEFERRED MAINTENANCE AND REPAIR (DMAR)
(\$ in Millions)

	<u>FY 1997</u>	<u>FY 1998</u>	<u>FY 1999</u>
Beginning of Year DMAR	928	971	1,086
Revitalization Reduction	-76	-73	-49
BRAC IV reduction	-1	0	0
Per-Year Asset Degradation (Inflation and Asset Deterioration)	70	72	80
Revised Beginning of Year DMAR	921	970	1,117
Annual Maintenance Requirement	457	526	530
Total Requirement	1378	1,496	1,647
Annual Maintenance Funding	407	410	388
End of Year Backlog	971	1,086	1,259
Backlog Reduction (Growth)	(43)	(115)	(173)
DMAR per Dwelling Unit (\$000)	8.8	9.9	11.5

Deterioration of the Air Force's aging housing inventory is accelerating. The total maintenance requirement reflected on this chart portrays only those projects which are required to meet and sustain approved standards. This chart reflects the decision to fund maintenance at the highest possible level to arrest DMAR growth. However, with current funding constraints DMAR continues to grow.

In a 20 June 1995 DoD Inspector General Quality of Life Survey, 73% of DoD-wide Installation Commanders expressed concern about Family Housing and its impact on personnel performing the mission on their installations. Family Housing received the highest ranked response at 73%, far outpacing the next highest concern which was 34% for Health Care. Within the Air Force, 91% of the Installation Commanders expressed concern for Family Housing and 82% placed Family Housing in their top three priorities for needing additional funding--above areas such as base facilities, recreation and services, income/cost of living adjustments, and even health care.

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

Consistent with Congressional concerns, the Air Force is actively pursuing means to reduce the Deferred Maintenance and Repair backlog. The Air Force's goal is to reduce end of year backlog to one year's normal recurring maintenance and repair of our dwellings to ensure availability of quarters which meet Air Force standards. The method we use to measure our effectiveness against these standards is to track the impact of the funded program against Deferred Maintenance and Repair. When funding is lower than maintenance requirements, asset deterioration accelerates. This current growth of maintenance costs is above inflation rates and increases the scope of future programmed work. Another impact from underfunded maintenance is an increase in the number of emergency repairs which are disruptive to occupants, costly, and manpower intensive. The backlog of unrepaired systems also generates other work (i.e., delayed roof projects require additional work to fix leaks, patch and paint ceilings, etc.) Current funding levels do not achieve the goal of reducing Deferred Maintenance and Repair.

The Air Force has initiated a whole-house/whole-neighborhood concept to determine total funding required to bring existing facilities up to new construction standards. This concept combines all improvements with required maintenance and repairs into one project, minimizing quarters downtime and disruption to residents for piece-meal work. The dollars in the revitalization program contribute to the reduction in Deferred Maintenance and Repair. However, if whole-house renovations are delayed for too long, emergency projects to fix specific systems (e.g. roof leaks) must be accomplished in the interim, driving up life-cycle costs.

Quality family housing has a great impact on the lives of our members and the readiness of our forces. It is for this reason that we believe the maintenance dollars the Air Force has programmed in this budget will have a payback far greater than that which can be measured in terms of average unit costs. Future budget increases to this account can only improve the quality of life for our airmen and their families.

This request reflects the decision to fund maintenance at a level which partially arrests Deferred Maintenance and Repair growth within funding constraints. Emphasis on timely maintenance and repairs is essential to ensure quarters are available for occupancy. Continually deferring such work increases the rate of deterioration, compounding the additional unfunded requirements in future years.

FAMILY HOUSING REPAIRS
(EXCEEDING \$15,000 THRESHOLD)

<u>Location</u>	<u>No</u> <u>Units</u>	<u>Year</u> <u>Built</u>	<u>High Unit</u> <u>Cost</u> (<u>\$000</u>)	<u>Unit</u> (<u>NSF</u>)	<u>Proj</u> (<u>NSF</u>)	<u>Total Cost</u> (<u>\$000</u>)	<u>Improvements</u> <u>Non-Routine</u> (<u>\$000 FY94-98</u>)
-----------------	---------------------------	-----------------------------	---	-------------------------------	-------------------------------	---------------------------------------	---

This information is provided to comply with the 1984 House Appropriations Committee language requiring the Services to report any expenditures for major maintenance and repair projected to exceed \$15,000 per unit.

The number of maintenance projects over this threshold have increased significantly over previous years which reflects a growing deterioration of the inventory and growing inflationary pressure on the threshold. This is primarily due to the growing number of units that are waiting for improvement and renovation with investment funding. Many have deteriorated to the point that they must be repaired to continue occupancy. Since over 60 percent of the average investment project includes major maintenance and repair actions, we can mitigate some of these problems through the O&M program. While these projects are shown as line items here, the maintenance budget estimate includes these problems among overall requirements for the entire inventory.

Inflation plays a role in driving repair costs beyond the \$15,000 threshold. Eventually relatively routine repairs will exceed the threshold if no upward adjustment to the threshold is made to account for inflation.

The following projects were submitted or notified as above-threshold for 1997:

Offutt AFB, Nebraska

Narrative: Emergency structural repairs to five non-GOQ quarters to correct crumbling foundations and leaky basements forced the units above-threshold to approximately \$34,000 per unit.

Eielson AFB, Alaska

Kadena AB, Japan

Misawa AB, Japan

Langley AFB, Virginia

Seymour-Johnson AFB, North Carolina

Fairchild AFB, Washington

Narrative: The Air Force submitted a consolidated notification for units on these bases because of restorations due to damage from fire and steam leaks. The total cost of all projects was \$409,000.

-----------------	--------------------------	---------------------------	-----------------------------	--	--	---	---	--	--

This information is provided to comply with the 1984 House Appropriations Committee language requiring the Services to report any expenditures from the maintenance account for General or Flag Officer housing projected to exceed \$25,000 per unit.

The number of maintenance projects over this threshold have increased significantly over previous years which reflects a growing deterioration of the inventory and growing inflationary pressure on the threshold. This is primarily due to the growing number of units that are waiting for improvement and renovation with investment funding. Since over 60 percent of the average investment project includes major maintenance and repair actions, we can mitigate some of these problems through the O&M program. While these projects are shown as line items, the maintenance budget estimate includes these problems among overall requirements for the entire inventory.

As with the non-GOQ units exceeding the \$15,000 threshold, inflation plays a role in driving repair costs beyond the \$25,000 threshold. Eventually relatively routine repairs will exceed the specified thresholds if no upward adjustment to the threshold is made to account for inflation.

Each project described below includes all maintenance and repair, alterations, asbestos and lead based paint management/abatement and operations costs anticipated for FY99 to present a complete picture of the spending projected for the quarters.

Analysis of Changes in Reimbursements

The FY 1999 Budget Request differs from the FY 1998 Appropriated Amount due to a small increase in inventory and higher trailer park fees.

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

LEASING

Program (\$ in Thousands)

FY 1999 Program \$118,072

FY 1998 Program \$118,171

Purpose and Scope

Provides leasing of privately-owned housing for assignment as government quarters at both domestic and foreign locations when the local economy and on-base housing cannot satisfy requirements. The leasing program is authorized by 10 U.S.C. 2828 and provides for payment of rent, operations, and maintenance costs of privately-owned quarters for assignment as government quarters to military families. This program also includes funds needed to pay for services such as utilities and refuse collection when these services are not part of the contract agreement.

The Air Force continues to rely on the private sector to meet the majority of housing needs. Where the private sector rental markets and on-base housing cannot meet requirements and cost effective alternatives do not exist, short and long-term leases are used. The Air Force must use the leasing program in high cost areas and overseas to obtain adequate housing to meet critical needs.

Program Summary - Highlights

Authorization is requested for appropriation of \$118,071,000 to fund leases and related expenses in FY 1999. FY 1999 request for family housing leasing points is summarized as follows:

- (1) 9,201 Foreign lease points
- (2) 5,800 Section 801 lease points
- (3) 3,333 Domestic lease points

Foreign Leasing

Leasing in foreign countries is controlled by Congress. First by the number of lease points authorized, then by the review and approval of contract proposals, and finally by the funds appropriated. As overseas bases close, foreign leases are terminated as soon as economically possible. Air Force strategy during the drawdown in overseas areas is to maximize the use of government-controlled assets, thereby providing more affordable housing for our personnel and avoiding expensive off-base housing entitlements. The Air Force has been able to retain some housing areas from closing bases for use by families at nearby bases that are remaining. In fact, the percentage of

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

personnel able to reside in government-controlled quarters has increased. As the Air Force has drawn down in Europe, the order of the release of housing assets has been, where possible, (1) private rentals (which are usually the most expensive), (2) Government Rental Housing Program and build-to-lease units, and (3) government owned. The exact mix of types of housing has depended upon available assets in each locality. Where possible the Air Force has made renewals of leases on a year-to-year basis to reduce costs by limiting termination liability. Full authorization is required to allow for sufficient flexibility during mission realignments to maximize cost effective solutions.

Section 801 Leasing

This program is helping to reduce our CONUS family housing deficit at bases where Air Force families are seriously affected by housing shortages and high housing costs.

In FY 1984, Congress authorized the testing of a new leasing program for U.S. installations in P.L. 98-115, Section 801. Subsequently, nine housing communities were constructed:

Eielson AFB, AK, 300 units and 366 units
Hanscom AFB, MA, 163 units
Goodfellow AFB, TX, 200 units
March AFB, CA, 200 units (base closed in FY 1996)
Summerfield Housing, MD 1242 units (828 Air Force funded,
414 Navy funded)
Travis AFB, CA 300 units
Ellsworth AFB, SD, 200 units and 828 units
Hurlburt AFB, FL, 300 units
Cannon AFB, NM, 350 units

Domestic Leasing

Domestic leasing provides temporary housing for Air Force families pending availability of permanent housing. For example, Domestic leasing near Shaw AFB and Moody AFB provided interim relief for military families after a hurricane destroyed Homestead AFB. Missions moved temporarily and families were in need of shelter. Also, affordable housing in high cost locations for recruiters is giving vital support. Congress has authorized leasing of domestic units (10 U.S.C. 2828) on a temporary basis to satisfy critical requirements until a permanent solution can be found or if more economical than construction.

Exhibit FH-4A

HIGH COST domestic leases range between \$12k and \$14k per year.

* Adjusted cost cap for overseas leases is determined by multiplying \$20k times the FY 88 exchange rate divided by the FY 99 exchange rate. Leases exceeding this cap are defined as HIGH COST and are part of the number of high cost leases allowed.

** State Department pool leases do not count against the total number of high cost leases allowed.

DEPARTMENT OF THE AIR FORCE
MILITARY FAMILY HOUSING
FISCAL YEAR 1999 BUDGET REQUEST

FY 1999 DEBT PAYMENT

Program (in Thousands)
FY 1999 Program \$32
FY 1998 Program \$31

Purpose and Scope

The Debt Payment program continues in name only, as the last of the Capehart and Wherry mortgages were liquidated in FY 1989. This program includes payment of Servicemen's Mortgage Insurance Premiums to FHA for mortgages assumed by active military personnel prior to FY 1980.

Program Summary - Highlights

Request authorization for the appropriation of \$32,000 for FY 1999. No additional budget authority is required for mortgages as noted above.

Servicemen's Mortgage Insurance Premiums

Servicemen's Mortgage Insurance Premiums, Section 124, Public Law 560, 83rd Congress, The Housing Act of 1954, aids in providing homes for members of the Armed Forces of the United States and their families through a system of FHA mortgage insurance, specially designed to assist such members in financing the construction or purchase of homes.

This program was discontinued through Public Law 93-130 (Military Construction Appropriation Act, 1980) which allowed coverage only on existing mortgages covered prior to FY 1980. The amount needed to continue funding premiums on mortgages existing prior to FY 1980 continues to slowly decrease, adjusted for inflation. The program for FY 1999 is as follows:

<u>Fiscal Year</u>	<u>Number</u>	<u>Average Payment/Yr</u>	<u>Amount(\$000)</u>
1999	165	\$182	\$32
