#### Description

FY2008 FY2009 FY2009 FY2009 GWOT OCOSR Bridge OCOSR (adj) \$0.00M \$600.00M \$0.00M \$600.00M

This FY09 Overseas Contingency Operations Supplemental Request (OCOSR) procures four (4) F-22A Raptor aircraft to include eight (8) Pratt & Whitney F-119 engines to replace losses of 1 F-15 Eagle and 3 F-16 Falcons and recapitalize with the latest fifth generation fighters. The original procurement amount of this request assumed Multi-Year Procurement (MYP) pricing, and did not include spares, support equipment, etc. Final cost for 4 aircraft is expected to exceed \$600M, but is dependent on the outcome of negotiations to support a Lot 10.

#### FY 2009 Program Justification

This FY09 OCO supplemental request procures (4) F-22A Raptor Aircraft to include (8) Pratt & Whitney F-119 engines to replace losses of 1 F-15 Eagle and 3 F-16 Falcons.

Liberty Project Aircraft (LPA) is a multi-role, medium altitude, manned aircraft system performing an intelligence, surveillance, and reconnaissance (ISR) role coupled with a target acquisition (TA) capability. LPA was initiated through the SECDEF-directed ISR Task Force to address the ever-increasing Combatant Commander's requirements to satisfy full motion video (FMV) capability shortfalls in the Global War on Terrorism. Capabilities to be integrated by the 645th Aeronautical Systems Group (AESG, a.k.a. BIG SAFARI Program Office) for Phase 1 (LPA #1 through #7) on the platforms of choice, the Hawker Beechcraft King Air 350 aircraft, include FMV line-of-sight (LOS) data link for Remote Operations Video Enhanced Receiver (ROVER) and One System Remote Video Terminal (OSRVT) receivers; limited SIGINT collection capability; and narrowband INMARSAT data link for beyond line-of-sight (BLOS) connectivity. Phase 2, LPA #8 and beyond (current FY09 procurement funding buys 24 aircraft for a total of 31 LPA), will have an enhanced FMV with laser designator capability; a more robust SIGINT capability; and a Ku-band data link for BLOS connectivity. Initial FY08 funding was provided via the SECDEF mandated ISR Reprogramming Initiative. ISR Task Force directed the Air Force to procure 37 MC-12W aircraft. Funding was received in FY08 & FY09 to procure 31 of the 37 required. This funding will be used to procure the last six airframes.

#### In Summary:

- + 7 C-12s in FY 2008 with PA-33
- + 24 C-12s in FY 2009 Base Appropriations
- + 6 C-12s in FY 2009 OCO

Grand Total of 37 additions to the fleet

#### FY 2009 Program Justification

Funds a quick turn solution to address USCENTCOM's critical capability shortfall in full motion video capable assets in their theater of operation supporting the Global War on Terrorism. FMV capable assets provides increased situational awareness and potentially a targeting solution for combat troops in contact.

#### **Description**

FY 2008 FY 2009 FY 2009 FY 2009 GWOT OCOSR Bridge OCOSR(Adj) \$313.962M \$195.858M \$87.642M \$195.858M

FY09 OCOSR Adj \$195.9M - Procures 10 additional MQ-9 Reaper aircraft, ground control stations, communications and support equipment, and spares, to rapidly expand Reaper combat air patrol capability to meet CENTCOM requirements. Maximizes FY09 aircraft production capacity at 24 aircraft (9 in the PB plus 15 in the OCOSR).

#### FY 2009 Program Justification

FY09 OCOSR procurement funding includes MQ-9 Reaper aircraft, sensors and weapon kits, mobile and fixed Ground Control Stations (GCS), Launch and Recovery GCS, Ground Communication Systems, production support, Ground Data Terminals (GDT), initial spares, Readiness Spares Packages (RSP), support equipment, and initial technical data/training.

FY 2009 FY07/08 GWOT SUPPLEMENTAL ADVANCED TARGETING POD FACT SHEET (Dollars in Millions)

PROJECT TITLE: Advanced Targeting Pod

MODELS OF AIRCRAFT APPLICABLE: F-16, F-15, F-15E, A-10, B-52, B-1

DESCRIPTION/JUSTIFICATION:

Advanced Targeting Pods (ATP) provide long-range target acquisition and expanded weapons delivery envelopes for greater aircraft survivability. ATPs feature Third Generation or better Forward Looking Infrared Sensor, charged coupled device TV, improved laser capability, laser spot tracker, infrared marker, and real-time data-transfer connectivity with the battlefield ground forces. Greater aircraft standoff, improved resolution, eye safe laser, higher system reliability, and smaller deployment footprint give ATPs a greater combat effectiveness across several mission areas, including suppression/destruction of enemy air defenses, precision attack interdiction, close air support, reconnaissance, and time-sensitive targeting. The video downlink upgrade to ATP provides ground forces improved combat effectiveness resulting in quicker kills with reduced collateral damage and fratricide.

EVAN Ded Jac

#### **Description**

| The U-2 aircraft provides global reconnaissance signals intelligence (SIGINT) and imagery intelligence (IMINT) data and photographs 24 hours a day, seven     |
|---|
| days a week in support of ACC's world-wide mission. On 20 Dec 05, the Air Force Transformation Flight Plan (PBD 720) identified the U-2 for early             |
| retirement. A High Altitude transition (HAT) Integrated Product Team (IPT) is now in place to synchronize U-2 retirement activity and annual budget           |
| requirements with RO-4 Global Hawk development and fielding progress in order to provide uninterrupted, high-altitude, ISR capabilities during the transition |

FY 2009 FY07/08 GWOT SUPPLEMENTAL

DARP FACT SHEET (Dollars in Millions)

PROJECT TITLE: DARP

MODELS OF AIRCRAFT APPLICABLE:
U-2

DESCRIPTION/JUSTIFICATION:

Procures critical spares and support equipment for U-2 Electro-Optical/Infrared (EO/IR) and SIGINT

sensors due to Vanishing Vendor Issues and Diminishing Manufacturing Suppliers (VVI/DMS). Increased overseas contingency ops-tempo is accelerating depletion of Remote Airborne Sensor (SIGINT sensor - RAS-1R) spares, support equipment, Senior Year Electro-optical Reconnaissance Sensor (SYERS) visible and IR focal planes and circuit card assemblies. Insufficient spares inventory to sustain operations results in

the inability to meet COCOM intelligence collection requirements.

PROJECTED FINANCIAL PLAN:

Appropriation: Aircraft Procurement, Air Force

CLC: F-16

03/06/2009

FY 2009 Overseas Contingency Operations Supplemental

Modification Title and No: F-16 Secure Line of Sight/Beyond Line of Sight (SLOS/BLOS) MN-GW105

Models of Aircraft Affected: F-16C Center: ASC - Wright Patterson AFB, OH PE 0207133F Team POWER

#### **Description/Justification**

FY 2008 FY 2009 FY 2009 FY 2009 GWOT OCOSR Bridge OCOSR(Adj) \$67.179\* \$63.2M - 0- \$63.2M

This modification replaces the existing AN/ARC-186 VHF only radio on F-16 aircraft with the AN/ARC-210 Warrior radio and any associated prerequisite Group A modifications to satisfy an FY06 CENTAF urgent operational need (UON). Hardware requirements vary among the different Blocks 30/40/50 due to existing hardware and configuration requirements. The F-16 needs a secure Line-of-Sight capability which is upgradeable to a secure beyond-line-of-sight (BLOS) communications capability to communicate with many rotary wing and ground maneuver units in the theater of operations. The Retrofit line will install an approved engineering change to move the fill port away from the engine inlet. The Retrofit Kits line will retrofit SLOS aircraft with BLOS capability. New Start notification letters were submitted to the Congressional Defense Committees for Blocks 40/50 aircraft, and FY07 funds were added by Congress as a Plus-up for Block 30 aircraft. FY09 OCOSR funds will be executed over the life of the appropriation and installations will occur in FY09 and FY10.

Aircraft Breakdown: Active 101, Reserve 17, ANG 104, Total 222

This line item funds modifications to the C-5 aircraft. The four engine C-5 carries outsized and heavy cargo (tanks, helicopters, etc.) between main operating bases. The aircraft routinely carries 73 troops and 36 standard 463-L pallets.

The FY09 OCOSR funds procurement and installation of the latest aircraft defensive systems (ADS) technology on C-5A models and the Large Aircraft Infrared Counter Measures (LAIRCM).

#### **Description/Justification**

FY 2008 FY 2009 FY 2009 FY 2009 **GWOT OCOSR** Bridge OCOSR(Adj) \$14.40M \$0.0M \$14.40M \$0.00M

FY2009 Overseas Contingency Operations Supplemental Request Justification:

Purpose of this modification is to procure and install the latest Aircraft Defensive System (ADS) technology on C-5A aircraft in order to reduce loss/damage of aircraft and loss of life from Man-Portable Air Defense Systems (MANPADSs), to fully use the C-5A in known threat environments, and to reduce stress on active duty mobility assets. The ADS consists of the AN/AAR-47 A(V)2 Missile Warning System (MWS) and an AN/ALE-47 CounterMeasures Dispensing System (CMDS) to detect and counter infrared MANPADS. The system is currently installed on 1 C-5A and 49 C-5B aircraft.

Aircraft Breakdown: Active 3, Reserve 25, ANG 33, Total 61

03/06/2009 FY 2009 Overseas Contingency Operations Supplemental

Modification Title and No: LAIRCM MN-GW043

Exhibit P3A Congressional Appropriation: Aircraft Procurement, Air Force CLC: C-5 Class P

Models of Aircraft Affected: C-5B/M Center: WRALC Robins AFB GA PE 0401134F Team MOBIL

### **Description/Justification**

| FY 2008 | FY 2009  | FY 2009 | FY 2009    |
|---------|----------|---------|------------|
| GWOT    | OCOSR    | Bridge  | OCOSR(Adj) |
| \$0.00M | \$90.40M | \$0.00M | \$90.40M   |

The current Large Aircraft InfraRed CounterMeasures (LAIRCM) system [AN/AAQ-24(V)] consists of ultra-violet (UV) missile warning sensors (MWS), Guardian Laser Transmitter Assemblies (GLTA), a colorless eye-safe multiband laser, Control Indicator Unit (CIU), a pair of repeaters, and a system processor to detect, track, and counter incoming IR missiles. FY09 includes \$90.4 of Overseas Contingency Operations Supplemental funding that will be used to procure and install 7 kits and provide support. Development for the LAIRCM equipped C-5B started in FY 05 and production started in FY 07. The C-5 LAIRCM system will incorporate the GLTA mini-turret and the AN/AAR-54 threat warning system. Current LAIRCM C-5 installations will be the GLTA mini-turret and Phase I MWS equipment.

Note: "Install Kits" contains Group A "Equipment" contrains Group B

Aircraft Breakdown: Active 7, Reserve, ANG, Total 7

FY 2009 Overseas Contingency Operations Supplemental Modification Title and No: LAIRCM MN-GW043

Exhibit P3A Congressional Appropriation: Aircraft Procurement, Air Force CLC: C-17 Class P

Models of Aircraft Affected: C-17 Center: ASC - Wright Patterson AFB, OH PE 0401134F Team MOBIL

### **Description/Justification**

FY 2008 FY 2009 FY 2009 FY 2009 GWOT OCOSR Bridge OCOSR(Adj) \$66.389M \$230.20M \$0.0M \$232.20M

The Large Aircraft Infrared Countermeasures (LAIRCM) system provides a significantly improved defensive capability for Air Force C-17s to counter the Infrared (IR) Man-Portable Air-Defense Systems (MANPADS) threat.

The FY09 Overseas Contingency Operations Supplemental will modify 22 C-17s with a full configuration of Guardian Laser Turret Assembly (GLTA) Turrets and Next Generation missile warning system. It will also upgrade 9 C-17s from the lite configuration (1 turret) to a full configuration (3 turrets) (Small Laser Turret Assembly [SLTA] to GLTA retrofit kits) and upgrade 9 aircraft with the Next Generation missile warning system.

Aircraft Breakdown: Active 22, Reserve, ANG, Total 22

Liberty Project Aircraft (LPA) is a multi-role, medium altitude, manned aircraft system performing an intelligence, surveillance, and reconnaissance (ISR) role coupled with a target acquisition (TA) capability. LPA was initiated through the SECDEF-directed ISR Task Force to address the ever-increasing Combatant Commander's requirements to satisfy full motion video (FMV) capability shortfalls in the Global War on Terrorism. Capabilities to be integrated by the 645th Aeronautical Systems Group (AESG, a.k.a. BIG SAFARI Program Office) for Phase 1 (LPA #1 through #7) on the platforms of choice, the Hawker Beechcraft King Air 350 aircraft, include FMV line-of-sight (LOS) data link for Remote Operations Video Enhanced Receiver (ROVER) and One System Remote Video Terminal (OSRVT) receivers; limited SIGINT collection capability; and narrowband INMARSAT data link for beyond line-of-sight (BLOS) connectivity. Phase 2, LPA #8 and beyond (current FY09 procurement funding buys 24 aircraft for a total of 31 LPA), will have an enhanced FMV with laser designator capability; a more robust SIGINT capability; and a Ku-band data link for BLOS connectivity. Initial FY08 funding was provided via the SECDEF mandated ISR Reprogramming Initiative. ISR Task Force directed the Air Force to procure 37 MC-12W aircraft. Funding was received in FY08 & FY09 to procure 31 of the 37 required.

#### In Summary:

- + 7 C-12s in FY 2008 with PA-33
- + 24 C-12s in FY 2009 Base Appropriations
- + 6 C-12s in FY 2009 OCO

Grand Total of 37 additions to the fleet

Aircraft Breakdown: Active 37, Reserve, ANG, Total 37

#### **Development Status**

645 AESG (BIG SAFARI Program Office) via L-3Communications (prime inegrating contractor for the Liberty Project Aircraft initiative) procured the first seven (LPA #1 through #7) high quality, previously owned King Air 350 aircraft off the open commercial market. \$21.5M required to retrofit LPA #1 throught LPA #7 IAW MC-12W Phase II configuration (add necessary SIGINT equipment). Remaining \$7.5M required to standardize cockpits in LPA #1 throught LPA #5 with Proline 21 "Glass" cockpit. This common configuration will minimize training and sustainment issues.

Liberty Project Aircraft (LPA) is a multi-role, medium altitude, manned aircraft system performing an intelligence, surveillance, and reconnaissance (ISR) role coupled with a target acquisition (TA) capability. LPA was initiated through the SECDEF-directed ISR Task Force to address the ever-increasing Combatant Commander's requirements to satisfy full motion video (FMV) capability shortfalls in the Global War on Terrorism. Capabilities to be integrated by the 645th Aeronautical Systems Group (AESG, a.k.a. BIG SAFARI Program Office) for Phase 1 (LPA #1 through #7) on the platforms of choice, the Hawker Beechcraft King Air 350 aircraft, include FMV line-of-sight (LOS) data link for Remote Operations Video Enhanced Receiver (ROVER) and One System Remote Video Terminal (OSRVT) receivers; limited SIGINT collection capability; and narrowband INMARSAT data link for beyond line-of-sight (BLOS) connectivity. Phase 2, LPA #8 and beyond (current FY09 procurement funding buys 24 aircraft for a total of 31 LPA), will have an enhanced FMV with laser designator capability; a more robust SIGINT capability; and a Ku-band data link for BLOS connectivity. Initial FY08 funding was provided via the SECDEF mandated ISR Reprogramming Initiative. ISR Task Force directed the Air Force to procure 37 MC-12W aircraft. Funding was received in FY08 & FY09 to procure 31 of the 37 required. This funding will be used to modify the last six airframes.

#### In Summary:

- + 7 C-12s in FY 2008 with PA-33
- + 24 C-12s in FY 2009 Base Appropriations
- + 6 C-12s in FY 2009 OCO

Grand Total of 37 additions to the fleet

Aircraft Breakdown: Active 37, Reserve, ANG, Total 37

#### Development Status

Initial funding only procured 31 of 37 aircraft required. The funding provided will populate/modify the C-12 aircraft with the mission systems required for a MC-12W. Capabilities added will be Full Motion Video (FMV), Signals intelligence (SIGINT), self protection system and Beyond Line of Sight (BLOS) communications.

This line item funds modifications to the C-130 aircraft. The four engine C-130 provides theater airlift and carries either 92 troops, 64 paratroopers, 74 litter patients, or 6 standard 463-L pallets. The modifications budgeted in the FY09 OCOSR are the Large Aircraft Infrared Counter Measures (LAIRCM), and four modifications for C-130 SENIOR SCOUT.

#### **Description/Justification**

FY 2008 FY 2009 FY 2009 FY 2009 **GWOT** OCOSR Bridge OCOSR(Adj) \$0.0M \$142.96M \$9.0M \$142.96M

The Large Aircraft Infrared Countermeasures (LAIRCM) system provides a significantly improved defensive capability for the Air Force C-130 aircraft to counter the IR Man-Portable Air-Defense Systems (MAN PADS) threat.

The current LAIRCM system consists of ultra-violet (UV) missile warning sensors, Small Laser Transmitter Assemblies (SLTA) containing an IR tracker and a laser, a Control Indicator Unit (CIU) and a system processor to detect, track and counter incoming IR missiles.

The FY 09 GWOT supplemental will provide:

C-130H Air National Guard (ANG) with 14 Group A and 7 Group B

H/M C-130 ANG aircraft with 2 Group A and 13 Group B

C-130H2 Air Force Reserve aircraft with 6 Group A and 3 Group B

Aircraft Breakdown: Active, Reserve 6, ANG 16, Total 22

#### **Description/Justification**

FY 2008 FY 2009 FY 2009 FY 2009 **GWOT OCOSR** Bridge OCOSR(Adj) \$0.0M \$17.12M \$0.0M \$17.12M

Senior Scout Wideband Reachback

SENIOR SCOUT provides capabilities to exploit and geolocate COMINT and ELINT Signals Of Interest (SOI) to air and ground component commanders. The SENIOR SCOUT system requires an upgrade to increase connectivity and data rates for real-time Reachback and dissemination of intelligence to national and tactical consumers. Currently only an extremely small percentage of SENIOR SCOUT collected data can be streamed off the aircraft into national databases for near realtime analysis. A SENIOR SCOUT mission will routinely amass gigabytes of valuable intelligence data. Oftentimes this data is not available to process for hours or even days following collection due to the limited bandwidth available. Efforts to remotely distribute data in real-time on existing datalinks have been hampered due to a dependence on commercially procured data transfer methods. The Ku Beyond Line of Sight (BLOS) SATCOM Datalink fulfills the requirement to stream SENIOR SCOUT data off the aircraft in near real-time so that critical intelligence can be disseminated, analyzed and fused to support combatant commanders tactical information needs.

Funding will enable SENIOR SCOUT to prosecute evolving SOIs that could possibly jeopardize supported US/Allied forces. SENIOR SCOUT is severely constrained in its ability to collect, process, and then disseminate the multitude of SOIs in the theater. This upgrade satisfies requirements for the real-time dissemination of critical intelligence to national consumers and tactical units in support of overseas contingency operations. The increase in total capability will allow for greater ability to disseminate critical information in the timeliest manner, in turn, reducing the time required by decision makers to complete the kill chain.

Senior Scout NTI GWOT

The SENIOR SCOUT shelters include special processing threads and collection receivers to exploit the Signals of Interest (SOIs) that are tactically relevant to the theater commanders in support of the overseas contingency operations. Adding and expanding the cross-cueing and geo-location capability with other national intelligence assets greatly enhances the collection capability. These threads and receivers are currently present in inadequate quantities to support the number and volume of simultaneous signals requested/required by COCOMs. Furthermore, this inadequacy is compounded by the fact new signals are being introduced at a rate of several per year.

Funding will enable US/Allied lives to be protected with improved SENIOR SCOUT overwatch. SENIOR SCOUT is severely constrained in its ability to collect and process the multitude of special SOIs in the theater. The ORCs installed on SENIOR SCOUT have saved numerous coalition lives from ambush and attack.

Senior Scout Shelter 1 Reconstitution

Models of Aircraft Affected: Multiple

The SENIOR SCOUT shelters and antenna arrays have sustained higher maintenance rates due to increased ops tempo. The increased demand for OCONUS deployments has greatly outstripped the ability to meet the COCOM's level of expectation. The effort provides additional support for unplanned reconstitution on the shelter housing the collection subsystems and the antenna arrays on Shelter #1 which is the oldest and most degraded of the three SENIOR SCOUT shelters.

Funding will enable SENIOR SCOUT to provide requested support to troops in contact, enabling areas of interest to get critical intelligence data. If not funded, SENIOR SCOUT will be unable to provide the requested additional support which will leave some areas of interest without critical intelligence and result in a lack of direct support to troops in contact. The 169th Intelligence Squadron and the SENIOR SCOUT shelter will not be able to continue to deploy at its present rate without conducting these reconstitution actions. These modification actions ensure successful SENIOR SCOUT mission execution.

FY 2008 FY 2009 FY 2009 FY 2009 GWOT OCOSR Bridge OCOSR(Adj) \$0.0M \$10.00M \$0.0M \$10.00M

Senior Scout Mission Crew Trainer

Models of Aircraft Affected: Multiple

SENIOR SCOUT is a low profile, reliable, low-cost tactical capsulated Signals Intelligence (SIGINT) system capable of being carried on any modified C-130H/H1/H2. However, it does not have a standalone mission crew trainer for Initial Qualification and Mission Qualification Training (IQT/MQT), Combat Mission Readiness (CMR) and Continuation Training (CT) per AFI 11-2 SENIOR SCOUT Volume 1. The SENIOR SCOUT program currently relies upon one of its three capsules to be configured as a trainer at the 169th Intelligence Squadron (169 IS) UT ANG to meet IQT/MQT, CMR and CT requirements. This causes severe operational and logistics inefficiencies and is contrary to CSAF direction for trainer systems, where all USAF weapon systems should have separate trainers that do not impact operational assets and the trainer systems should be Distributed Mission Operations (DMO) compliant.

Funding will enable SENIOR SCOUT mission crews to obtain necessary Ready Aircrew Training to prepare for GWOT operations without a dedicated simulator. The SENIOR SCOUT training program will have to continue to rely upon temporary training configuration of operational capsules. Further, SENIOR SCOUT will not be able to participate in DMO and mission crews will be unable to efficiently rehearse for overseas contingency operations to enhance COCOM capabilities to find and target the enemy. Failure to provide funds leaves COCOMs vulnerable and unprepared to target evolving overseas contingency operations target set.

| GWOT      | OCOSR   | Bridge  | OCOSR(Adj) |
| \$36.861M | \$6.250 | \$0.0M  | \$6.250    |

RC-135V/W RIVET JOINT Baseline 8 and RC-135U COMBAT SENT Baseline 4 advanced aircraft electronic systems deploy to geographic operating areas where air temperatures typically exceed 140 degrees. Sufficient ground cooling is not currently available for these deployments. Existing military-procured units are ineffective in extreme heat conditions. Mission equipment repair and ground maintenance actions are either significantly impacted or not possible in-theater with the current military-procured units. This effort procures ten commercially available, off-the-shelf CAT units essential to operating these aircraft systems in their current OCOSR deployed locations.

Aircraft Breakdown: Active 10, Reserve 0, ANG 0, Total 10

### **Development Status**

These items are non-developmental and commercially available.

The Global Hawk System provides high altitude, deep look, long endurance intelligence, surveillance, and reconnaissance (ISR) capability that complements space and other airborne collectors during peacetime, crisis, and war-fighting scenarios. To facilitate unmanned access to airspace this funding will procure a ground based radar system.

These radars would enhance Air Force's ability to meet the increasing Overseas Contingency Operations (OCO), SOUTHCOM and NORTHCOM demand for Air Force and Navy Global Hawk crews. The Air Force has trained more than 200 AF and USN Global Hawk pilots for current operations. The current airborne Intelligence, Surveillance, and Reconnaissance (ISR) operations tempo is expected to increase over the next several months and years as we continue operations in US Central Command area of operations and expand operations in other areas of the world that require the kind of persistence, range and endurance that the Global Hawk provides.

The Air Force is currently training Global Hawk crews at Beale AFB on Temporary Flight Restrictions (TFR) basis. Current Federal Aviation Administration (FAA) TFRs limit Beale terminal operations to 16 hours per week. This is insufficient to maintain current crew proficiency, train additional crews for incressing requirements, and support increasing flight test activities with Block 20, 30, and 40 Globabl Hawks. DoD is executing a plan with the FAA to reduce TFRs with the use of three dimesional radar to provide increased situational awareness and separation functions while the Global Hawk transitions to positive controlled airspace. Procurement of these Ground Fused Radar Systems will meet the FAA performance requirements.

Aircraft Breakdown: Active 2, Reserve, ANG, Total 2

### **Development Status**

Development complete in use by the US Army in conjunction with the FAA.

The basic MQ-1 system consists of the aircraft, a control station, communications equipment, support equipment, Readiness Spares Packages (RSP), technical data/training, and personnel required to operate, maintain, and sustain the system. The system is designed to be modular and open-ended: mission-specific equipment is employed in a 'plug-and-play' mission kit concept allowing specific aircraft and control station configurations to be tailored to fit mission needs.

Both Predator and the MQ-9 Reaper conduct their missions through "Remote Split Operations" whereby a minimum number of operators and maintenance personnel are deployed forward for launch and recovery of the aircraft. After launch, the aircraft is "handed-off" to CONUS-based mission crews for actual mission prosecution. For this mode of operations, the command and control and full motion video (FMV) imagery data is currently relayed through a single forward communications site. This site is nearing capacity with the current increase in Predator operational tempo, plus is a single point of failure, the loss of which would severely impact all Predator operations in overseas contingency operations.

This project procures satellite terminals and video dissemination equipment to establish a second remote split operations relay site.

Aircraft Breakdown: Active 175, Reserve 0, ANG 0, Total 175

#### **Development Status**

MQ-1 Predator A is fielded and in full-rate production. This project support emerging requirements and reliability and maintainability issues.

# **Description/Justification**

FY 2008 FY 2009 FY 2009 FY 2009 GWOT OCOSR Bridge OCOSR(Adj) \$0.0M \$29.9M \$0.0M \$29.9M

The basic MQ-1 system consists of the aircraft, a control station, communications equipment, support equipment, Readiness Spares Packages (RSP), technical data/training, and personnel required to operate, maintain, and sustain the system. The system is designed to be modular and open-ended: mission-specific equipment is employed in a 'plug-and-play' mission kit concept allowing specific aircraft and control station configurations to be tailored to fit mission needs.

The MQ-1 Predator requires Predator Primary Data Link upgrades (which use Common Data link (CDL) format) to mitigate C-band congestion in theater; increase video quality, quantity of sensor data, and improve interoperability. MQ-1 also requires Target Location Accuracy (TLA) upgrades to provide geolocation to JDAM targeting accuracy as directed by USSTRATCOM, USCENTCOM, USSOCOM, and Air Combat Command.

This project procures Predator Primary Data Links for MQ-1 aircraft (\$18M), and Target Location Accuracy improvements to MQ-1 aircraft and Multi-spectral Targeting System sensors (\$11.9M).

FY 2009 Overseas Contingency Operations Supplemental

Models of Aircraft Affected: MO-9 for test bed; remainder TBD

Modification Title and No: AIRBORNE RECONN SYSTEMS MN-9136

Exhibit P3A Congressional Appropriation: Aircraft Procurement, Air Force CLC: MQ-9 Class P

Center: ASC - Wright Patterson AFB, OH PE 0305206F Team

**Description/Justification** 

Description/Justification

FY 2008 FY 2009 FY 2009 FY 2009 GWOT OCOSR Bridge OCOSR(Adj)

\$0.00M \$82.0M \$0.00M \$82.0M

Wide Area Airborne Surveillance (WAAS), a.k.a. Gorgon Stare, is a persistent day-night high resolution electro-optical/infra-red imagery sensor system that provides continuous broad area motion imagery to combat toops engaged in locating, mitigating, and defeating improvised explosive devices and insurgent activities.

NOTE: Work will be accomplished on the MO-9.

\$82M - FY09 OCOSR funds will procure up to 4 sensor suites, long-lead gimbals and pods, integrated IR and dewar camera assemblies, initial spares (sensors and TCDLs/CDLs), 3 ground inject points and 1 production integration lab, accelerating fielding by 12 months. Also includes spares and equipment to support integration and flight test.

Office of the Secretary of Defense (OSD) Program Decision Memorandum (PDM II, dated 19 Nov 07), directed the Air Force to develop a podded wide area airborne sensor suite to provide city-sized and similar broad area surveillance capability for the Combatant Commanders (COCOMs). The Joint Requirements Oversight Council Memorandum (JROCM 106-08, dated 27 May 08) approved the Air Force concept for a Wide Area Airborne Surveillance (WAAS) program plan to address Service requirements for wide area airborne sensors on existing manned and unmanned aircraft system platforms. FY09 OCOSR accelerates warfighter capabilities described above.

Aircraft Breakdown: Active 4, Reserve, ANG, Total 4

#### **Development Status**

Sensor suite and associated architecture are under development; potential manned/unmanned aircraft alternatives are operational.

# UNCLASSIFIED MODIFICATION OF AIRCRAFT

03/06/2009

FY 2009 Overseas Contingency Operations Supplemental Modification Title and No: MQ-9 PPDL Retrofits MN-GW101

Exhibit P3A Congressional Appropriation: Aircraft Procurement, Air Force Class P

CLC: MQ-9

Models of Aircraft Affected: MQ-9 Center: ASC PE 0205219F Team

# **Description/Justification**

| FY 2008 | FY 2009 | FY 2009 | FY 2009    |
|---------|---------|---------|------------|
| GWOT    | OCOSR   | Bridge  | OCOSR(Adj) |
| \$0.0M  | \$8.0M  | \$0.0M  | \$8.0M     |

# FY09 OCOSR

Modifies aircraft added in FY07 GWOT Supplemental Appropriation with Predator Primary Data Link (PPDL), which will ease C-band data link congestion at deployed locations.

Aircraft Breakdown: Active, Reserve, ANG, Total 0

# **Development Status**

PPDL is nearing completion of development and will begin fielding late in FY09.

# UNCLASSIFIED MODIFICATION OF AIRCRAFT

03/06/2009 FY 2009 Overseas Contingency Operations Supplemental

Modification Title and No: MQ-9 GCS Retrofits MN-GW103

Exhibit P3A Congressional Appropriation: Aircraft Procurement, Air Force CLC: MQ-9 Class P

Models of Aircraft Affected: MQ-9 PE 0205219F Team Center: ASC

# **Description/Justification**

| FY 2008 | FY 2009 | FY 2009 | FY 2009    |
|---------|---------|---------|------------|
| GWOT    | OCOSR   | Bridge  | OCOSR(Adj) |
| \$0.0M  | \$20.0M | \$20.0M | \$20.0M    |

# FY09 OCOSR

Modifies MQ-9 Reaper ground control stations (GCS) that had upgrades delayed due to high OPSTEMPO. Upgrades will include Lynx SAR improvement and advanced cockpit features to reach a common GCS configuration.

Aircraft Breakdown: Active, Reserve, ANG, Total 0

# **Development Status**

Development will be completed in FY08.

**BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)** DATE: MARCH2009 P-1 NOMENCLATURE: APPROPCODE/BA: ROCKETS (2.75 INCH ROCKET FLARE - HA06) PAAF/MUNITIONS & RELATED EQUIPMENT **FY2008 FY2007** FY2009 FY2010 FY2011 FY2012 FY2013 **QUANTITY** COST \$0 \$0 \$440 \$0 \$0 \$0 \$0 (in Thousands) **Description:** (Dollars in Thousands) FY 2009 FY 2009 FY 2009 FY 2008 **GWOT** OCOSR REQUEST **BRIDGE** OCOSR ADJUSTED \$440 \$440 FY09 OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST (OCOSR) BUDGET JUSTIFICATION: 1. The FY09 OCOSR Budget provides \$440K to replenish inventory used to support Operations Enduring Freedom and Iraqi Freedom. 2. The 2.75 inch Rocket Flare (HA06), used with the 2.75 inch Rocket Motor (HA07), provides forward air control aircraft with target illumination capability from a standoff distance in a hostile environment. The 2.75 inch Rocket Flare (HA06) consists of an ignition system, flare main parachute, drogue parachute assembly, and an integral fuze/delay assembly. Enclosed in an aluminum case, the fuze and candle igniter are armed by rocket motor acceleration. The candle, when actuated, is suspended from the main chute. 3. This item is procured through the Army by the Joint Attack Munitions Systems (JAMS), PEO Missiles and Space, Redstone Arsenal AL. P-1 ITEM NO **PAGENO:** Page 1 of 1 2 3

**BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)** DATE: MARCH2009 P-1 NOMENCLATURE: APPROPCODE/BA: GENERAL PURPOSE BOMBS (BLU-111 500 LB IM FILL) PAAF/MUNITIONS & RELATED EQUIPMENT FY2012 **FY2007 FY2008** FY2009 FY2010 FY2011 FY2013 **QUANTITY** COST \$0 \$0 \$6,756 \$0 \$0 \$0 \$0 (in Thousands) **Description:** (Dollars in Thousands) FY 2009 FY 2009 FY 2009 FY 2008 **OCOSR GWOT BRIDGE** OCOSR ADJUSTED \$6,756 \$6.756 FY09 OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST (OCOSR) BUDGET JUSTIFICATION: 1. The FY09 OCOSR Budget provides \$6,756K to replenish inventory used to support Operations Enduring Freedom and Iraqi Freedom. 2. The MK-82 is a 500 lb bomb that is relatively thin cased with a slender body designed for improved ballistics. MK82 bombs are employed as general purpose bombs delivered in high and low drag modes with ground burst, delayed or air burst fuzes and as precision guided munitions and aerial mines depending on the fin/airfoil group and fuzing. 3. This item is procured through the Single Manager for Conventional Ammunition (SMCA). P-1 ITEM NO **PAGENO:** Page 1 of 1 5 21

**BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)** DATE: MARCH2009 P-1 NOMENCLATURE: APPROPCODE/BA: GENERAL PURPOSE BOMBS (BLU-117, 2000 LB GP BOMB - ED02) OCOSR PAAF/MUNITIONS & RELATED EQUIPMENT **FY2007 FY2008** FY2009 FY2010 FY2011 FY2012 FY2013 **QUANTITY** 0 COST \$0 \$1,941 \$13,256 \$0 \$0 \$0 \$0 (in Thousands) **Description:** (Dollars in Thousands) FY 2009 FY 2009 FY 2009 FY 2008 **GWOT** OCOSR REQUEST **BRIDGE** OCOSR ADJUSTED \$1,941 \$13,256 \$13.256 FY09 OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST (OCOSR) BUDGET JUSTIFICATION: 1. The FY09 OCOSR Budget provides \$13,256K to replenish inventory used to support Operations Enduring Freedom and Iraqi Freedom. 2. The BLU-117 is a 2,000-pound class general purpose bomb Insensitive Munition (IM) filled and replaces the tritonal filled MK-84. The bomb produces blast and fragmentation effects and can be used as either an unguided high or low drag weapon. When used with a guidance kit, it can be employed as a precision guided bomb. The warhead is used on the Paveway II, Paveway III, GBU-15, and Joint Direct Attack Munition weapon systems. The BLU-117 can also be fuzed with proximity, instantaneous, or delayed fuzes to provide a variety of military effects. 3. This item is procured through the Single Manager for Conventional Ammunition (SMCA). P-1 ITEM NO **PAGENO:** Page 1 of 1 5 24

**BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)** DATE: MARCH2009 P-1 NOMENCLATURE: APPROPCODE/BA: GENERAL PURPOSE BOMBS (MXU-650 FIN ASSEMBLY) PAAF/MUNITIONS & RELATED EQUIPMENT **FY2008 FY2012 FY2007** FY2009 FY2010 FY2011 FY2013 **QUANTITY** COST \$0 \$1,473 \$5,420 \$0 \$0 \$0 \$0 (in Thousands) **Description:** (Dollars in Thousands) FY 2009 FY 2009 FY 2009 FY 2008 **GWOT** OCOSR REQUEST **BRIDGE** OCOSR ADJUSTED \$1,473 \$5,420 \$5,420 FY09 OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST (OCOSR) BUDGET JUSTIFICATION: 1. FY09 OCOSR Budget provides \$5,420K to replenish inventory used to support Operations Enduring Freedom and Iraqi Freedom. 2. The MXU-650 Fin Assembly consists of a tail fin and forward canards used on the GBU-12 (MK-82 Warhead, 500lb class) PAVEWAY II Laser Guided Bomb (LGB). The PAVEWAY II system has folding wings which open upon release for increased maneuverability. These weapons are primarily used for precision bombing against non-hardened targets. 3. This item is procured through the Ogden Air Logistics Center. P-1 ITEM NO **PAGENO:** Page 1 of 1 5 30

(Dollars in Thousands)

FY 2008 FY 2009 FY 2009 FY 2009

GWOT OCOSR REQUEST BRIDGE OCOSR ADJUSTED

\$12,066 \$85,400 -- \$85,400

#### FY09 OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST (OCOSR) BUDGET JUSTIFICATION:

- 1. FY09 OCOSR Budget provides \$85,400K to replenish inventory used to support Operations Enduring Freedom and Iraqi Freedom.
- 2. The Joint Direct Attack Munition (JDAM) program is a joint Air Force/Navy program with the Air Force as the lead service. Designated ACAT 1C, this program upgrades the existing inventory of general purpose bombs (MK-84, BLU-109/B, MK-82 and MK-83) by integrating the bombs with a field installed guidance kit using a global positioning system aided inertial navigation system (GPS/INS). JDAM provides an accurate, adverse weather capability. JDAM is integrated with the B-52H, B-2A, B-1B, F-16C/D, F-117, F/A-18A+/C/D/E/F, F-15E, AV-8B, A/OA-10 and F-22A aircraft. Integrations with the MQ-9 and F-35 are in progress.

**BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)** DATE: MARCH2009 P-1 NOMENCLATURE: APPROPCODE/BA: EXPLOSIVES ORDNANCE DISPOSAL (EOD) PAAF/MUNITIONS & RELATED EQUIPMENT **FY2007 FY2008** FY2009 FY2010 FY2011 FY2012 FY2013 **QUANTITY** COST \$3,000 \$0 \$3,000 \$0 \$0 \$0 \$0 (in Thousands) **Description:** (Dollars in Thousands) FY 2009 FY 2009 FY 2009 FY 2008 **GWOT** OCOSR REQUEST **BRIDGE** OCOSR ADJUSTED \$3,000 \$3,000 FY09 OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST (OCOSR) BUDGET JUSTIFICATION: 1. FY09 OCOSR Budget provides \$3,000K to procure the AN/PLT-4 Counter Radio Controlled Improvised Explosive (CREW) CITADEL Man-Portable Device, which is used by Explosive Ordnance Disposal personnel conducting responses in support of counter improvised explosive device missions in Operations Enduring Freedom and Iraqi Freedom. Operators require hands on training prior to actual combat employment. Ground demolition munitions and equipment enable war fighters to conduct offensive and defensive operations supporting the GWOT. Improvised explosive devices are the number one threat to U.S. and Coalition forces. 2. Explosive Ordnance Disposal (EOD)/Civil Engineering Demolition Material, Tools and Equipment includes all explosives and related equipment to render improvised and unexploded ordnance safe and provide for coalition forces and operator safety. EOD items are used in deployment packages and base response assets in support of peacetime and contingency operations. The Department of the Navy is the Single Service Manager for CREW equipment for ground support operations. P-1 ITEM NO **PAGENO:** Page 1 of 1 10 39

**BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)** DATE: MARCH2009 P-1 NOMENCLATURE: APPROPCODE/BA: FUZES (DSU-33D/B PROXIMITY SENSOR) PAAF/MUNITIONS & RELATED EQUIPMENT **FY2008 FY2007** FY2009 FY2010 FY2011 FY2012 FY2013 **QUANTITY** COST \$0 \$0 \$472 \$0 \$0 \$0 \$0 (in Thousands) **Description:** (Dollars in Thousands) FY 2009 FY 2009 FY 2009 FY 2008 **GWOT** OCOSR REQUEST **BRIDGE** OCOSR ADJUSTED \$472 \$472 FY09 OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST (OCOSR) BUDGET JUSTIFICATION: 1. The FY09 OCOSR Budget provides \$472K to replenish inventory used to support Operations Enduring Freedom and Iraqi Freedom. 2. The DSU-33D/B is a joint service Doppler radar proximity sensor designed to provide airburst capability to the Joint Direct Attack Munitions and general purpose bombs using the FMU-139 and FMU-152 fuzes. Airburst yields a significant increase in effectiveness for unitary warheads against surface targets such as surface-to air missiles and anti-aircraft artillery. The DSU-33D/B variant has the same form, fit and function of the DSU-33C/B. Like the DSU-33C/B, it incorporates surface mount technology, an improved Frequency Modulated Continuous Wave (FMCW) Doppler radar, and improved electronics while minimizing parts obsolescence issues. The DSU-33D/B variant is expected to begin production in FY08. It improves and corrects a set screw clearance issue between the bomb body set screw and the sensor housing. It has essentially the same fit, form and function as the DSU-33C/B. 3. This item is procured through the Air Armament Center, Eglin AFB, Florida. P-1 ITEM NO **PAGENO:** Page 1 of 1 15 44

#### **Description**

Hellfire is an air-to-ground missile system that provides precision-kill capability and has become a key weapon in the global war on Terrorism. Laser Hellfire uses semi-active laser terminal guidance. The latest variant provides for point target precision strike and is effective against countermeasures. The Hellfire missiles will be used by the MQ-1 and MQ-9 aircraft. Hellfire missiles will be procured through the Army's Redstone Arsenal. Prior to FY08, Hellfire missiles were procured under the Predator PE 0305219F.

#### FY 2009 Program Justification

\$57.416M procures 742 AGM-114(P) Hellfire missiles for MQ-1 Predator and MQ-9 Reaper. Procures missiles to meet increased requirement based on expanding Predator and Reaper demand in GWOT operations. Missiles will support both combat operations and increased training during Predator and Reaper fleet expansion. The standup of an Unmanned Aerial Systems (UAS) Weapons School necessitates the increase in the Hellfire inventory to accommodate required test and training. Congressionally-added pre-production Reapers are being rapidly deployed, but the Hellfire missiles were not procured to match this early deployment. The Hellfire missiles are used for test, training and operations. Quantities are based on current estimated price for purchase through the Army.

Tables of contents are provided for each of the budget activities at the appropriate tabs. The budget activities are as follows:

Vehicular Equipment Electronics & Telecommunications Equipment Other Base Maintenance and Support Equipment

#### **IDENTIFICATION CODES**

Code "A" - Line items of material which have been approved for Air Force service use.

Code "B" - Line items of material that have not been approved for Service use

#### **GLOSSARY**

#### Contract Method

ALLOT - Allotment

C - Competitive

DO - Delivery Order

FCA - Fund Cite Authorization

MIPR - Military Interdepartmental Purchase Request

OA - Obligation Authority

OPT - Option

OTH - Other

PO - Project Order

**REQN** - Requisition

SS - Sole Source

WP - Work Project

MIPR-OPT - Military Interdepartmental Purchase Request - Option

MIPR-C - Military Interdepartmental Purchase Request - Competitive

MIPR-SS - Military Interdepartmental Purchase Request - Sole Source

MIPR-OTH - Military Interdepartmental Purchase Request - Other

#### Contract Type

FP - Fixed Price

FFP - Firm Fixed Price

FPIS - Fixed Price Incentive with Successive Targets

FPAF - Fixed Price Award Fee

FPE - Fixed Price with Escalation

FPIF - Fixed Price Incentive Fee

CPAF - Cost Plus Award Fee

CPFF - Cost Plus Fixed Fee

CPIF - Cost Plus Incentive Fee

ID/IQ - Indefinite Delivery/Indefinite Quantity

M-5 (Yr 1) - Multiyear, 5 years (Yr 1)

M-5 (Yr 2) - Multiyear, 5 years (Yr 2)

M-5 (Yr 3) - Multiyear, 5 years (Yr 3)

M-5 (Yr 4) - Multiyear, 5 years (Yr 4)

M-5 (Yr 5) - Multiyear 5 years (Yr 5)

OTH - Other

#### Contracted By

11 WING - 11<sup>th</sup> Support Wing, Washington, DC

ACC - Air Combat Command, Langley AFB, VA

#### **Description:**

(Dollars in Thousands)

FY 2008 FY 2009 FY2009 FY2009 GWOT OCOSR BRIDGE OCOSR ADJUSTED \$3,439 \$1,544 -- \$1,544

This program procures a group of snow removal vehicles and commercial sweepers used on all airfield surfaces to remove snow and help prevent foreign object damage (FOD) to aircraft engines and tires. Snow removal equipment includes front mounted brooms, multi-purpose blowers, and plows. These vehicles provide critical mission support to airfield operations because fighter aircraft cannot land or take off with ice on the runway. Multi-purpose vacuum sweepers maintain airfields, roads, and grounds. Vacuum sweepers provide equally important support at all air bases due to the high cost of FOD and the potential for loss in FOD-related engine accidents.

These assets are critical to the Air Force mission. They are the primary players in maintaining safe usage of runways year round. The vital functions of these vehicles prevent the closing of airfields due to debris and/or snow & ice build up. The item types contained within this P-1 line are critical due to their direct support of Air Force unit deployments and engagement in contingency operations.

Vehicle Replacement Program provides various critical vehicles and ensures the warfighter is re-equipped with new and modernized replacement vehicles to sustain current OEF/OIF operational requirements. Current shortfalls severely impede sustainment efforts and the warfighters ability to carryout the OEF/OIF wartime mission in an efficient and effective manner. These critical shortages impact Logistic Readiness Squadrons, Civil Engineers, Aircraft Maintenance and Rapid Engineers Deployable Heavy Operational Repair Squadron Engineer units. Additionally, if funds are not provided the condition of the vehicle fleet

**AIR NATIONAL GUARD (ANG) CRYPTOLOGIC SUPPORT SITE (CSS) EQUIPMENT**: FY09 OCOSR Budget provides \$3.67M for upgrades to a testing range maintained by the SENIOR SCOUT program providing testbed enhancements for SENIOR SCOUT OCOSR operations. Funding specifically tests and rehearses OCOSR-driven Quick Reaction Capability installs and other cryptologic efforts in a controlled environment before employment in combat. This effort is in response to multiple OCOSR urgent need requests, and will be used by other DoD assets including RIVET JOINT. Funding for this effort is in program element 0503115F.

Additional classified information on this effort and the SENIOR SCOUT program is available upon request via separate coordination. For further information, please NGB/A2RP, phone 703-607-3056.

MQ-1/9 POINT-TO-POINT DATA LINK (PPDL): This effort will procure the necessary equipment for video and metadata dissemination over PPDL. FY09 OCOSR funds will procure commercial off-the-shelf (COTS) file servers, video servers, routers, switches, video processing equipment, communications equipment, and equipment racks to receive and process the upgraded feeds received from the aircraft and disseminate these feeds to the end users located world-wide. FY09 OCOSR funding will procure equipment for 1 site in US European Command and 1 site in US Pacific Command. This is a

### **Remarks:**

Cost information is in thousands of dollars.

- (1) To be executed by ANG contracting function in applicable state.
- (2) The contract award date is based on an assumed March 2009 appropriation date for FY09 OCOSR funds plus 90 days.

**BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)** DATE: MARCH2009 P-1 NOMENCLATURE: APPROPCODE/BA: NATIONAL AIRSPACE SYSTEM OPAF/ELECTRONIC AND TELECOMMUNICATIONS EQUIPMENT **FY2007 FY2008 FY2009** FY2010 FY2011 FY2012 FY2013 **QUANTITY** COST \$9,000 \$3,870 \$19,100 \$0 \$0 \$0 \$0 (in Thousands) **Description:** (Dollars in Thousands) FY 09 OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST (OCOSR) BUDGET JUSTIFICATION: FY 2008 FY 2009 FY 2009 FY 2009 **GWOT** OCOSR TOTAL **BRIDGE** OCOSR ADJUSTED \$3,870 \$19,100 \$19,100 **DEPLOYABLE RADAR APPROACH CONTROL (RAPCON)**: FY09 OCOSR funding procures one (1) Deployable RAPCON system that will include a deployable digital airport surveillance radar with associated displays, automation system, voice switch, radios, installation support, direct production support, security and flight certifications, and initial spares. The new system will begin the replacement of 17 low density/high demand AN/TPN-19 and AN/MPN-14K RAPCONs. Of the seven AN/TPN-19 systems which belong to the active duty forces, six are "Red" (not mission capable). The remaining system is "Amber" (partially mission capable) and currently deployed in theater. Of the ten AN/MPN-14K systems which belong to the ANG, five are "Red" and five are "Amber." FY09 OCOSR funding will be used to replace the "Amber" AN/TPN-19 in theater. In FY11, the Air Force will request funds to procure three systems (two for the active duty and one for the ANG). The remaining 13 systems will be requested in future President's Budgets. Funding for this effort is in program element 0305114F. P-1 ITEM NO **PAGENO:** Page 1 of 1 24 5

### **BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)** DATE: MARCH2009 P-1 NOMENCLATURE: APPROPCODE/BA: THEATER AIR CONTROL SYSTEM IMPROVEMENT OPAF/ELECTRONIC AND TELECOMMUNICATIONS EQUIPMENT **FY2007 FY2008 FY2009** FY2010 FY2011 FY2012 FY2013 **QUANTITY** COST \$14,800 \$0 \$4,540 \$0 \$0 \$0 \$0 (in Thousands) **Description:** (Dollars in Thousands) FY 09 OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST (OCOSR) BUDGET JUSTIFICATION: FY 2008 FY 2009 FY 2009 FY 2009 OCOSR ADJUSTED **GWOT OCOSR BRIDGE** \$4,540 \$4,540 PRECISION AERIAL DELIVERY SYSTEM (PADS): The Joint Precision Airdrop System (JPADS) is a collaborative effort with the Army, USMC and other agencies to provide the capability for direct delivery of cargo and equipment through high altitude precision airdrops. It will provide aviators the ability to accurately airdrop payloads (including supplies/equipment as well as personnel) to units in the field from altitudes beyond the reach of most surface to air weaponry. Components include, but are not limited to: Pressure Tolerant Disk Drive (PTDD) [includes solid state disk drives and pressure sealed disk drive]; UHF Dropsonde Receive Sub-system; Dropsonde; Precision-guided airdrop training systems; GPS Re-transmission Subsystem (GPS-RTS); engineering and technical support, and associated hardware warranties and software licenses. FY09 OCOSR funding will procure additional delivery vehicles (ultralight, 2K, and NavAid systems) for aircrew training and mission planners for OIF and OEF operations. It will also procure additional dropsondes and spare parts as well as onsite support and services in the CENTCOM AOR. It will enhance tactical airdrops and Combat Search and Rescue (CSAR) support to isolated personnel while reducing exposure to hostile arms fire. Funding for this effort is in program element 0208006F. P-1 ITEM NO **PAGENO:** Page 1 of 1 25 9

GWOT OCOSR TOTAL BRIDGE OCOSR ADJUSTED

\$27,919 \$20,000 -- \$20,000

The Base Information Infrastructure (BII) procurement line supports Air Force downward-directed corporate requirements from the Air Staff level. Currently BII funds the Combat Information Transport System (CITS) program, Network Management/Network Defense, Voice Switching Systems, Information Systems Security Program (ISSP), and Air Force Directory Services. The FY09 OCOSR requests only the CITS product family for the Air National Guard.

COMBAT INFORMATION TRANSPORT SYSTEM (CITS): CITS is the Air Force component of the National Information Infrastructure (NII) and the Defense Information Infrastructure (DII). CITS modernizes base/site information transport, management and protection capabilities by replacing maintenance-intensive equipment, replacing or upgrading existing voice switching systems, providing network management of information systems, increasing the capacity of saturated information transmission systems and providing information protection tools. This is the primary Air Force program to install complete, secure, fiber-optic and wireless infrastructure to mission-critical fixed-base facilities. This infrastructure ensures the warfighter and wing command center full access to real-time command and control (C2) information during contingencies. Lack of C2 access would severely limit reach-back capability supporting deployable push/pull information capability and impede proactive information protection countermeasures to support collaborative information exchange. Funding for this effort is in program element 0303112F.

### FY 09 OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST (OCOSR) BUDGET JUSTIFICATION:

FY 2008 FY 2009 FY 2009 FY 2009

GWOT OCOSR TOTAL BRIDGE OCOSR ADJUSTED

-- \$8,100 -- \$8,100

United States Central Command's (USCENTCOM) mission is to work with its national and international partners in promoting development and cooperation among nations, responding to crises, and deterring or defeating state and transnational aggression in order to establish regional security and stability across its entire Area of Responsibility (AOR).

### **OPERATION ENDURING FREEDOM**

FY09 OCOSR funding procures the initial command, control, communications, and computer (C4) capabilities for a new forward operating location. Two communications projects are required to bring this new location to initial operating capability. Funding for these efforts is in program element 0201131F.

- 1. **DEPLOYABLE Ku/Ka BAND EARTH TERMINAL (DKET):** this is a dual 4.8m Ku/Ka-band satellite communications (SATCOM) terminal capable of very high-speed data transfer via both military and/or commercial communications satellites. DKET provides the transmission path for critical communications in an austere environment.
- 2. **TECHNICAL CONTROL FACILITY**: A technical control facility serves as the gateway between the base communications network and satellite or

(Dollars in Thousands)

### FY 09 OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST (OCOSR) BUDGET JUSTIFICATION:

FY 2008 FY 2009 FY 2009 FY 2009

GWOT OCOSR TOTAL BRIDGE OCOSR ADJUSTED

AIR TRAFFIC CONTROL AND LANDING SYSTEMS (ATCALS): ATCALS is a combination of United States Air Force (USAF) ground facilities and equipment, both fixed and tactical, with associated avionics, personnel, and procedures that provide air traffic control to USAF/Department of Defense worldwide flying missions. The ATCALS line includes basic air navigation equipment that provide en route and terminal navigation control and separation, approach, departure, and landing guidance. ATCALS also provides equipment required to ensure interoperability with systems operated by the North Atlantic Treaty Organization, the US National Airspace System, and the International Civil Aviation Organization. The FY09 ATCALS OCOSR initiatives below provide tech refresh and supportability upgrades to key deployable Air Traffic Control and Landing Systems (ATCALS) all of which, due to continued long term deployments, have experienced accelerated wear and tear and put increased strain on the logistics support pipeline which was already being challenged by the age of the systems. FY09 OCOSR funding is needed to maintain a ready fleet of deployable Air Traffic and Control Systems.

MOD #09-AN/MPN-14K-01, "AN/MPN-14K RECONSTITUTION/TECH REFRESH": The Air National Guard operates the AN/MPN-14K Mobile Radar Approach Control System, designed to operate in austere forward locations. With only 10 systems in the ANG, the AN/MPN-14K is a low density/high demand asset and is in heavy operational use, driving the system availability to 67% vice the standard of 98%. The late-1960s technology is driving increased sustainment costs for the AN/MPN-14K due to the maintenance downtime and a lack of replacement parts because the obsolete equipment is no longer

### **INDIVIDUAL MODIFICATIONS (EXHIBIT P-3A)** DATE: MARCH2009 #09-MPN-14K-01, AN/MPN-14K Reconstitution/Tech Refresh - Mobile Modification Title and No: Models of System Affected: MPN-14K Radar Approach Control (MRAPCON) **Description/** With only 10 systems in the Air National Guard, the MPN-14K is a low density/high demand asset. As the system was initially procured in the late 1960s, sub-systems (shelters, displays, cabling, Justification: rotary joints) are becoming obsolete and maintenance intensive. System availability is averaging 67% vice the standard 98%. Reconstitution/tech refresh is required now as a replacement system is not expected until 2016 at the earliest. FY09 mods: 3 systems (3 ANG/0 active) **Development Status/Major** The MPN-14K is in the sustainment phase. **Development Milestones:** PY FY2007 **FY2008** FY2009 FY2010 FY2011 **TOTAL** FINANCIAL PLAN \$ (in Thousands) Cost Qty Cost Qty Cost Qty Cost Qty Cost Qty Cost Qty Cost Qtv RDT&E Ref. ### **BUDGET ITEM JUSTIFICATION (EXHIBIT P-40)** DATE: MARCH2009 P-1 NOMENCLATURE: APPROPCODE/BA: ITEMS LESS THAN \$5 MILLION (BASE SUPPORT EQUIP) OPAF/OTHER BASE MAINTENANCE AND SUPPORT EQUIPMENT **FY2007 FY2008 FY2009** FY2010 FY2011 FY2012 FY2013 **QUANTITY** COST \$36,213 \$20,000 (in Thousands) **Description:** Dollars in Thousands) FY2009 FY2009 FY 2008 FY 2009 **GWOT GWOT GWOT BRIDGE GWOT ADJUSTED** \$36,213 \$20,000 \$20,000 This request includes a \$20,000 restoral of FY08 GWOT supplemental funds sourced for the DOD ISR reprogramming action (FY 08-33 PA). FY2009 OVERSEAS CONTINGENCY OPEARATIONS SUPPLEMENTAL REQUEST JUSTIFICATION: The Items Less Than 5 Million P-1 line provides a wide variety of base support items with worldwide application. Examples include servicing platforms, aircraft arresting systems, electronic test stations, expandable and nonexpandable shelters, pipe bending machines, electronic test set groups, fuels operational readiness capability equipment, and heat treating furnaces. This equipment provides prime support for all base missions. Lack of funding for these equipment items limits maintenance capabilities, testing functions, antiterrorism/security missions, communications capabilities, flight operations, and the ability of Air Force units to meet deployment requirements. This equipment is used to support Air Expeditionary Forces in forward locations. Lack of high power generators (800 kilowatts) negatively impacts personnel support and aircraft flight line readiness in austere locations. P-1 ITEM NO **PAGENO:** Page 1 of 1 71 6
