APPROPRIATION LANGUAGE

PROCUREMENT OF AMMUNITION, AIR FORCE

For construction, procurement, production, and modification of ammunition, and accessories therefore; specialized equipment and training devices; expansion of public and private plants, including ammunition facilities authorized by section 2854 of title 10, United States Code, and the land necessary therefore, for the foregoing purposes, and such lands and interests therein, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes, \$1,072,749,000 to remain available for obligation until September 30, 2009.

APPROP CODE/BA: PAAF/MUNITIONS & RELATED EQUIPMENT	P-1 NOMENCLATURE: ROCKETS (OVERVIEW)
--	--

		FY2005	FY2006	FY2007	FY2008	FY2009	FY2010	FY2011
QUANTITY								
COST <small>(in Thousands)</small>		\$34,398	\$35,815	\$58,671	\$65,561	\$66,690	\$54,538	\$62,615

Description:

1. The Air Force primarily uses rockets to mark target locations for other aircraft during combat and training operations. Rockets constitute the primary target marking munition used by forward air control aircraft, which launch this munition from reusable pods carried on aircraft pylons. The 2.75-inch diameter rocket with folding fins utilizes high explosive, white phosphorous, or target practice warheads, and is fired from either high or low speed aircraft. Three versions of the 2.75-inch rocket motor are in use: MK 4, MK 40, and MK 66.

2. Items procured in FY07 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

Description:

1. This rocket provides realistic training for pilots to practice evasive maneuvers against Surface-to-Air Missile (SAM) threats. It provides pilots a visual reference simulating an actual SAM launch, while maintaining a safe and realistic environment to hone combat skills.
2. Funding increase in FY07 is due to increased training expenditures.
3. This item is procured through the Single Manager for Conventional Ammunition (SMCA).
4. Items requested in FY07 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical munitions/equipment needed to support current Air Force mission requirements.

COST <small>(in Thousands)</small>		\$0	\$6,796	\$19,280	\$33,852	\$31,466	\$22,895	\$31,007

Description:

1. The 2.75 inch White Phosphorous (H855) warhead mates to the 2.75 inch Rocket Motor (HA07) and deploys a white smoke to mark targets. This smoke marking can be used as a single point reference or an area marker (e.g. marking an area where bombing can go no further north).
2. Except for FY04 funding used to procure first article test units, this item has not been procured for ten years. In FY05, when attempting to restart the production process the manufacturer experienced technical problems. These problems are resolved, and we are on track for full production.
3. Due to stockpile depletion funding increases are essential to replenish the stockpile.
4. This item is procured through the Single Manager for Conventional Ammunition (SMCA).
5. Items requested in FY07 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force mission requirements.

Description:

1. The 2.75 inch Rocket Flare (HA06), used with the 2.75 inch Rocket Motor (HA07), provides forward air control aircraft with target illumination capability from a standoff distance in a hostile environment. The 2.75 inch Rocket Flare (HA06) consists of an ignition system, flare main parachute, drogue parachute assembly, and an integral fuze/delay assembly. Enclosed in an aluminum case, the fuze and candle igniter are armed by rocket motor acceleration. The candle, when actuated, is suspended from the main chute.

2. This item is procured through the Single Manager for Conventional Ammunition (SMCA).

3. Items requested in FY07 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical munitions/equipment needed to support current Air Force mission requirements.

COST (in Thousands)		\$13,363	\$6,105	\$19,000	\$19,000	\$19,000	\$19,000	\$19,000

Description:

1. The 20 MM target practice (TP) round is used for air-to-air and air-to-ground training in the M61 aircraft gun on F-15 and F-16 aircraft. The Air Force procures various links, linking methods, and mixtures of target practice and target practice tracer ammunition depending on the specific requirement of the system and the training program. The cartridge is electrically primed and has no fuze. The 20MM projectile is a solid slug sized to match the ballistics of the 20MM combat round. The 20MM cartridge is the primary ammunition used in aircraft gun systems by the Air Force and Navy. The Air Force procures the PGU-27 TP round to provide a training capability to complement the PGU-28 high explosive incendiary combat round and ensure training is consistent with combat operations.

2. Funding increase in FY07 and beyond is due to increased requirements.

3. This item is procured through the Army Single Manager for Conventional Ammunition (SMCA) and Engineering Support Costs are provided to the Navy.

4. Representative items requested in FY07 are identified on the following P-5. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force mission requirements.

Description:

1. The 20MM Penetrator with Enhanced Lateral Efficiency (PELE) is a cartridge with a steel walled projectile, containing a plastic core. Upon impact with the target, the plastic core is compressed causing the steel case to burst into fragments. It is designed for use in the F-15 and F-16 aircraft's M61 gun systems against aircraft and light material targets . The round's ballistics are compatible with current fighter computer systems.
2. The engineering effort for this program was funded in FY04 under PEC 28030, War Reserve Material - Ammunition. The program contract was issued in Jan 2004. These rounds were purchased through Alliant Techsystems (ATK) and the manufacturer of the projectile was Diehl.
3. This item is procured through the Ogden Air Logistics Center.
4. Representative items requested in FY07 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force mission requirements.

Remarks:

Cost information is in actual dollars.

(1) Contract is a split award with an FY04 base year and one option year.

(2) The FY06 appropriation will be competitively bid within the National Technology and Industrial Base. The Air Force is transitioning from the current concept of using two different Technical Data Packages (TDP) to requiring all manufacturers to produce from a single TDP. Engineering issues delayed completion of the TDP. The TDP issue has been resolved, and the FY06 contract is expected to award in Jun 06. The contract will have an FY06 base year with four option years.

BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)	DATE: FEBRUARY 2006
---	----------------------------

APPROP CODE/BA: PAAF/MUNITIONS & RELATED EQUIPMENT	P-1 NOMENCLATURE: CARTRIDGES (RR-188 CHAFF - 3W37)
--	--

		FY2005	FY2006	FY2007	FY2008	FY2009	FY2010	FY2011
QUANTITY								
COST (in Thousands)		\$10,690	\$6,312	\$4,132	\$5,690	\$5,351	\$6,054	\$6,773

Description:

1. The RR-188 chaff cartridge contains a payload of chaff that is dispensed during flight to meet aircrew training requirements. The functional characteristics are similar to RR-170 and RR-180 chaff countermeasures cartridges used in combat situations, however, the use of RR-170 and RR-180 chaff for training is severely limited by Federal Aviation Administration (FAA) regulations due to interference with air traffic control radar. The RR-188 provides the necessary alternative for realistic combat aircrew training since it does not interfere with radar.

2. Like the combat chaff cartridges, the RR-188 fits into a multiple cartridge magazine (MJU-11 or MJU-15) used in any of the ALE-40 series flare/chaff dispensing systems on several types of aircraft. The chaff cartridge contains no explosive or incendiary components when the impulse cartridge is not installed.

3. This item is procured through the Navy. All prices are provided by the Navy.

4. Items requested in FY07 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force mission requirements.

		FY2005	FY2006	FY2007	FY2008	FY2009	FY2010	FY2011
QUANTITY								
COST (in Thousands)		\$1,140	\$4,995	\$5,420	\$0	\$0	\$0	\$0

Description:

1. The RR-196 chaff cartridge consists of a two-chamber square plastic tube case which contains two separate chaff payloads that are dispensed during flight to disrupt RADAR, and RADAR guided weapons. Each of the two separate chaff payloads are wrapped into three different bundles to delay chaff separation during ejection from the F-22 aircraft. It is currently only used on the F-22 aircraft.
2. Requirements for this item were recently identified. Requirements for FY08 and beyond will be identified in the FY08 President's Budget.
3. This item is procured through the Ogden Air Logistics Center.
4. Items requested in FY07 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force mission requirements.

Description:

1. The General Purpose (GP) Bombs category includes all high explosive air delivered bombs and associated fins and guidance kits. The warfighter delivers these munitions via fighter or bomber aircraft in support of both training and wartime contingency taskings. GP Bombs can be used as either unguided weapons or as guided munitions after the installation of a guidance and control kit.

2. In FY06, General Purpose Bombs received a \$4,300,000 Congressional add in the FY06 Appropriations Conference Report 109-359 (dated 18 December 2005).

3. Items requested in FY07 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

Description:

1. The MK-84 is a 2,000-pound class general purpose bomb. The bomb produces blast and fragmentation effects and can be used as either an unguided high or low drag weapon. When used with a guidance kit, it can be employed as a precision guided bomb. The warhead is used on the Paveway II, Paveway III, GBU-15, and Joint Direct Attack Munition weapon systems. The MK-84 can also be fuzed with proximity, instantaneous, or delayed fuzes to provide a variety of military effects.

2. Items requested in FY07 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

3. This item is procured through the Single Manager for Conventional Ammunition (SMCA).

TOTALS:							\$65,845			\$71,663			\$41,859

Remarks:
Total Cost information is in thousands of dollars.

In accordance with the Air Force Insensitive Munitions (IM) Strategic Plan, 40% of the MK-84 2000 LB GP Bombs procured in FY06 and FY07 will be loaded assembled and packed with a new more expensive explosive fill, MNX-795, instead of TNT. The bomb bodies which will have the new explosive fill are also modified to be more insensitive to unplanned stimuli.

(1) Three percent more bomb bodies and lugs are procured to account for defects.
 (2) Quality assurance consists of funding for Army personnel to travel to production facilities.

QUANTITY								
COST (in Thousands)		\$7,297	\$11,758	\$11,913	\$0	\$0	\$0	\$0

Description:

1. The BLU-122 Bomb is used on the GBU-28 C/B Precision Guided Air-to-Surface weapon to form an improved 5000 lb BLU-113 penetrating warhead, with a new designator of BLU-122. It is used on the B-2 and F-15E aircraft weapon system platforms. The warhead provides deeper target penetration, increased lethality, and survivability with improved insensitive munitions characteristics. The new BLU-122, incorporated into the GBU-28 C/B, significantly enhances the Air Force's capability to destroy hardened targets.

2. Items requested in FY07 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

3. This item is procured through the Air Armament Center, Eglin AFB, FL.

Description:

1. The GBU-28C/B is a Precision Guided Air-to-Surface weapon that is a follow-on to the legacy GBU-28 B/B weapon. The guidance kit contains a guidance section, a set of aerodynamic control surfaces, a laser seeker, and the Global Positioning System/Inertial Measurement Unit (GPS/IMU). The tail kit is a set of fixed wings. The GBU-28C/B provides the B-2 and F-15E aircraft weapon system platforms with adverse weather combat capability by incorporating rapid GPS acquisition and stand-alone IMU guidance capabilities. The GBU-28C/B, coupled with the new BLU-122, significantly enhances the Air Force's capability to destroy hardened targets.

Description:

1. The GBU-10/12 Computer Control Group is a laser homing guidance unit used on the GBU-10 (MK-84 Warhead, 2000lb class) or GBU-12 (MK-82 Warhead, 500lb class) PAVEWAY II Laser Guided Bomb (LGB). The PAVEWAY II system has folding wings which open upon release for maneuverability and increased aircraft payload. These weapons are primarily used for precision bombing against hardened and non-hardened targets.
2. This item is procured through two different contractors. The item name has been changed from MAU-169H/B PAVEWAY II Guidance Control Unit to GBU-10/12 Computer Control Group, because the previous name designates only one of the contractor's product. Both products are identical in form, fit, and function.
3. Items requested in FY07 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.
4. This item is procured through the Ogden Air Logistics Center.

<p>Description:</p> <ol style="list-style-type: none"> 1. The MK-82 is a 500-pound class general purpose bomb. The bomb produces blast and fragmentation effects and can be used as either an unguided high or low drag weapon. When used with a guidance kit, it can be employed as a precision guided bomb. The warhead is used on Paveway II and Joint Direct Attack Munition weapon systems. The MK-82 can also be fuzed with proximity, instantaneous, or delayed fuzes to provide a variety of military effects. 2. Until now there has been a substantial inventory of this item that was initially purchased during the cold war. Due to steady depletion of this inventory, significantly increased procurement is essential. 3. This item is procured through the Single Manager for Conventional Ammunition (SMCA). <p>2. Items requested in FY07 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force requirements.</p>

Description:

1. The Sensor Fuzed Weapon (SFW) is a wide-area smart munition designed for use against moving and stationary vehicles. The SFW provides operational forces with the capability to achieve multiple kills per pass, in all weather conditions, day or night. The SFW (CBU-97) consists of a Tactical Munitions Dispenser (TMD) containing ten BLU-108 submunitions. Each submunition contains four warheads, a parachute assembly, altimeter, and rocket motor. The TMD opens after release from the delivery aircraft, dispensing the submunitions. The submunitions are slowed by parachute and oriented nose downward. After the parachute ejects, the rocket motor fires to launch the warheads. The warheads release in a horizontal trajectory and target activate using infrared and laser sensors contained in the warhead, firing a self-forging projectile into the target. SFW has a 99 percent self-destruct capability to reduce battlefield Unexploded Ordinance (UXO).

2. The SFW (CBU-97) is designated the CBU-105 when mated with the Wind Corrected Munitions Dispenser (WCMD); it is designated the CBU-115 when mated with the WCMD-Extended Range (WCMD-ER). The WCMD and WCMD-ER kits are procured separately for dispenser munitions to correct for wind-induced delivery errors. Configurations are produced to support USAF as well as Foreign Military Sales (FMS) inventory requirements.

Description:

1. The Joint Direct Attack Munition (JDAM) program is a joint Air Force/Navy program with the Air Force as the lead service. Designated ACAT 1C, this program upgrades the existing inventory of general purpose bombs (MK-84, BLU-109/B, MK-82 and MK-83) by integrating the bombs with a guidance kit consisting of a global positioning system aided inertial navigation system (GPS/INS). JDAM provides an accurate, adverse weather capability. JDAM is integrated with the B-52H, B-2A, B-1B, F-16C/D, F-14B/D, F/A-18A+/C/D/E/F, F-15E, AV-8B and F-22A aircraft. Follow-on integrations with the F-117A, A/OA-10, MQ-9 and F-35 are in progress.

2. FY07 (Lot 11) and subsequent JDAM Lots are Selective Availability Anti-Spoofing Module (SAASM) equipped. FY07 unit pricing is based on the baseline kit price. Based on the most critical operational requirements GPS anti-jam equipped JDAMs may be procured. Any GPS anti-jam JDAM procurement would reduce the total quantity buy due to increased cost for this increased capability. Additionally, FY07 includes funding to procure initial JDAM guidance and control kits for installation in JSTARS aircraft as part of the Affordable Moving Target Engagement (AMSTE) program.

3. Total Funding includes Seek Eagle.

		FY2005	FY2006	FY2007	FY2008	FY2009	FY2010	FY2011
QUANTITY		1,729	70	250	0	0	0	0
COST <small>(in Thousands)</small>		\$58,398	\$15,490	\$34,704	\$0	\$0	\$0	\$0

Description:

1. The combat-proven Wind Corrected Munitions Dispenser (WCMD) tail kit enables the Combat Air Forces to accurately employ tactical munitions dispenser (TMD) weapons from medium to high altitudes, in adverse weather, day or night. WCMD tail kits are fitted on the CBU-87 (Combined Effects Munition) and CBU-97 (Sensor Fuzed Weapon) TMDs to produce CBU-103 and CBU-105 weapons, respectively. The WCMD tail kit corrects for launch transients, ballistic errors, and wind drift to ensure the TMD is delivered to an accurate target dispense point.
2. Quantities reflected above do not match the P-1 exhibit, the quantities reflected on this document are actual. Due to database lock time constraints, the quantities reflected on the P-1 exhibit did not reflect the most recent contract award data.
3. The Wind Corrected Munitions Dispenser - Extended Range (WCMD-ER) pre-planned product improvement (P3I) effort adds a wing assembly and a WCMD GPS tail assembly to provide an accurate, standoff delivery capability for TMDs. The WCMD-ER P3I program was initiated in FY03 under PE 604600F. WCMD-ER will enable the Combat Air Forces to accurately deliver and employ Sensor Fuzed Weapons (SFWs) from a 35nm standoff range. WCMD-ER satisfies a Joint Capabilities Integration and Development System (JCIDs) validated requirement for an area standoff capability.
4. In FY06 WCMD-ER received a \$15.7 million Congressional add in the FY06 Appropriations Conference Report 109-359 (dated 18 December 2005)..

BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)	DATE: FEBRUARY 2006
---	----------------------------

APPROP CODE/BA: PAAF/MUNITIONS & RELATED EQUIPMENT	P-1 NOMENCLATURE: CAD/PAD
--	-------------------------------------

		FY2005	FY2006	FY2007	FY2008	FY2009	FY2010	FY2011
QUANTITY								
COST (in Thousands)		\$20,284	\$20,928	\$29,909	\$22,993	\$23,513	\$24,478	\$24,890

Description:

1. Cartridge Actuated Devices/Propellant Actuated Devices (CAD/PAD), such as gas generators, initiators, Shield Mild-Detonating Cord (SMDC), rocket motors, rocket catapults, etc., are used on aircraft fire suppression, emergency release and aircrew escape/ejection systems. These explosive devices have finite lives and are replaced during scheduled aircraft maintenance. Aircraft operational availability is directly impacted if replacement CAD/PAD assets are not available to meet these "time-change" requirements. Life support devices such as the Sea Water Activated Release System (SEWARS) and parachute release cartridges are essential to aircrew survival after ejection and are included in the CAD/PAD category.

2. Funding increase in FY07 is primarily due to the new requirement for the T-6 trainer aircraft CAD/PAD items.

3. Items requested in FY07 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force mission requirements.

Description:

1. Explosive Ordnance Disposal (EOD)/Civil Engineering Demolition Material, Tools and Equipment includes all explosives, explosive tools and related equipment to render unexploded ordnance safe. EOD items are used in deployment packages, base response assets and range clearance resources in support of peacetime and contingency operations. These items are certified for use by the Air Force Non-Nuclear Munitions Safety Board (NNMSB) and the Department of Defense Explosives Safety Board (DDESB).
2. In FY05, EOD received \$2,898,000 in additional funding under P.L. 109-13, the Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Tsunami Relief Act, 2005.
3. Items requested in FY07 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on the most critical equipment needed to support current Air Force mission requirements.

Description:

1. This budget line encompasses both new and on-going modification efforts for guided bomb and munitions systems. Permanent modifications consist of configuration changes to in-service systems and equipment which correct material/other deficiencies or add/delete capability. Safety modifications correct deficiencies which may create personnel, system or equipment hazards.

2. The FY07 funding request reflects estimated costs based on historical funding requirements and projected future requirements.

Description:

1. The MJU-7A/B is an infrared countermeasures flare used by F-15 and F-16 aircraft against heat seeking missiles. It is dispensed from ALE-40 countermeasure dispensers. The MJU-7A/B flare is a pyrotechnic candle that creates an infrared signature, acting as a decoy against heat seeking missiles. The flare candle is ejected from the dispenser by a small explosive cartridge (BBU-36/B Impulse Cartridge) contained in the flare case.
2. Items requested in FY07 are identified on the following P-5, and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.
3. This item is procured through the Single Manager for Conventional Ammunition (SMCA).

COST (in Thousands)		\$7,440	\$16,873	\$21,730	\$13,460	\$12,559	\$12,924	\$12,996

Description:

1. The M211 is a hermetically sealed aluminum case purged with nitrogen containing a payload of stacked special material elements which react to air. When deployed into the air stream, the special material reacts to emit an infrared signal to decoy infrared seeking missiles. This flare is required to provide the C-130 and A-10 aircraft and HH-53 and HH-60 helicopters protection against advanced air-to-air and surface-to-air infrared weapon systems.
2. Items requested in FY07 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical munitions/equipment needed to support current Air Force mission requirements.
3. This item is procured through the Armament Research Development and Engineering Center (ARDEC) at Picatinny Arsenal, NJ.

Description:

1. The M212 Multi-color Infrared Countermeasure Flare consists of an 8" x 1" x 1" aluminum case that possesses a receptacle for installation of an impulse cartridge. The M212 is then loaded into a MJU-11 multiple countermeasure magazine and installed into an AN-ALE-40 series countermeasure dispenser. The M212 countermeasure flare is deployed into the aircraft air stream and ignited by the hot gases and flame produced by the BBU-35 impulse cartridge. This flare is primarily used on C-130 aircraft. The M212 flare is designed to provide multi-spectrum infrared output and is used with M211 decoys and M206 flares as a cocktail mix to decoy advanced missile threats against the aircraft.
2. Funding increase in FY07 is due to the programmed production ramp up for this item.
3. Items requested in FY07 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force mission requirements.

Description:

1. The MJU-10/B is an infrared countermeasure flare used by A-10, F-15 and F-16 aircraft against heat seeking missiles. It is dispensed from the AN/ALE-45. This flare is approximately twice the size of the MJU-7/B Flare, which is used on F-15 and F-16 aircraft.
2. MJU-10/B Flare is used in a preemptive mode. As a result of the Global War on Terror, training and combat usage have increased dramatically over the last three years and drove a critical need for increased procurements.
3. Items requested in FY07 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical munitions/equipment needed to support current Air Force mission requirements.
4. This item is procured through the Single Manager for Conventional Ammunition (SMCA).

Description:

1. The MJU-47/B is an infrared countermeasure flare used on F-15 and F-16 fighter aircraft against heat seeking missiles. When used in conjunction with the MJU-48/B flare, the MJU-47/B provides effective defense against modern manpad threats. The flare payload consists of an infrared flare pellet contained in a flare housing with fins and nozzles, integral sequencing mechanism, and a plastic piston contained in an aluminum cartridge case. The forward end of the outer aluminum case contains a cup receptacle for the BBU-36/B impulse cartridge with a crimped/staked plastic end cap at the aft end.
2. Funding increase in FY07 is due to the programmed production ramp up for this item.
3. This item is procured through the Ogden Air Logistics Center.
4. Items requested in FY07 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on the most critical munitions/equipment needed to support current Air Force mission requirements.

<p>Description:</p> <ol style="list-style-type: none"> 1. The MJU-50/B is a pyrophoric decoy developed as an advanced infrared countermeasure to defeat advanced-technology missile threats. The MJU-50 is termed a "covert" decoy because of the low-level of visible light it emits during ignition and burn. This flare's light intensity minimizes aircraft exposure to enemy ground monitoring and attack, and does not blind a pilot wearing night vision goggles. The MJU-50 flare was developed for the C-130 and is used on A-10 aircraft and HH-53 and HH-60 helicopters. 2. This flare is used extensively in current combat operations to provide essential aircraft/aircrew protection. Operational usage increased dramatically over the last two years and drove a critical need for increased procurement. 3. This item is currently procured through the Ogden Air Logistics Center. 4. Items requested in FY07 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

COST <small>(in Thousands)</small>		\$16,396	\$6,372	\$8,262	\$9,625	\$9,335	\$9,776	\$11,073

Description:

1. The DSU-33C/B is a joint service doppler radar proximity sensor designed to provide airburst capability to warheads using the FMU-139A/B and FMU-152/B fuze. Airburst yields a significant increase in effectiveness for unitary warheads against surface targets such as Surface-to-Air Missiles and Anti-Aircraft Artillery. The DSU-33C/B incorporates several important operational improvements over the DSU-33A/B and DSU-33B/B. These improvements include compatibility with Joint Direct Attack Munition guided weapons, and M117 and MK-80 series general-purpose bombs. The DSU-33C/B also significantly expands the high altitude release capability for bomber attacks. In addition, the DSU-33C/B provides extended operational and service life, increased ruggedness and full compatibility with Navy weapons, and addresses parts obsolescence.

2. Items requested in FY07 are identified on the following P-5, and are representative of items to be procured. Items procured during execution may change based on critical munitions/equipment needed to support current Air Force mission requirements.

3. This item is procured through the Air Armament Center, Eglin AFB, Florida.

Description:

1. The FMU-152/B Joint Programmable Fuze (JPF) is a Joint AF/Navy multi-function unitary fuze developed and procured for the Joint Direct Attack Munition and other conventional inventory weapons. The Air Force is the lead service for procurement of the JPF. The FMU-152/B provides a highly reliable bomb fuze with multiple arm times, instantaneous and multiple short and long delay detonation times, hard target survivability, cockpit programmability, and increased service/shelf life. The JPF is compatible with MK-80 series guided and unguided bombs. It will replace or supplement FMU-139, FMU-143, FMU-124, and M904/M905 fuzes, and provide the next generation of fuzing capability for hard target, general purpose, and guided bombs.

2. Items requested in FY07 are identified on the following P-5, and are representative of items to be procured. Items procured during execution may change based on critical munitions/equipment needed to support current Air Force mission requirements.

3. This item is procured through the Air Armament Center, Eglin AFB, Florida.
