## Description:

Passenger Carrying Vehicles includes the procurement of sedans, station wagons, law enforcement sedans, ambulances and buses. These vehicles are general in nature, but they fulfill unique and distinct needs commensurate with their design.

Sedans are available in compact, mid-size, and large, and are used to support a variety of functions and missions at all levels of the Air Force. A portion of these sedans is dedicated for use by the Office Special Investigation (OSI) and a portion is procured as chase cars used to support U-2 aircraft operations.

Station wagons are mid-sized vehicles which are primarily used to transport personnel and light cargo. They are mostly used in overseas locations and some high security areas located near missile installations. They are also used in the maintenance and flying operation areas to support aircraft sortie generation.

Law Enforcement Sedans (LE Sedans) come equipped with a heavy-duty component package for law enforcement and security missions. Security forces personnel use this type of vehicle for emergency response, traffic control, patrol duties, and base security operations

Ambulances include both bus ambulances and modular ambulances that are used for medical evacuation operations. The bus ambulance is a 44 passenger bus converted to accommodate massive patient transport for medical emergency situations and humanitarian/disaster relief operations. The modular models are standard commercial ambulances that are available in $4 \times 2$ and $4 \times 4$ configurations. They are used for the movement of patients under field conditions, aircraft crash rescue operations, and routine transportation of patients to and from medical facilities.

Buses include a variety of commercial vehicles that support a broad range of mass transit requirements. Bus sizes range from the 16 passenger shuttle bus to the 52 passenger bus. These vehicles support Air Education and Training Command (AETC) training units, Air Force band organizations, protocol offices, and several other missions.

Justification:
FY13 procurement dollars procures 28 vehicles in support of installation and unit mission requirements for Air Force personnel.
Items requested in FY13 are a continuing requirement, identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

Justification:
FY13 procurement dollars in the amount of $\$ 18.547 \mathrm{M}$ procures 130 vehicles in support of installation and unit mission requirements for Air Force personnel.
FY13 OCO dollars in the amount of $\$ 2.010 \mathrm{M}$ will procure the following:
$\$ .138$ four each (4) Truck Cargo w/o Winch, 2320-01-549-8577
\$1.872 12ea Truck Cargo w/Winch, 2320-01-549-8611
The Air Force has transferred 39 Basic Expeditionary Airfield Resources (BEAR) sets to Sister Services to support surge operations in Afghanistan (OEF).
 equipment needed to support current Air Force requirement.

ID Code (A=Service Ready, B=Not Service Ready) : A
Program Elements for Code B Items:
Other Related Program Elements:
Vehicle procurements enable the Civil Air Patrol to provide rapid deployment of emergency essential ground teams who are capable of providing critical communications and humanitarian support during national emergencies and disasters. CAPs vehicle fleet (all passenger vehicles) includes vans, sedans, trucks, and SUVs. Vehicle procurements are also a critical element in supporting CAP Cadet and Aerospace education programs as CAP encourages and develops by example the voluntary contribution of private citizens to the public welfare. Various types of vehicles are used to transport cadets and search \& rescue/disaster relief ground teams.

Items requested in FY13 are a continuing requirement, are identified on the following P-40A, and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current mission requirements.

(The following Resource Summary rows are for informational purposes only. The corresponding budget requests are documented elsewhere.)

## Description:

This vehicle group consists of pickup trucks, trailers, semi-trailers, tractors, vans, utility trucks, maintenance and facility vehicles essential to base, and flying operations. Assets are critical to the Air Force mission and essential in support of flight line operations (aircraft maintenance), depot maintenance, and component routing to depot back shops and airfield maintenance, as well as Air Base Civil Engineers performing base housing maintenance and repairs. These items are critical across the spectrum of functional users throughout the Air Force and provide multi-purpose capabilities. These vehicles also support mission needs for light to heavy cargo transport, as well as transportation for air/flight crew personnel. Cargo utility vehicles also provide heavy cargo movement and civil engineering and construction projects. Without the procurement of these replacement vehicles the Air Force will not have the ability to support broad spectrum Air Force operations. No individual procurement item in this category exceeds $\$ 5 \mathrm{M}$.

Program elements associated with this P-1 Line are: 0202834F, 0402834F, 0702834F, 0802834F

Justification:
FY13 procurement dollars in the amount of $\$ 1.699 \mathrm{M}$ procures 40 vehicles in support of installation and unit mission requirements for Air Force personnel.

| Exhibit P-40, Budget Item Justification Sheet: PB 2013 Air Force |  |  |  | Date: February 2012 |
| :---: | :---: | :---: | :---: | :---: |
| Appropriation / Budget Activity / Budget Sub Activity: 3080F : Other Procurement, Air Force / BA 2 : Vehicular + Utility Vehicles | Equipment / BSA 2 : Cargo | P-1 Line Item Nomenclature: <br> 4 - ITEMS LESS THAN \$5,000,000 (CARGO-UTILITY) |  |  |
| ID Code (A=Service Ready, B=Not Service Ready) : A Proser | Program Elements for Code B Items: $\quad$ Other Related Program Elements: |  |  |  |
| FY13 OCO dollars in the amount of \$2.572M procures the following: |  |  |  |  |
| \$.429K 18ea Trencher Trailers |  |  |  |  |
| \$1.658M 12ea Truck, Tractor 5T 6x6 |  |  |  |  |
| \$.485K 14ea Semi Trailers 25ft. 20T Low Bed |  |  |  |  |
| The Air Force has transferred 39 Basic Expeditionary Airfield Resources (BEAR) sets to Sister Services to support surge operations in Afghanistan (OEF). |  |  |  |  |
| FY13 OCO dollars in the amount of \$.103K procures three (3) cargo/utility vehicles for the ANG in support of OEF. High OPSTEMPO of this low supply/high demand asset is required to meet COCOM demand. |  |  |  |  |
| Items requested in FY13 are a continuing requirement; are identified on the following P-40A; and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force Mission Requirements. |  |  |  |  |

| Appropriation / Budget Activity / Budget Sub Activity: P-1 Line Item Nomenclature: <br> 3080F / BA 2 / BSA 3  | $5-$ SECURITY AND TACTICAL VEHICLES | Aggregated Item Name: |
| SECURITY AND TACTICAL VEHICLES |  |  | Remarks:

Unit costs for FY13 are assumed and are subject to change.
There are three additional variants to the basic M1165A1B3

1. Air Force Police variant (AFP) refers to the police variant, which is an M1165A1B3 with an Objective Gunner Protection Kit (OGPK) installed.

2. Air Force TAC-P/Communication Variant (AFC) refers to the communications/TAC-P variant which is configured to have all the necessary communication equipment installed.
(1) Guardian Angel Light Tactical Vehicle was previously justified in the FY11 PB P-1 Line: Items Less Than \$5M (Vehicles).
 MAJCOM, the MAJCOM vehicle requirements was moved to fund 75 vehicles under the M1165A1B3 AFP Variant HMMWV.

Previous P-DOC submission did not reflect the OGPK being procured seperately from the M1165A1B3 AFP Variant HMMWV. Due to recent administrative changes, we have been made necessary changes to show that the OGPK is in fact being procured seperately from the vehicle and has its own BPAC under the Master BPAC.

 Justification:

## Appropriation / Budget Activity / Budget Sub Activity:

3080F: Other Procurement, Air Force / BA 2 : Vehicular Equipment/ BSA 3 : Special Purpose Vehicles
ID Code (A=Service Ready, B=Not Service Ready) : A
Program Elements for Code B Items:
P-1 Line Item Nomenclature:
6 - ITEMS LESS THAN \$5,000,000 (SPECIAL PURPOSE)

Other Related Program Elements:

FY13 procurement dollars in the amount of $\$ 9.246 \mathrm{M}$ procures 74 vehicles in support of installation and unit mission requirements for Air Force personnel.
 support of OEF, home station requirement still exists in AMC.
 vehicles during OEF. High OPSTEMPO of this low supply/high demand asset is required to meet COCOM demand.
 equipment needed to support current Air Force Mission Requirements.

## Description:

FY12 funding totals include $\$ 1.662 \mathrm{M}$ request for Overseas Contingency Operations.
This P-1 line procures a variety of critical fire fighting and crash rescue vehicles. Vehicles typically include:

 required. This vehicle provides aircrew, passenger, weapons, and airframe fire protection at a crash site.
 involving high rise buildings and warehouse facilities.

 $\mathrm{P}-24$, but is used in urban areas.

The P-23 Crash Truck is a larger version of the P-19 ARFF truck and has a larger fire suppression capacity. It is primarily assigned at transport, bomber, depot, and cargo aircraft bases.
The P-26 Water Tanker Truck is a 4000-gallon resupply truck used to support the ARFF vehicles, fight wild land fires, and provide mutual assistance to communities.
 and is being relplaced by the P-29 Wild Land Truck.
 equipment access and improved storage compartments. This truck is assigned to the larger industrial bases.
Appropriation / Budget Activity / Budget Sub Activity:
3080F: Other Procurement, Air Force / BA 2 : Vehicular Equipment / BSA 4 : Fire
Fighting Equipment

## Description:

FY12 total includes $\$ .772 \mathrm{M}$ requested for Overseas Contingency Operations
 equipment critical to depot and base supply operations.

Program elements associated with this P-1 Line are: 0202834F, 0402834F, 0802834F.

 Justification:

| Exhibit P-40, Budget Item Justification Sheet: PB 2013 Air Force | Date: February 2012 |  |
| :--- | :--- | :--- |
| Appropriation / Budget Activity / Budget Sub Activity: | P-1 Line Item Nomenclature: |  |
| 3080 F : Other Procurement, Air Force / BA 2 : Vehicular Equipment / BSA 6 : Base | $9-$ RUNWAY SNOW REMOVAL AND CLEANING EQUIPMENT |  |
| Maintenance Support |  |  |

FY13 OCO dollars in the amount of $\$ .984 \mathrm{M}$ will procure one (1) Plow ( $3825014721944-\$ 416,750$ ) and one (1) Blower ( $3825014753778-\$ 567,250$ ) as replacement command assets lost to AFCENT in support
of Overseas Contingency Operations as home station requirement still exists for Air Mobility Command.

FY13 Procurement dollars procures 13 vehicles/items in support of installation and unit mission requirements for Air Force personnel. The items contained within this P-1 line are critical due to their direct support of the flying mission at Air Force bases worldwide.

Items requested in FY13 are a continuing requirement, are identified on the following P-40A, and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Description:

FY11 funding total includes $\$ .690 \mathrm{M}$ requested for Overseas Contingency Operations.

 Force units engaged in contingency operations.

Program elements associated with this P-1 line are: 0202834F, 0207227F, 0207430F, 0207589F, 0402834F, 0502834F, 0702834F, 0802834F
Note that the Guardian Angel Light Tactical Vehicle was reprogrammed in FY12 from Items Less Than \$5M line into Security Tactical Vehicle line and procurement total has been adjusted.

| Maintenance Support | CONSTRUCTION) |

| ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- |

Justification:
FY13 procurement dollars in the amount of $\$ 2.674 \mathrm{M}$ procures 23 vehicles in support of installation and unit mission requirements for Air Force personnel.
FY13 OCO dollars in the amount of $\$ 9.120 \mathrm{M}$ will procure the following:
\$3.6M 16ea Water Truck, 4x4, 1500G
\$2.7M 18ea Trencher
\$2.8M eight each (8) Sewer Pumper Trk, 2000G
The Air Force has transferred 39 Basic Expeditionary Airfield Resources (BEAR) sets to Sister Services to support surge operations in Afghanistan (OEF).
 equipment needed to support current Air Force mission requirements.

## Justification:

 support developing and operational space systems. Funding for this effort is in PE 0303140F.

 consumption by space programs the space crypto industry base is less than a dozen companies.

 average unit cost based on type/number of units planned for purchase is reported. Funding for this effort is in PE 0303140F.

| Appropriation / Budget Activity / Budget Sub Activity: | P-1 Line Item Nomenclature: |
| :--- | :--- |
| 3080F : Other Procurement, Air Force / BA 3: Electronics and Telecommunications | 12 - COMSEC EQUIPMENT |
| Equip / BSA 1 : Comm Security Equipment(Comsec) |  | Equip / BSA 1 : Comm Security Equipment(Comsec)

| ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- |

a. SECURE TELEPHONES: FY13 funds procure secure voice/data equipment in the Secure Communications Interoperability Protocol family of systems, which provide secure and non-secure voice and data in digital or analog mode.
b. COMSEC ACQUISITION REFORM (CAR): FY13 funding supports AF Major Commands that have emergency requirements for COMSEC equipment. The CAR program provides the Cryptologic Systems Division (CPSD) a wide range of products required for the protection of classified information. Products include DoD Type I COMSEC equipment and commercial cryptography products. Readily available equipment at CPSD enables a quick turnaround for customers requiring CCEP products.
c. PECULIAR SUPPORT EQUIPMENT: FY13 funding will be used to procure testing and support equipment used by the Information Assurance Technical Assistance Center (ITAC) personnel to provide life cycle engineering support to all AF users of COMSEC as part of CPSD's COMSEC sustainment mission as specified in AFI 33-201, Communications Security (COMSEC). This equipment will ensure that complete and timely COMSEC technical support is provided to our war fighters in support of their mission assignments.
 strategy ended in FY11 for the secure wireless access points, encryption devices, and monitoring equipment to eliminate unsecured wireless local area network at 35 installations.

 Internet Protocol networks.

 the tactical common data link are two of the systems employing these embedded devices.

 compromised by the adversary.

 bandwidth capability, and reprogrammability. NSA has issued classified instructions regarding the use of specific LEF devices.

 requirements laid out by Joint Vision (JV) 2020 and the Global Information Grid (GIG) Capstone Requirements Document (CRD). This is a FY13 New Start.

## Appropriation / Budget Activity / Budget Sub Activity:

3080F: Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 1 : Comm Security Equipment(Comsec)
ID Code (A=Service Ready, B=Not Service Ready) : A $\quad$ Program Elements for Code B Items:

## P-1 Line Item Nomenclature:

12 - COMSEC EQUIPMENT Other Related Program Elements:
bandwidths and processing speeds without increasing communication transient and information holding risk. Current CM programs will ensure modernized, secure communications capability to VINSON/ANDVT radios, the Identification Friend Foe (IFF) Mode 5 system, the Situation Awareness Data Link, a Remote ReKey system for multiple radar sites, several Nuclear Command and Control (NC2) networks, and all future satellite control systems and mission data downlinks. Current programs will replace/upgrade over 24,000 devices out of the Air Force's $200,000+$ crypto devices. Other potential programs are undergoing concept refinement and technology development under the auspices of this line of this PE in order to meet emerging requirements for space and unmanned systems COMSEC, as well as various enterprisewide technological upgrades mandated under the National Security Agency Policy \#3-9. Funding for this effort is in PE 0303140F.
 function replacement of legacy equipment with added crypto modernized capabilities and new algorithms.
(1) KG-3X DEVICES: FY13 funding not requested.
(2) KG-3X LOW RATE INITIAL PRODUCTION (LRIP): FY13 funding not requested.
(3) KG-3X INTERIM CONTRACT SUPPORT (ICS): FY13 funding not requested.
b. IDENTIFICATION FRIEND OR FOE (IFF) MODE 5 CRYPTO MODERNIZATION: This program developed and is procuring devices to encrypt/decrypt IFF Mode 4 and Mode 5 interrogator and transponder operations. These devices, built to Air Traffic Control Radar Beacon System (ATCRBS), IFF, Mark XIIA, System (AIMS) 04-900 Cryptographic Interface Standard, are integrated into all airborne platforms and ground radar applications to provide critical, immediate tactical aircraft identification data to ground and airborne systems. FY13 funding supports the continued procurement of the two primary devices, KIV-77 \& KIV-78 (required to outfit most of the USAF fleet) and a remote form factor for certain C2 AF aircraft:
(1) KIV-77 DEVICES: The KIV-77 is a cryptographic device developed by the USAF to integrate into the APX-119 IFF host box used in the majority of USAF aircraft and ground surveillance/control systems.
(2) KIV-78 DEVICES: The KIV-78 is a cryptographic device developed by the USAF in conjunction with Navy IFF Mode 5 upgrades for USAF F-16s and U.S. Navy/U.S. Marine Corps F/A-18s.
c. SPACE TELEMETRY, TRACKING, AND COMMANDING (TT\&C) CRYPTOGRAPHIC DEVICES:
(1) SPACE TELEMETRY, TRACKING, AND COMMANDING (TT\&C) CRYPTOGRAPHIC DEVICES: FY13 funding not requested.
(2) SPACE TELEMETRY, TRACKING, AND COMMANDING (TT\&C) CRYPTOGRAPHIC DEVICES INTERIM CONTRACTOR SUPPORT: FY13 funding supports minimal interim contract sustainment support as the KS-252 COMSEC modernization transitions to long term sustainment.
d. COMBAT KEY GENERATOR (CKG) (KOK-23) DEVICES:
(1) COMBAT KEY GENERATOR (CKG) (KOK-23) DEVICES: FY13 funding not requested.
(2) COMBAT KEY GENERATOR (CKG) (KOK-23) INTERIM CONTRACTOR SUPPORT (ICS) LABOR: FY13 funding not requested.
e. REMOTE REKEY (RRK) (CI-33) :
(1) REMOTE REKEY (RRK) (CI-33) DEVICES: The Remote ReKey (RRK) program is an element of the USAF CM Program designed to replace and upgrade aging, unsustainable cryptologic capability to remotely and securely rekey continental US radar sites. The RRK modernization program will include the current $\mathrm{Cl}-13$ capabilities, expand ability to store keying material and rekey other cryptographic devices, and add capability to key/rekey the new Mode 5 system.

| Appropriation / Budget Activity / Budget Sub Activity: |  |
| :--- | :--- |
| 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications | P-1 Line Item Nomenclature: |
| Equip / BSA 1 : Comm Security Equipment(Comsec) |  | Equip / BSA 1 : Comm Security Equipment(Comsec)

|  | ID Code ( $\mathrm{A}=$ Service Ready, $\mathrm{B}=$ Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- | :--- |

(2) REMOTE REKEY (RRK) (CI-33) DEVICES INTERIM CONTRACTOR SUPPORT (ICS): Logistics support is for the initial period of operation for the RRK system; that, includes material management, supply distribution, repair, and non-warranted depot maintenance functions for the RRK system. Also includes updates, as necessary, of the RRK delivered technical manuals, repair of non-warranted items, software management and maintenance.
f. VINSON/ANDVT CRYPTOGRAPHIC MODERNIZATION (VACM):
(1) VINSON/ANDVT CRYPTOGRAPHIC MODERNIZATION (VACM) COMPONENTS (ARC-234): The VINSON/ANDVT CRYPTOGRAPHIC MODERNIZATION (VACM) program is procuring crypto modules to update the base band input/output components of the ARC-234. This is a FY13 New Start.
(2) VINSON/ANDVT CRYPTOGRAPHIC MODERNIZATION (VACM) DEVICES LOW RATE INITIAL PRODUCTION (LRIP): The VINSON/ANDVT CRYPTOGRAPHIC MODERNIZATION (VACM) program is procuring LRIP units that are essential to production line testing to replace airborne, ground and mobile platforms. This is a FY13 New Start.
(3) VINSON/ANDVT CRYPTOGRAPHIC MODERNIZATION (VACM) INTERIM CONTRACTOR SUPPORT (ICS): Logistics support is required for the initial period of operation for the VACM device. For the purposes of this contract, ICS includes materiel management, supply distribution, repair, and non-warranted depot maintenance functions for the VACM device, technical manuals revisions, non-warranted repair items, software management and maintenance. This is a FY13 New Start.
g. PROGRAM MANAGEMENT ADMINISTRATION (PMA): Program management administration costs support management with engineering and technical expertise in support of development and procurement activities.
4. AIR FORCE ELECTRONIC KEY MANAGEMENT SYSTEM (AFEKMS) - AIR FORCE KEY MANAGEMENT INFRASTRUCTURE (AF KMI): The AFEKMS is a sustainment program that works in concert with the DoD EKMS Program to provide secure, flexible, and timely upgrades to cryptographic key generation, distribution, and management systems. AFEKMS sustains the current Electronic Key Management System and serves as the bridge to the full operational capability (FOC) of DoD KMI. The Air Force continues to purchase AF EKMS physical products required under the COMSEC Material Control System (CMCS). The AF's KMI implements the DoD's crypto key management infrastructure to provide secure, flexible, and timely upgrades to cryptographic key generation, distribution and management capabilities, and ensures the AF has a cryptographic modernized, net-centric, Global Information Grid compatible KMI. AF KMI procures products to replace equipment per National Security Agency (NSA) mandates and to field products that have been under previous year's development. Funding for this effort is in program element 0303140F.
a. TECHNICAL UPDATES: FY13 funding procures hardware and software products necessary to update the Tier 2 Net Key Servers, Tier 3 system data management devices (DMDs); and systems to maintain an audit trail for COMSEC materials.
b. KOV-21 CARDS \& REFRESH: FY13 funding procures KOV-21 cards, which are the crypto engine for the simple key loader. KOV-21 card's life expectancy is approximately $7-11$ years depending on use. Equipment technical refresh began in FY10 and continues incrementally through the FYDP until the Air Force Last Mile Load Element is fielded.
c. SIMPLE KEY LOADER (SKL) \& REFRESH: FY13 funding procures AN/PYQ-10 (C) SKL units which are controlled cryptographic items that are mission essential to help the AF load Crypto key into various platforms. SKLs replace the obsolete AN/CYZ-10 and SKLs that were fielded in prior years (end-of-life due to KOV-21 card). Disruption of the SKL delivery schedule could degrade and/or disrupt secure communications in the battlefield. Equipment technical refresh continues incrementally across the FYDP until the Air Force Last Mile Load Element is fielded.
d. KIK-30 REALLY SIMPLE KEY LOADER (RaSKL): FY13 funding not requested.
e. CLIENT WORKSTATIONS: FY13 funding procures client workstations (also known as Deliver Only Client Workstations) that provide connectivity to KMI to receive black key material wrapped for specific ECU delivery.
f. MANAGEMENT CLIENT: FY13 funding procures management clients (MGCs) for Tie II COMSEC/KOA accounts, some controlling authorities, and the pipeline and sparing requirements. The MGC is a high assurance platform required by NSA to interact with and connect to the KMI via the Advanced Key Processor (AKP) and the INE.

| Appropriation / Budget Activity / Budget Sub Activity: | P-1 Line Item Nomenclature: |
| :--- | :--- |
| 3080F : Other Procurement, Air Force / BA 3: Electronics and Telecommunications | 12 - COMSEC EQUIPMENT |
| Equip / BSA 1 : Comm Security Equipment(Comsec) |  |

| ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- |

g. ADVANCED KEY PROCESSOR: FY13 funding procures advanced key processors (AKPs). The AKP provides the capability to unwrap black keys, benign keys, and can generate any symmetric key. The AKP uses a modular architecture, so that capabilities can be included or omitted as necessary, to match the needs of the mission. The AKP will provide capabilities similar to those in the existing key processor (KP) used in EKMS but in a modernized form.
h. IN-LINE NETWORK ENCRYPTOR (INE): FY13 funding procures INEs (also known as the HAIPE device). The KMI architecture will use INE to ensure confidentiality of transactions and provides identification and authentication for KMI interactions \& security protection for the workstation
i. PROGRAM MANAGEMENT ADMINISTRATION (PMA): FY13 funding is for program support activities required for device production. PMA funding permits the System Program Office to discharge responsibilities to support the fielding and installation of new and developing capabilities. This includes the initial bed down and operability testing, technical interchange meetings, and events incident to fielding both hardware and software products, and maintaining configuration control of fielded products.
5. COMPUTER NETWORK SUPPORT: Computer network support provides defensive counter information capability to protect the AFNet and its associated computer systems, including software applications and sensitive operational information against unauthorized intrusion, corruption, and/or destruction. The 688th Information Operations Wing ( 688 IOW) enables information superiority by providing cyber capabilities through forensic analysis, innovation, modeling, testing, integration and training. Computer Network Support programs and initiatives to protect AF computers, provide application software assurance, and predict cyber threats to AF systems whether they are stand-alone, networked, telephone switches, or embedded in weapon systems. Funding for this effort is in PE 0303140F.
a. COMPUTER SECURITY ASSISTANCE PROGRAM (CSAP) COUNTERMEASURES: FY13 funding procures hardware/software necessary for vulnerability analysis, vulnerability identification, countermeasure development, and testing in an environment simulating the real-world operational environment. From combat operations to social media use, network bandwidth requirements continue to explode at unprecedented rates. This ever-increasing throughput adds unparalleled threats targeting AF cyber network systems. To keep pace with the threat, innovative solutions continuously require new versions of these capabilities. These capabilities provide daily support to multiple efforts including US Cyber Command and other Combatant Commanders; 24th Air Force: 624 Operations Center; 67 th Network Warfare Wing: 33 Network Warfare Squadron (NWS) (AFCERT) and 26 Network Operations Squadron (NOS); Air Force Network Integration Center, Defense Information Systems Agency, Air Force Office of Special Investigations, and other organizations and are integral to the successful performance of the 318 IOG mission. Continuous system revisions are required to remain current with technology. Without the CSAP system, the security of AF networks may be compromised due to inadequate facilities needed to innovate, to develop and test new intrusion detection signatures and investigate new technologies and architectures being integrated into AF networks.
6. PUBLIC KEY INFRASTRUCTURE (PKI): PKI provides services to support warfighter requirements. PKI provides the basic framework and services being put in place within DoD to ensure information systems security. It provides the capability to attach digital signatures to electronic documents for identity and to encrypt and decrypt electronic documents for secure transmission. PKI-enabled applications afford confidentiality and authentication services to communications and/or network transactions, as well as verification of the data integrity and non-repudiation of those transactions. PKI is one of a number of security solutions used to protect information and provide attributes to enable access to critical resources in the GIG, and is used concurrently with other solutions. Funding supports several different requirement areas to procure infrastructure equipment for the field in support of Deployable/Tactical PKI, SIPRNET PKI, Evolutionary PKI End User Equipment, Homeland Security Presidential Directive-12 (HSPD-12), and Enhanced Status Quo (ESQ). Funding for this effort is in PE 0303135F.
a. DEPLOYABLE/TACTICAL PKI: FY13 funding not requested.
b. SECURE INTERNET PROTOCOL ROUTED NETWORK (SIPRNET) PKI: FY13 funding not requested.
c. EVOLUTIONARY PKI END USER EQUIPMENT: The current Class 3 PKI token (DoD Common Access Card (CAC)) is undergoing a gradual evolution towards a higher assurance token. Additionally, Homeland Security Presidential Directive-12 (HSPD-12) mandates a common identification card across the Federal Government. Based on the HSPD-12 requirements the National Institute of Standards and Technology (NIST) developed Federal Information Processing Standard 201 (FIPS 201) which adds security requirements to the identification card. PKI-based authentication coupled with the hardware security afforded by smartcards enables a user to authenticate securely to a remote server. However, the security of the operation on the smartcard initiated by a PC is intimately dependent upon the integrity of the PC. Yet the PCs used to access sensitive USAF sites are too easily infected with malware. The use of the pin-pad reader eliminates the operations on the hosts systems, thus adding further security to the AF. FY13 funds will procure pin-pad smart readers for added security.

## Appropriation / Budget Activity / Budget Sub Activity:

3080F: Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 1 : Comm Security Equipment(Comsec)

## d. HOMELAND SECURITY PRESIDENTIAL DIRECTIVE-12(HSPD-12) \& ENHANCED STATUS QUO (ESQ): FY13 funding not requested.

 across directories and information stores of various networks, systems, and applications. AFDS eliminates the disparity of maintaining stove-piped systems and through the use of directory technology, alleviates latency associated with the sharing/replication of identity data attributes. AFDS supports delivery of an enterprise security service and backbone for AF networks (both in-garrison and tactical), by providing AF user credentials to the AF Network Enterprise and AF system applications. AFDS addresses challenges and enhances AF mission performance through seamless integrated access to the right information anywhere, anytime. AFDS leverages and provides a core meta-directory service that "joins" and synchronizes personal identity data attributes from authoritative AF and DoD repositories for use by all AF systems and applications. This effort transfers from the Base Information Infrastructure budget line for FY11+. FY13 funds will procure hardware, software, and support upgrades. Funding for this effort is in PE 0303135F.

Items requested in FY13 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

 awarded to Mykotronic, Torrance CA on 21 Dec 2007 and H98230-97-D-0092, Sypris Electronics
The footnote below applies to the following items: e. IN-LINE NETWORK ENCRYPTORS
 purchase orders through the Information Assurance Electronic Commerce
The footnote below applies to the following items: f. EMBEDDED ENCRYPTION DEVICES:
EMBEDDED ENCRYPTION: The Air Force places purchase orders through IDIQ contract managed by the National Security Agency for embedded encryption devices.
The footnote below applies to the following items: g . TELEMETRY ENCRYPTION/DECRYPTION DEVICES
TELEMETRY ENCRYPTION/DECRYPTION: The Air Force places purchase orders through IDIQ contract managed by the National Security Agency for telemetry encryption devices.
The footnote below applies to the following items: a. SECURE TELEPHONES:
 orders through the Information Assurance Electronic Commerce
The footnote below applies to the following items: b. COMSEC ACQUISITION REFORM (CAR):
COMSEC ACQUISITON REFORM (CAR): Unit costs vary because of different types/configurations of equipment be procured
The footnote below applies to the following items: c. PECULIAR SUPPORT EQUIPMENT:
PECULIAR SUPPORT EQUIPMENT: Various contracts are available through various vendors, to include the following: General Dynamics, Scottsdale, AZ; Spirent, Yorba Linda, CA; Rockwell Collins, Cedar Rapids, IA The footnote below applies to the following items: d . SECURE COMMUNICATIONS VOICE/DATA:
SECURE COMM/VOICE DATA: Contractor is General Dynamics, Scottsdale AZ, awarded by NSA.

## Remarks:

The footnote below applies to the following items: h. IN-LINE NETWORK ENCRYPTOR (INE):
 configuration for the KMI Management Client (MGC) workstation for AF COMSEC accounts.
The footnote below applies to the following items: b. KOV-21 CARDS \& REFRESH:
KOV-21 CARDS \& REFRESH: Purchases from a NSA master contract. Procurement office at Ft Meade, MD.
The footnote below applies to the following items: c. SIMPLE KEY LOADER (SKL) \& REFRESH:
SIMPLE KEY LOADER (SKL) \& REFRESH: Purchases from contract issued by CECOM Contracting Center, Fort Monmouth, NJ
The footnote below applies to the following items: d. KIK-30 REALLY SIMPLE KEY LOADER (RaSKL):
KIK-30 REALLY SIMPLE KEY LOADER: Purchased from NSA master contract. Procurement office at Ft Meade, MD.
The footnote below applies to the following items: f. MANAGEMENT CLIENT (MGC):

consolidates multiple networks and systems into an integrated GITA. The FY13 funds will also procure additional hardware for modernizing interactive courseware development labs, workstations supporting scenario based exercise training, and servers and network equipment needed to support software used in the field and combatant commands. Funding for this program is in program element 0804733 F .

Items requested in FY13 are identified on the following P-40A and are
representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

 upgrades while high tempo operations impose faster than normal system refresh rates. FY13 funding requested to continue development/support of the GPL. This effort is in PE 0207431F.

 throughout the USAFE area of responsibility. This effort is in PE 0207431F.

 funded in PE 0305146F.

 upgrades/licenses for IBS operational baseline critical components. Associated developmental funding is in PE 0603850F, Integrated Broadcast Service; this effort is funded in PE 0305179F.

IBS procurement efforts are focused in these following areas:

b. MULTI-AREA REMOTE SIMULATOR: This is an essential component of the IBS verification and validation process used to emulate multiple systems under operational conditions.
 procures the infrastructure for dynamic software library updates for multiple operating systems essential to broadcast operation.
 IBS support; net-centric support; product documentation; studies and analyses; and IBS Web Support.
e. PROGRAM OFFICE SUPPORT: Funds the government System Program Office.
f. CONTRACT SUPPORT: Funds the contractor systems engineering activities.

| :--- | :--- | :--- |

completion of disaster recovery capabilities for core services at the four ESCs by providing information recovery technology for Top Secret/Sensitive Compartmented Information level networks. Funds will be used to procure servers, storage devices, associated hardware upgrades, and installation costs. This is a MIP program in PE 0305192F.
6. AIR FORCE SPACE SURVEILLANCE SYSTEM (AFSSS): Prior to FY11 this program was included in the 'SPACE MODS SPACE' budget line under PE 0305940F. The system is now under PE 0305942F. The AFSSS includes both the Air Force Space Surveillance Fence and the Distributed Space Command and Control Dahlgren (DSC2-D). The AFSSS is a dedicated sensor within the Space Surveillance Network (SSN). The radar generates a radio frequency "fence" which can detect earth orbiting objects passing through it, out to 24,000+ kilometers. It provides this data to the Joint Space Operations Center ( JSpOC ) in support of the space surveillance mission. The DSC2-D serves as the operational backup to the primary JSpOC at Vandenberg AFB, CA. The AFSSS supports Air Force Space Command mission responsibilities for cataloging and maintenance of the catalog of satellite payloads and debris, New Foreign Launch orbit determination, and collision avoidance. The FY13 AFSSS modernization effort consists of modifications that replace unsupportable and unreliable system components to meet the anticipated sensor system end-of-life (EOL).

The AFSSS modernization effort scheduled for FY13 include:
a. AFSSS Transmitter/Receiver Subsystem Refresh: Continues modernization of the Transmitter Phase Monitoring and Control Equipment. This modernization project will field modern and sustainable precision transmitter signal generator and timing equipment, phase control and equipment status reporting. Procures and fields modification kits for two low power and one high power transmitter station in FY14. It also funds the build, integration, testing and deployment of six receiver station COTS upgrades.
b. Mission Processing System: Accomplish technical refresh of obsolete, unsupported computational processors, system processors, work stations and COTS software which will ensure the DSC2-D's continued capability to provide backup computational and SSA sensor command and control for JSpOC.
7. AIR NATIONAL GUARD (ANG) CRYPTOLOGIC SUPPORT SITE EQUIPMENT: This is a New Start in FY13. In order to conduct Digital Network Intelligence (DNI) operations, connectivity must be established to AirNet, SIPRNet, JWICS, NSANet, and non-attributable unclassified networks. As a stand-alone mission, bandwidth required is at least 6 MB each for SIPR, NIPR, and non-attributable unclassified networks and 9 MB each for NSANet and JWICS. Funding will provide hardware and software needed to enable a $200+$ man intelligence group to perform cyber mission tasking across multiple domains. This effort will enhance the Air Force's ability to provide intelligence, surveillance, and reconnaissance (ISR) support to cyber operations. Funding for this effort is in PE 0503115F.

Tactical Cryptologic Units for the ANG are comprised of multiple functions that contribute to the national SIGINT enterprise:
a. DISTRIBUTED MISSION SITES (DMS): DMS are sites within the Distributed Common Ground System (DCGS) enterprise that provide specialized analysis and exploitation capabilities not available at distributed ground stations, to include language and signals analysis, as well as in-depth technical analysis.
b. CYBER INTELLIGENCE SURVEILLANCE AND RECONNAISSANCE (ISR): Cyber ISR provides in-garrison comprehensive analysis products for combatant commanders and national command authorities. It will also provide time-sensitive intelligence reports, geo-political and operational intelligence information, develop and exploit target network configurations and operating characteristics, and produce topical high-interest technical and operational intelligence briefings.

FY11 OVERSEAS CONTINGENCY OPERATIONS REQUEST

## Description:

All FY11 and prior year funding requests for Mission Planning Systems (MPS) were included in the Theater Air Control System Improvement (TACSI) P-1 line.

1. MISSION PLANNING SYSTEMS (MPS): This multi-faceted acquisition provides a suite of mission planning systems that can be integrated with USAF Command, Control, Communications, Computers, and Intelligence (C4I) systems for the operational management of Combat Air Force (CAF) and Mobility Air Force (MAF) aerial assets and the support of USAF training requirements. MPS allows aircrews to electronically receive tasking orders, intelligence information, target coordinates, imagery and other information. This information is then used to organize and prepare flight (including cargo airdrop) and weapons delivery planning data (e.g., maps, charts, imagery, flight logs, radar predications, and navigation databases) that is electronically transferred to aircraft and weapons. MPS increases the combat effectiveness of Air Force aerial assets (including unmanned air vehicles, conventional and low-observable aircraft, and weapons) by supporting the use of sophisticated avionics and precision/autonomous guided munitions. It helps to increase wartime sortie rates while improving aircrew and aircraft survivability and aircrew readiness.

This MPS procurement effort takes advantage of the rapid increase in PC-based technology to enable high-end computing on increasingly smaller and more mission-oriented devices. The various programs procure UNIX and PC-based mission planning computers, which provide a flexible, configurable, and cost effective solution for increasing tactical and strategic capabilities to meet the continuum of operations ranging from peacetime contingencies to conventional and nuclear wartime mission planning requirements. Each program has shifted its hardware emphasis from a small number of large, complex planning systems to a larger number of smaller, more personal, planning devices tailored to user needs. This adjustment was made for the following technology-driven reasons: the evolutionary nature of mission planning requires hardware changes to meet overall system requirements; advances in commercial-off-the-shelf (COTS) technology make available new capabilities which may lower component costs or address component obsolescence; and changes in number, type, and deployment of aircraft/weapons require changes in the number of UNIX and PC-based mission planning computers and their concept of operation. A variety of information technology, navigation and communications hardware and software packages will be procured each year to meet the varied needs of USAF CAF, MAF and training units.
2. PRECISION AERIAL DELIVERY SYSTEM (PADS): PADS consists of efforts to provide the capability for direct delivery of cargo and equipment through high altitude, precision airdrops. Currently it consists of the Joint Precision Airdrop System (JPADS) acquisition effort. JPADS is a collaborative effort with the Army, USMC and other agencies to provide aviators the ability to accurately airdrop payloads (including supplies/equipment as well as personnel) to units in the field from altitudes beyond the reach of most surface-to-air weaponry. This portion of the program procures COTS hardware to support mission planning functions as well as JPADS systems for proficiency training in and with operational units.

Market surveys and analysis of COTS products will be used to support procurement decisions. Development funding for the MPS and JPADS programs are in Program Element (PE) 0208006F.
Appropriation / Budget Activity / Budget Sub Activity:
3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications
Equip / BSA 2 : Intelligence Programs

## Justification:

 supported:

 funding will procure system components with associated warranties and software licenses. Funding for this effort is in program element 0208006F.

 portable, tailorable, network-capable system for Mobility Air Forces (MAF) platforms that can be integrated with MPS software to provide a basic mission planning capability.
 with associated software applications and warranties. Funding also procures monitors, display devices, and other components to support/enhance unit mission planning capabilities.
 large data storage capability, other electronic components, and limited network infrastructure (local)

 tailor a platform's mission planning environment. Funding for this effort is in program element 0208006F.

| Appropriation / Budget Activity / Budget Sub Activity: |

## P-1 Line Item Nomenclature:

17 - MISSION PLANNING SYSTEMS

| ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- |

a. JMPS INCREMENT III COMPUTERS: This effort supports the operation of selected CAF aircraft and weapon platforms initially fielded within MPS Increments I-III. It procures COTS hardware, software, and support services to enable aircrews to effectively utilize Increment I-III developed software to complete the mission planning function.

 Systems - Legacy to further tailor a platform's mission planning environment. No FY13 funding requested.
 data storage capability, and other electronic components. Hardware will be procured predominantly as kits to support AETC training and other missions.
 support services to enable aircrews to effectively utilize Increment IV developed software to complete the mission planning function.

 also be networked with ACC Unix Systems - Legacy to further tailor a platform's mission planning environment.

 sync with new capabilities that have been incorporated into select platforms via their Operational Flight Program (OFP) update process.

 also be networked with ACC Unix Systems - Legacy to further tailor a platform's mission planning environment.

 fall (MFF) systems; engineering and technical support, and associated hardware warranties and software licenses. Funding for this effort is in program element 0208006 F .
 effort is in program element 0208006F.
 current Air Force mission requirements.

## Justification:

## P-1 Line Item Nomenclature:

## 18 - AIR TRAFFIC CONTROL \& LANDING SYSTEM

| ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: 0305137F, 0603860F |
| :--- | :--- | :--- |

process improvements, and investments in state-of-the-art commercial-off-the-shelf technology to update $30+$ year-old fixed and deployable equipment and replacement of the 1970 vintage AN/TPN-19 and MPN-14K Mobile Radar Approach Control. ATCALS modernization programs include a deployable instrument landing system (in development),Very High Frequency (VHF) Omnidirectional Range System (VOR), Tactical Air Navigation (TACAN), and VORTAC (combined VOR/TACAN) systems, and replacement of ATC radios. These investments will result in significant manpower and operations/maintenance savings over the next 20 years. Funding for this effort is in PE 0305114F.

1. AIR TRAFFIC CONTROL (ATC) RADIO REPLACEMENT: The ATC ground-to-air VHF and Ultra High Frequency (UHF) radios are 30 years old and difficult to maintain. The AFMC ATC Radio Replacement Program will replace all ATC fixed-base and major range and test facility fase ground-to-air radios with state-of-the-art systems that will include a remote maintenance capability. FY13 funding will procure 22 radios (22 AD/0 ANG/0 AFR).
 Based TACAN, Fixed Base VOR, and Fixed Base VORTAC systems. The current systems ( 1970 era) have reached the end of their normal lifespan, are manpower intensive, and are costly to support. New systems will include remote maintenance, monitoring, alignment, and flight inspection support capabilities via Remote Maintenance Centers (RMC). A total of 19 Deployable TACANs were procured in FY09/10. A total of seven VORs (Line 3) (6 AD/1 AFR), 27 VORTACs (Line 4) ( 26 AD/1 ANG), and 93 fixed-based TACANs (Line 5 ) ( 77 AD/10 ANG/6 AFR) will be procured from FY12 through FY17.
2. NAVAIDS FAMILY OF SYSTEMS (FoS) DEPLOYABLE TACAN REPLACEMENT: FY13 funds procure interim contractor support.
3. NAVAIDS FAMILY OF SYSTEMS (FoS) FIXED BASE VOR REPLACEMENT: FY13 funds procure one system (0 AD/0 ANG/1 AFR).
4. NAVAIDS FAMILY OF SYSTEMS (FoS) FIXED BASE VORTAC REPLACEMENT: No FY13 funding is requested for FIXED BASE VORTAC. Procurement will resume in FY14. Priority is placed on procuring Fixed Base TACAN in FY 13. (Fixed Base VOR, Fixed Base VORTAC, and Fixed Based TACAN on same contract)
5. NAVAIDS FAMILY OF SYSTEMS (FoS) FIXED BASE TACAN REPLACEMENT: FY13 funds procure 18 systems ( 16 AD/2 ANG/O AFR).
6. DIGITAL AUDIO LEGAL RECORDER (DALR): The DALR program replaces obsolete voice recorders in all USAF air traffic control facilities. All Radar Approach Control (RAPCON) and air traffic control tower radio and phone conversations must be recorded in accordance with FAA orders and Air Force instructions. New recorders are being procured jointly with the FAA utilizing an existing FAA contract. DALR procurement complete: No FY13 funding is requested.
7. Program Management Assistance: Program support for ATCALS programs managed at OC-ALC/GKAAA at Tinker AFB, OK. FY13 funds will provide support to all segments of the NAVAIDS Family of Systems Program.

Items requested in FY13 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Remarks:

The footnote below applies to the following items: AIR TRAFFIC CONTROL RADIO REPLACEMENT (AD).
Basic contract for Air Traffic Control Radios awarded to SAIC, San Diego, CA in 2007 with six fixed price option years.
The footnote below applies to the following items: FIXED BASE TACAN (AD); FIXED BASE TACAN (ANG); FIXED BASE VOR (AD); FIXED BASE VOR (AFR); FIXED BASE VORTAC (AD):
Single contract with five equipment option years and option for interim contractor support will be awarded for replacement VORs, VORTACS, and TACANs
FY11 Deployable TACAN funding stands-up organic depot in 4th quarter FY12.

Remarks:
 approximately two years after option exercise.
(2) Tech refresh procurements address diminishing manufacturing source issues as first NAS production systems were procured in 1998. The NAS program is scheduled to transition to the support phase during the FY12-FY14 period.
(3) Quantity/unit cost data represents the average unit cost per system installation. Due to large cost variances between installations (due to variable equipment quantities and site locations), unit cost data fluctuates between fiscal years.

## Description:

Prior to FY12, Battle Control System-Fixed (BCS-F) procurement funding was located in the 'Theater Air Control System Improvement (TACSI)' budget line.
BCS-F supports the NORAD/NORTHCOM homeland defense and air sovereignty mission for fixed Air Defense Sectors.

1. BATTLE CONTROL SYSTEM-FIXED (BCS-F): BCS-F is a bi-national cooperative program with Canada. The BCS-F program provides a modernized battle management command and control (C2) system with enhanced capability to integrate data from existing and future civil and military defense surveillance systems to include, but not limited to the National Capital Region - Integrated Air Defense System (NCRIADS), into a comprehensive recognized air picture in support of Operation NOBLE EAGLE and other homeland defense activities. This integrated air picture will enhance North American Aerospace Defense/ Combatant Commander capability to conduct peacetime air sovereignty operations and transition to active air defense operations in the event of aggression toward the North American Continent. BCS-F systems serve as Air Force Homeland Defense battle management C2 hubs and integrators for data from radar sensors, data links and supporting communications architecture. Provides for technical refresh and other procurement activities. Provides the tactical communications and data link capabilities with other military and civil systems responsible for planning, directing, coordinating and controlling forces for air surveillance, air defense, and control of sovereign US air space (including the National Capital Region). Funding for this effort is in program element (PE) 0102326 F .
2. NATIONAL CAPITAL REGION - INTEGRATED AIR DEFENSE SYSTEM (NCR-IADS): NCR-IADS provides ground-based air defense of the National Capital Region airspace. NCR-IADS provides an integrated air surveillance picture, fire control quality air picture, ground air defense weapons, enhanced regional situational awareness and forensic data collection capabilities for the warfighter to achieve Operation NOBLE EAGLE (ONE) mission to protect the National Capital Region (NCR) and its assets. Funding for this effort is in PE 0102326F.

## Description:

FY11 funding totals includes $\$ 4,354,000$ appropriated for Overseas Contingency Operations.

 and Reporting Center (CRC). CRC supports mobile ground-based command and control (C2) efforts.

Justification:
Beginning in FY12, procurement funding for Battle Control Systems-Fixed and Mission Planning Systems is located in 'Mission Planning Systems' budget line.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F: Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 3 : Electronics Programs

schedule in support of deployed theater operations supporting Operation ENDURING FREEDOM, Operation NOBLE EAGLE, and other homeland defense activities such as counter-drug activities and special security events.

To maintain mission operations, a Service Life Extension Project (SLEP) effort was initiated for the legacy AN/TYQ-23 OM to ensure it is serviceable until a replacement is operational. Current legacy systems have reached their technical capacity and are slowing the kill chain, as well as increasing the potential for fratricide incidents. The replacement for the AN/TYQ-23 OM will provide a much needed long term persistent air battle management capability; it will also bring new capabilities to the warfighter to rapidly respond to tactical situations, including homeland defense missions, providing tactical air battle C2 and net-centric battlefield management. An additional SLEP is underway for the legacy AN/TPS-75 radar to ensure the system is serviceable until Initial Operational Capability (IOC) for the Three-Dimensional Expeditionary Long-Range Radar (3DELRR) in FY19. The AN/TPS-75 is the USAF's only tactical ground based radar, and it is an essential tool providing the Joint Forces Air Component Commander (JFACC) with the air track data necessary to plan, manage, and conduct theater air operations.
a. CRC EVOLUTIONARY UPGRADES: FY13 activities support more effective C2 capability. Projects include, but are not limited to, the AN/TRC-215 Remote Radio Secure Voice System (RRSVS) and the AN/TPK-1 Non-Organic Radar Access (NORA). CRC evolutionary upgrades provide C2 products that more effectively meet the C2 requirements of the warfighter and support the JFACC's ability to conduct theater-wide air battle management. Development funding is in PE 0207412F, Control and Reporting Center (CRC) formerly known as Modular Control System (MCS). Upgrades will accomplish required modifications to the AN/TRC-213 Spiral I, enabling the TYQ-23 Operations Module to maintain its ability to meet current and planned communications requirements and allow it to serve as the communications subset of any future C2 engine.
b. CRC IMPROVEMENTS: FY13 funding provides reliability and maintainability improvements to the legacy AN/TYQ-23 OM, the AN/TPS-75 radar and peripheral equipment, and embedded subsystems. Projects within the CRC improvements portfolio include, but are not limited to, the AN/TRC-215 Remote Radio Secure Voice System (RRSVS), the AN/TPK-1 Non-Organic Radar Access (NORA), the AN/ TYQ-23 OM SLEP, the AN/TPS-75 Radar SLEP, the AN/TSC-147 Joint Tactical Information Distribution System (JTIDS) Module (JM). The mod rollup is shown on the P-5.
c. INTERIM CONTRACTOR SUPPORT (ICS): FY13 funding provides contractor support for temporary material and asset logistics support to CRC Evolutionary Upgrades systems, sub-systems, and support equipment.
d. PROGRAM MANAGEMENT ADMINISTRATION (PMA): FY13 funding provides program/engineering support for CRC Evolutionary Upgrades.
2. BATTLE CONTROL SYSTEM-FIXED (BCS-F): Beginning with FY12, funding for this effort is in the 'Battle Control System-Fixed (BCS-F)' budget line. Development funding for this effort is in PE $0102326 F$. No FY13 funds are requested in this budget line.
3. MISSION PLANNING SYSTEMS (MPS): Beginning with FY12, funding for this effort is in the 'Mission Planning Systems (MPS)' budget line. Development funding for the MPS program is in PE 0208006 F . No FY13 funds are requested in this budget line.
4. PRECISION AERIAL DELIVERY SYSTEM (PADS): Beginning with FY12, funding for this effort is in the 'Mission Planning Systems (MPS)' budget line. No FY13 funds are requested in this budget line.
5. HIGH PRESSURE OXYGEN BOTTLE: No FY13 funds are requested.

Items requested in FY13 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Description:

FY12 funding totals include $\$ 1,800,000$ requested for Overseas Contingency Operations (OCO).
FY13 funding totals include $\$ 5,600,000$ requested for Overseas Contingency Operations (OCO).

 systems operations and effectiveness.

 in Program Element (PE) 0305111F, Weather Service.

 systems.
 for battlespace and home-base operations.

 ANG/0 AFR), 6 deployable units (6 AD/0 ANG/0 AFR).

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 3 : Electronics Programs

P-1 Line Item Nomenclature:
22 - WEATHER OBSERVATION FORECAST

## ID Code (A=Service Ready, B=Not Service Ready) : A $\quad$ Program Elements for Code B Items:

Other Related Program Elements:
b. NEXT GENERATION IONOSONDE (NEXION): Provides vertical incidence measurements of the ionosphere from multiple worldwide locations. Measurements are used as model inputs for space environmental forecast products supporting warfighter operations and space situational awareness. FY13 funding will procure 2 ground-based ionospheric measuring units ( 2 AD/O ANG/O AFR).
c. PORTABLE DOPPLER RADAR: No FY13 funding requested.
2. PRODUCT TAILORING/WARFIGHTER APPLICATIONS: This program provides decision quality weather impacts information to warfighters at theater and tactical levels. At the theater level, Operational Weather Squadrons (OWSs) support commanders with timely, focused, fine-scale weather products and services. At the tactical level, Weather Flights (WFs) and Detachments (Dets) provide frontline AF and Army commanders target scale weather information in direct support of combat operations. WFs and Dets operate at both home station and deployed locations. FY13 funding will procure integrated computer hardware and software suites and associated communications interfaces for operational weather support at fixed and deployed AF, Army, and Special Operations Forces (SOF) locations in the continental United States and overseas.
3. WEATHER DATA ANALYSIS: This program provides atmospheric data analysis capabilities within the AFW Production Center to generate products required by command and control units, regional OWSs, and WFs supporting AF and Army units worldwide. This program acquires and implements weather data interfaces for command and control and mission planning systems. Other users of these products include DoD and Department of Commerce agencies and the national intelligence community. Improved weather analysis of real-time information also supports DoD's role in transformation of the National Airspace System through the Next Generation Air Transportation System (NextGen). FY13 funding will procure computer hardware and associated integration software for database expansion and net-centric dissemination of weather data. Modernization of information technology infrastructure needed to support integration of data from next generation of environmental sensing satellites.
4. WEATHER FORECASTING: This program provides cloud forecast models and other environmental forecast products for worldwide AF, Army, SOF, and national intelligence community operational support. FY13 funding will procure computer servers, processors, and high-capacity storage devices to support advanced scientific numerical weather modeling, and provides a robust infrastructure to enable exploitation of environmental data records from new satellite sources and improve worldwide forecast capability.
5. WEATHER DATA DISSEMINATION: This program transitions dissemination capabilities to a net-centric interface for the timely, reliable transmission of weather data and products to intermediate and end users. The advanced interface and delivery method ensures data integrity and continuity of service. Weather data dissemination formats and transmission protocols also support the AF Infostructure Technical Reference Model (i-TRM) objectives for integration into warfighter command and control, mission planning, and modeling and simulation systems. FY13 funding will procure COTS computer hardware and software and associated communications equipment.

OVERSEAS CONTINGENCY OPERATIONS REQUEST
FY13 Overseas Contingency Operations funding will procure deployable weather observation units to improve environmental situational awareness for AF and Army commanders at remote and deployed locations.

OBSERVING SYSTEM 21ST CENTURY (OS-21): FY13 OCO funding of $\$ 5,600,000$ will procure 34 deployable weather observation units (AN/TMQ-53)(34 AD/O ANG/O AFR)

## Remarks

The footnote below applies to the following items: PRIME MISSION EQUIPMENT (DEPLOYABLE) -- HILL AFB, UT:
Competitive, Firm Fixed Price contract awarded in Jun 10 with one base year and four one-year options, FY11/14.
The footnote below applies to the following items: PRIME MISSION EQUIPMENT (FIXED) -- HANSCOM AFB, MA:
Firm Fixed Price Indefinite Quantity/Indefinite Delievery contract with seven option years awarded in Oct 11.
The footnote below applies to the following items: PRIME MISSION EQUIPMENT (NEXION) -- PETERSON AFB, CO:
 base year and 8 option years/tasks.
The footnote below applies to the following items: PRIME MISSION EQUIPMENT (RADAR) -- HANSCOM AFB, MA:
Competitive, five-year IDIQ contract with Firm Fixed Price awarded in Oct 09.
The footnote below applies to the following items: PRIME MISSION EQUIPMENT (TAILORING) -- HANSCOM AFB, MA:
Basic contract, CPIF/wOPT, was awarded to Raytheon Intelligence \& Information Systems, Omaha, NE, Mar 06. Contract Justification \& Approval (J\&A) valid through FY15.

(FORECASTING) -- OFFUTT AFB, NE; PRIME MISSION EQUIPMENT (TAILORING) -- HANSCOM AFB, MA:
Unit costs vary because of different types/configurations of equipment being purchased.
The footnote below applies to the following items: PRIME MISSION EQUIPMENT (ANALYSIS) -- HANSCOM AFB, MA:

## Description:

 contingency war planning. Also, the program supports life-cycle replacement of outdated and unreliable communications equipment in support of the B-2 program.

 effort is in program element (PE) 0303255F.

 addition to C2 Modernization, Nuclear Deterrence Operations activities/funding are included within the scope of this effort. Funding for this effort is in PE 0303255F.

 processes. There is no change to the program, simply an administrative change. Funding for this effort is in PE 0303255F.

Appropriation / Budget Activity / Budget Sub Activity:
3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications
Equip / BSA 3 : Electronics Programs

## P-1 Line Item Nomenclature:

23 - STRATEGIC COMMAND AND CONTROL

| ID Code ( $A=$ Service Ready, $B=$ Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- |

Replacement components and spare parts will ensure COTS products remain fully mission capable and technologically current (within the manufacturer recommended end of life cycle). The Data Federation \& Synchronization (DF\&S) backup server effort will purchase capabilities that will reside throughout undisclosed locations. This is in cooperation with DISA and OSD Policy. FY13 funding for this work is in PE 0303255F. However, funding for this work prior to FY13 came from PE 0303159F. The transfer of funds between PEs was done to align like missions. There is no change to the program, simply an administrative alignment to adhere to the OSD directed 2010 Combatant Command (COCOM) PE realignment. NOTE: THIS IS NOT A NEW START.
5. USSTRATCOM Replacement Facility Fit-Out: USSTRATCOM is tasked with the vital roles of strategic deterrence, space operations, and cyberspace operations in our nation's defense. Nuclear, space, and network command and control operations require secure and survivable infrastructure. The facility must include secure HEMP-Shielded Command and Control Center, mainframe computer data centers, multiple $24 / 7$ mission operations centers, storage and maintenance areas, labs/workrooms, back-up generators, Uninterruptible Power Source, Technical Control Facility, Fiber Ring, etc. Funding for this effort is in PE 0303255F beginning in FY13. This is a new start project.
6. INTEGRATED STRATEGIC PLANNING AND ANALYSIS NETWORK (ISPAN): The mission of USSTRATCOM is to establish and provide full-spectrum global strike and coordinated space, missile defense, and information operations capabilities to meet both deterrent and decisive national security objectives. USSTRATCOM will also provide operational space support, integrated missile defense, global command, control, communications, computers, intelligence, surveillance, and reconnaissance (C4ISR), and specialized planning expertise to the joint warfighter. ISPAN enables USSTRATCOM to carry out these missions. It is one of DoD's most complex classified computer systems and the only national force level planning system. ISPAN has two parts; the Mission Planning and Analysis System and the Global Adaptive Planning Collaborative Information Environment. The Mission Planning and Analysis System is an automated information system to support Global Strike nuclear and conventional target development and weaponeering. The Mission Planning and Analysis System includes mission planning, analysis, and decision support tools and an enterprise database to sustain and support the legacy nuclear and conventional Strategic War Planning System (SWPS). The Global Adaptive Planning Collaborative Information Environment provides web enabled adaptive planning, rapid distributed course of action development and global situational awareness supporting both contingency and crisis planners. The Global Adaptive Planning Collaborative Information Environment enables an effectsbased approach to planning and operations, cross domain information sharing, and serves multiple planning environments. ISPAN infrastructure capabilities develop, verify, and produce Operational Plan 8010. The system performs tasks ranging from creating and running course of actions to threat scenarios to providing data for developing bomber aircraft crew strike mission data in digital and hard copy formats. It includes automated data processing equipment, software, training, associated deployable and distributed data processing nodes, and subsidiary systems. It uses a four-year life-cycle refresh plan to procure required servers, storage devices, workstations, peripherals and other network components. This life-cycle refresh plan follows industry standards and eliminates the peaks and valleys associated with maintaining compatibility with the fast moving Commercial Off-The-Shelf (COTS) hardware technology improvement cycle. It also allows the program to better utilize existing manpower to install and configure the refreshment hardware to provide an incremental and efficient refresh of critical infrastructure components as they become obsolete. Funding for this effort is in PE 0101313F.
7. USSTRATCOM WEAPONS OF MASS DESTRUCTION ELIMINATION EQUIPMENT: Program funds will procure equipment, hardware, and services for USSTRATCOM use in countering/eliminating Weapons of Mass Destruction (WMD). The equipment requested is representative of the equipment capable of providing the required operational capability. The specific system procured may vary depending upon available technology at the time of procurement. Funding for this effort is in PE 0101319F.
8. B-2 SUPPORT: The B-2 weapon system relies heavily on C2 equipment to meet its operational capability. Funding is used to replace obsolete computer systems, enhance existing computer equipment (i.e. computer hardware, terminal, printers, disk and tape drives, workstations, commercial software, etc...), improve backbone infrastructure hardware and software, and long haul communications equipment at the Weapon System Support Center (WSSC) Ground Test Facility (GTF), and contractor software laboratories as part of the long-term aircraft software support effort. This includes COTS items such as computer, displays, printers, disk and tape drives, software (e.g. computer-aided design (CAD) and analysis software) as well as engineering and logistical support. Funds also procure specialized computers that provide on-line access to B-2 aircraft data and low observable analysis capabilities. Unique B-2 security and communication infrastructure needs are also addressed. Funding for this effort is in program element 0101127F.

The B-2 Weapon System Support Center (WSSC) Ground Test Facility (GTF), located at Oklahoma Air Logistics Center, Tinker AFB, OK, supports two critical functions: aircraft software development and maintenance/support, plus systems engineering support for the fielded weapon system. Software maintenance fixes to aircraft systems include flight controls, flight management, navigation systems, weapons/ armament and the defensive management system. These software fixes are accomplished and tested with the use of the WSSC software development system and integration/test laboratory complex by analyzing and designing fixes to the existing aircraft software. The WSSC GTF also provides engineering support with specialized computer systems that provide online access to B-2 aircraft data. This data consists of items such as engineering and organic low observable analysis, manufacturing, aircraft design data used to help solve technical issues on the B-2. Locations this data is used include Tinker AFB, Whiteman AFB, Wright-Patterson AFB, Northrop-Grumman in Palmdale, CA and the forward operating location (FOL).

Equip / BSA 3 : Electronics Programs

## P-1 Line Item Nomenclature:

23 - STRATEGIC COMMAND AND CONTROL

## ID Code (A=Service Ready, B=Not Service Ready) : A

## Program Elements for Code B Items:

Other Related Program Elements:
9. EMERGENCY ACTION MESSAGE (EAM) PROCESSING EQUIPMENT: Emergency Action Messages are highly structured, authenticated messages primarily used in the command and control of nuclear forces. They are disseminated over numerous survivable and non-survivable communication systems including terrestrial and space systems. Programmed funds will procure system components, spares, software, and necessary support services for systems such as the Strategic Automated Command and Control System (SACCS) and the Defense Injection Reception EAM C2 Terminals (DIRECT). SACCS is a secure Nuclear Command, Control, and Communications (NC3) system that directly support National Command Authority (NCA) communications in the command and control of strategic and non-strategic forces. SACCS enables the NCA to disseminate Higher Authority Command Messages, Force Direction Messages, Emergency Action Messages, and automated ICBM retargeting data to the USAF's two legs (ICBM and bomber fleets) of the nuclear triad; the reconnaissance, tanker, USAFE munitions, and Special Operations communities; and to other Active Duty, Guard, and Reserve DoD users worldwide. DIRECT includes the hardware and software to enable the NCA to transmit nuclear and non-nuclear EAMs and other time-critical messages to strategic and non-strategic forces. The equipment requested is representative of those items capable of providing the required operational capability. The specific items procured may vary depending upon available technology at the time of procurement. Funding for this effort is in PE 0101316F.

Justification:
 ruggedized prototypes for the mobile platforms. FY13 will also fund migration into a Net-Centric environment and the engineering of systems aboard the E-4B and E-6B airborne platforms.
 Command and Control Integration (NC2I) Back Up Servers; Engineering, procurement and fielding of a 2-way Cross Domain Solution for the NC2I deployment efforts.

 and Force Protection applications that feed STARS.

 driven by national level direction.

Appropriation / Budget Activity / Budget Sub Activity:
3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications
Equip / BSA 3 : Electronics Programs

## P-1 Line Item Nomenclature:

23 - STRATEGIC COMMAND AND CONTROL

ID Code (A=Service Ready, B=Not Service Ready) : A
Program Elements for Code B Items:
Other Related Program Elements:
existing cable vault to the new HQ facility due to the relocation of the existing Technical Control Facility. Majority of this Fiber Ring utilizes existing infrastructure but would need new and upgraded infrastructure in certain areas due to saturation of existing conduit and the diverse locations on Offutt AFB. These fiber cables are critical in providing reliable secure and non-secure voice/data/video to the Command.
6. INTEGRATED STRATEGIC PLANNING AND ANALYSIS NETWORK (ISPAN): FY13 funding continues the life cycle procurement of application servers, storage area network, and backup and recovery systems and other system components. This includes preproduction servers, work stations and storage devices that will provide a software operational capability lab environment for the ISPAN Global Adaptive Planning Collaborative Information Environment. Funds will also procure servers, switches, applications, guard solution software and other articles that will provide a secure cross domain security solution capability to enable automated data transfers between multi-level networks (secret and joint worldwide intelligence communications system) to accommodate Global Adaptive Planning Collaborative Information Environment planners on multiple enclaves. It also supports the life-cycle workstation refresh project, provides for the life-cycle refresh of government furnished equipment at development contractor sites, and the procurement of equipment to support ISPAN strategic modernization efforts, to include hosting ISPAN at the Defense Information Systems Agency, Defense Enterprise Computing Center to provide distributed operations capability. This distributed operations capability, as a service to the DoD Enterprise, includes hardware, software, software license agreements to support the entire Joint Force.
7. USSTRATCOM WEAPONS OF MASS DESTRUCTION ELIMINATION EQUIPMENT: No FY13 funding requested.
8. B-2 SUPPORT: FY13 funding continues the replacement of obsolete computer systems, enhancements to existing computer systems, and improvements to backbone infrastructure hardware and software in the WSSC GTF and long-haul communications equipment (e.g. encryption devices, networking equipment). Hardware and software purchased include COTS items such as uninterruptible power supplies, computers, displays, printers, disk and tape drives, software and installation and support services.
9. EMERGENCY ACTION MESSAGE PROCESSING EQUIPMENT: No FY13 funding requested.

Items requested in FY13 are identified in the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

Justification:

 Modernized Intelligence Database supporting the Combined Air Operations Center. Funding for this effort is in PE 0208019F.

## Appropriation / Budget Activity / Budget Sub Activity:

3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications
P-1 Line Item Nomenclature:
25 - TACTICAL SIGINT SUPPORT
Equip / BSA 3 : Electronics Programs
ID Code (A=Service Ready, B=Not Service Ready) : A

## Program Elements for Code B Items:

Other Related Program Elements:
FY12 Overseas Contingency Operations funding request will fund the procurement of 26 tactical system operator (TSO) mission equipment systems. TSO mission equipment is the key component for
actionable intelligence operations on-board Air Force Special Operations Command (AFSOC) Non-Standard Aviation (NSAv) aircraft. Without the system, actionable intelligence from AFSOC NSAv aircraft operations will fail.

FY12 OCO funds will also procure six Joint Threat Warning System-Air Variant systems. The equipment provides threat warning and situational awareness for AFSOC aircraft and supported ground crews. Failure to address the current equipment deficiencies increases the risk to AFSOC aircrews and supported ground elements.

Items requested in FY13 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

Justification:

1. AIR FORCE DISTRICT OF WASHINGTON:
a. AIR FORCE HISTORICAL RESEARCH AGENCY: No FY13 funding requested. This effort is in program element (PE) 0901212F and will no longer be reported in this P-1 line.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 4 : Spcl Comm-Electronics Projects

P-1 Line Item Nomenclature:

b. DISTRIBUTED TRAINING AND EXERCISES: FY13 funding procures wargaming and analysis suites, hardware, and software in direct support of the wargaming informational environment, which is distributed across the National Capitol Region, United States Air Force, and Combatant Commands worldwide. This effort is in PE 0207697F.
c. HEADQUARTERS, USAF SUPPORT: Funding for this effort is in PE 0902398F. No FY13 funding requested.
d. ACQUISITION INFORMATION SYSTEMS: No FY13 funding requested. This program is a combination of commodity items and formal programs with associated developmental funding in PE 0702806F.
2. AIR FORCE NETWORK INTEGRATION CENTER:
a. AIRBORNE NETWORKING INTEGRATION (ANI): The Airborne Networking Global Information Grid (GIG) Interface (ANGI) is an initiative that provides airborne communications network connectivity to the terrestrial and space layers. It supports Air Force and Joint efforts for integration of airborne, terrestrial and space layer networks. The initiative establishes ANGI deployable kits that will extend the AFNet to the aerial layer. The ANGI FY13 Overseas Contingence Operations (OCO) funding request will engineer and field two deployable airborne communications GIG entry points (GEPs). This effort is in PE 0303112F.
3. AIR COMBAT COMMAND:
a. COMBAT AIR FORCE (CAF) EXERCISES AND READINESS TRAINING: FY13 funds procure part task trainers for ACC and other CAF air crews to perform selected ground training tasks in conjunction with other air operations training activities as they train to become combat ready for worldwide air expeditionary force missions. The PE for this effort is 0207603F.
b. F-22 MISSION READY OPERATIONS: No FY13 funding requested. This effort is under PE 0207138F.
4. AIR EDUCATION AND TRAINING COMMAND (AETC):
a. TECHNICAL TRAINING MANAGEMENT SYSTEM (TTMS): TTMS provides AETC organizations with a world class commercial-off-the-shelf (COTS) learning management system which supports six functions: course design and development; student evaluation; instructor management; student management; data analysis; and resource administration. TTMS is a web-based system which provides productivity enhancements and higher degree of efficiency to AETC. The primary requirement objectives currently under development are: 1) TTMS Military Training Leader (MTL) will be designed to provide centralized and automated student accounting and training administration. 2)Virtualization - Virtualizes TTMS Evaluations/Testing Labs at the "Big Six" bases (Keesler, Lackland, Sheppard, Goodfellow, Vandenberg, and Maxwell AFB) into the AF AFNetOps. FY13 funds will be used to provide Bar Code Scanners, Thin Clients, and Virtualization. This effort is funded under PE 0804731F.
b. AIR FORCE INSTITUTE OF TECHNOLOGY EDUCATIONAL ENCLAVE NETWORK (AFIT EDU): In FY10, this program was titled "AFIT EARS." AFIT EDU is the AFIT educational IT network, providing infrastructure, hardware, and essential management tools required to provide information technology core services to approximately 1,800 students, faculty, staff, and over 15,000 distance learning students worldwide. This unique network must support administration, unique instructional and academic management services, and support state-of-the-art research in engineering and science.
Acquisitions for FY13 consist of sustaining network services to support students, faculty, and staff in AFIT facilities and will support the continued replacement and upgrade of outdated central academic computing systems and obsolete network architecture. This effort is funded under PE 0804752F.
c. AIR UNIVERSITY (AU): These funds support efforts to migrate to the Education Management System (EMS). The EMS implements effective and efficient education information management practices at AU. The EMS encompasses the management of an information infrastructure (local networks and associated equipment), targeting major common business processes (Student Administration, including registrar functions, curriculum management and delivery, and resource management) employed throughout AU.

FY13 funds support the AU approved IT Strategic Plan goal to leverage information technology in the education environment and will be used to provide upgrades to the information infrastructure that facilitates research, enhances curriculum, and provides information required to execute the education mission. These funds will also purchase upgrades to the enterprise platform architecture that provides interoperability between education curriculums. This effort is funded under PE 0804771F.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F: Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 4 : Spcl Comm-Electronics Projects

ID Code (A=Service Ready, B=Not Service Ready) : A Program Elements for Code B Items:
P-1 Line Item Nomenclature:
27 - GENERAL INFORMATION TECHNOLOGY
d. AIR FORCE RECRUITER INFORMATION SUPPORT SYSTEM (AFRISS): AFRISS is the AF recruiting system providing automated processing capability for Active Duty and Air National Guard recruiters and reporting/management capabilities to all levels of recruiting leadership for both components. The Air Force Reserve recruiting system is called the AFRISS-R. FY13 funds will purchase hardware and software necessary to sustain current systems. Additionally, RDT\&E funding will be used for continued development of a single enhanced AFRISS-Total Force (AFRISS-TF) system, which will support Air Force, Air National Guard, and Air Force Reserve recruiting requirements at a lesser cost than maintaining two separate legacy systems. A single, consolidated recruiting system effectively provides improved integration with all current DoD personnel system interfaces. Additionally, the new AFRISS-TF system will improve performance and data integrity as the Total Force processes and manages its lead and applicant pool, an important capability in an increasingly competitive market. Furthermore, funding will procure telecommunications modules and other required enhancements necessary to support all recruiting business practices in a web enabled environment. This effort is funded under PE 0801711F.
e. LEMAY CENTER (WARFIGHTING APPLICATIONS): No FY13 funding requested. Funding used to purchase the servers and associated hardware, software, and maintenance contracts to replace network components as they become obsolete. This effort is funded under PE 0207605F.
f. TRAINING DEVELOPMENTS: No FY13 funding requested. This effort was funded under PE 0804772F and will no longer be reported in this P-1 line.
5. AIR FORCE MATERIEL COMMAND (AFMC)
a. AFMC INFORMATION MANAGEMENT SYSTEMS: AFMC uses a number of internal information systems across the various logistics and product centers. The AFMC specific systems are defined below.
(1) COMPREHENSIVE ENGINE TRENDING AND DIAGNOSTICS SYSTEM (CETADS): No FY13 funding requested. This effort is funded under PE 0708012F.
(2) GUNTER AIR FORCE BASE NETWORK SERVICES: The Gunter Air Force Base local area network provides standard base level network services to the entire base population in support of operational needs. These services include messaging, file storage and backup, access to network applications, and web access. Primary users are the 754 Electronics Systems Group (ELSG), which manages a portfolio of application and associated program offices and the 643 Electronics Systems Squadron which manages the Capabilities Integration Environment (CIE), a software integration laboratory, to test and evaluate Air Force software applications in a close to operational environment prior to deployment across the Air Force. To ensure success for the CIE, the Gunter AFB network must be on the leading edge of technology to ensure Air Force applications are planning for the future. FY13 funds will procure Storage Area Networks and network infrastructure upgrades. Local Area Network (LAN) 3080 infrastructure funds provide for hardware and software technical refresh procurements to include all infrastructure communications/electronic equipment and specialized software tools. This effort is funded in PEs 0702806 F and 0708012F.
(3) WEAPON SYSTEM MANAGEMENT INFORMATION SYSTEM (WSMIS): No FY13 funding requested. This effort is funded under PE 0708012F.
(4) SCIENCE AND ENGINEERING LAB DATA INTEGRATION (SELDI): No FY13 funding requested. This effort is funded under PE 0207601F.
b. AUTOMATIC IDENTIFICATION TECHNOLOGY (AIT) PROGRAMS: AIT is a collection of enabling technologies including linear and two-dimensional bar codes, radio frequency identification, smart cards, memory cards, laser cards, touch memory, and voice and biometrics identification. These technologies provide timely and accurate automatic capture, aggregation, and transfer of data to management information systems with minimal human involvement. By capitalizing on advances in technology the Air Force is able to gain efficiencies in the logistical supply chain and asset visibility throughout an item's life cycle. Project funding enables compatibility of Air Force and industry standards in the core areas of supply, transportation, and maintenance, as well as weaving commercial AIT business practices and standards into the Air Force's logistics infrastructure. FY13 funding procures the hardware, software, and type 1 training to support the active radio frequent identification (A-RFID), passive radio frequent identification (P-RFID), a real-time locating system (RTLS), and item unique identification (IUID) infrastructures. This effort is funded under PE 0708074F.
(1) A-RFID: An RFID tag is an object that can be applied to a product for the purpose of identification using radio waves. RFID is used in enterprise supply chain management to improve the efficiency of inventory tracking and management. A-RFID tags contain a power supply to continually broadcast ID information than can be received at ranges exceeding one-hundred meters.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 4 : Spcl Comm-Electronics Projects

| ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- | :--- |

(2) P-RFID: P-RFID tags do not contain an internal power supply and must be queried by a reader to provide information. Familiar commercial applications of this technology deter shoplifters. FY11 funding procures the hardware, software, and type 1 training to support the P-RFID infrastructure.
(3) RTLS: RTLS is a combination of wireless hardware and real-time software that is used to continuously determine and provide the real time position of assets and resources equipped with devices designed to operate with the system.
(4) IUID: IUID is a system of establishing globally ubiquitous unique identifiers to distinguish a discrete entity from other like and unlike entities. Tangible items are marked with a unique identifier in the form of a character string, number, or sequence of bits to uniquely distinguish it from other like and unlike entities. IUID is currently required to be used on items with an acquisition cost of over $\$ 5,000$; items that are currently serially managed; items that are sensitive or classified; and property that is furnished to third parties, particularly U.S. Government contractors
(5) AIT INTEGRATION: Integrates the effort of disparate AIT technologies to support integrated logistics business process. Ensures the usability of multiple AIT applications, whether mobile or fixed platforms to support requirements for both legacy and enterprise resource planning systems. This effort is funded in program elements 0202834F and 0708074F.
(6) POSITIVE INVENTORY CONTROL: This initiative uses AIT technology for the near-real time tracking of Nuclear Weapons Related Materiel in the Air Force supply system. Funds procure automated identification technology infrastructure, devices, and data storage. The Air Force completed Congressional notification for this effort via reprogramming FY 09-11, "ISR, Space Systems and Nuclear Surety Requirements," submitted on December 5, 2008.
c. TACTICAL DATA LINK NETWORKS (TDN): TDN supports the machine-to-machine interface used for the near real time sharing of a common operational picture among air, land, and sea forces. TDN procures the ground based component of this network in the "General Information Technology" P1 line. The Air Force procures the aerial components of TDN via the Aircraft Procurement, Air Force (APAF) appropriation. Development funding is in PE 0604281F. TDN procurement efforts in the separate focus areas discussed below:
(1) JOINT INTERFACE CONTROL OFFICER SUPPORT SYSTEM: No FY13 funding requested. Effort terminated in July 2011 and will no longer be reported in this P-1 line.
(2) STRATCOM DISTRIBUTED NUCLEAR COMMAND AND CONTROL: Effort completed with FY12 funding. No FY13 funding requested.
(3) OTHER GATEWAYS: Other gateway systems enable combat forces to exchange information quickly and accurately by bridging discrete airborne, terrestrial, maritime, and space based C4ISR networks. FY13 funding procures equipment, fielding support, and associated Interim Contract Support for fielding the capability enhancements made to tactical data networks and other legacy gateways.
6. AIR FORCE SPECIAL OPERATIONS COMMAND (AFSOC)
a. POINT OF MAINTENANCE (POMX): No FY13 funding requested. POMX supports multiple disciplines (e.g. maintenance, munitions, etc.) by utilizing information technology to reduce the user data collection burden. This capability will enable POMX users to record and transmit their work efforts directly into maintenance computer systems from the work location or laptop, increase the data accuracy, and minimize the data latency. AFSOC POMX incorporates Interactive Electronic Technical Manual (IETM) infrastructure requirements creating a combined multiple use E-Tool (POMX and IETM) on the same device. This effort is funded in PE 0708611F.
7. AIR FORCE OFFICE OF SPECIAL INVESTIGATIONS (AFOSI):
a. AFOSI COMPUTER NETWORK: No FY13 funds requested. The AFOSI Directorate of Warfighting Integration is responsible for centralized management of sensitive data. AFOSI processes this data on unclassified, classified, special access, and Top Secret/SCI computer and information management systems to achieve the command's operational objectives in support of the AF and Office of the Secretary of Defense as well as to achieve Executive mandates to improve information sharing within and between the law enforcement and intelligence communities. Funds provide for the replacement of vital computer equipment to include servers and mass storage devices. This will enable AFOSI to stay current in IT technology supporting 3,000 worldwide personnel to effectively process, track, and disseminate perishable investigative information to AF commanders and national-level customers. This effort is funded in PE 0305128F.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F: Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 4 : Spcl Comm-Electronics Projects

| ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- |

DC3 is responsible for providing state-of-the-art digital and multimedia forensic services and cyber investigative and operational support to DoD customers, to include protection of DoD vital information systems. FY13 funds procure digital and multimedia analysis and computer forensics \& investigative equipment, as well as storage area network technologies and associated backbone connectivity. This effort is funded in PE 0305105F and will no longer be reported in this P-1 line.
c. DEFENSE JOINT COUNTERINTELLIGENCE PROGRAM. No FY13 funding requested. This element supports both technical surveillance and Technical Surveillance Countermeasures to counterintelligence operations conducted by the AFOSI for AF and DoD entities to detect and deter covert activities conducted by Foreign Intelligence Services seeking to compromise classified or sensitive information. The technical equipment required for these investigations is unique and complex. Funding procures the periodic refresh of equipment to provide state of the art capabilities to detect and neutralize criminal activities targeted against sensitive and classified AF and DoD information and activities. This effort is funded in PE 0305146F and will no longer be reported in this P-1 line.
8. AIR FORCE PERSONNEL CENTER (AFPC)

These three programs are funded under PE 0901220F and PE 0901299F:
a. MILITARY PERSONNEL DATA SYSTEM: FY13 funding provides for the operation/sustainment of AFPC IT infrastructure. Specifically, funding provides for upgrades, continuing stabilization, and sustainment of the current core communications and computer facilities supporting AFPC. The system employs client server, web, and relational database management technologies to support all phases of the personnel life cycle, including accession, training, assignment, promotion, retirement, and death.
b. REGIONALIZATION OF CIVILIAN PERSONNEL SUPPORT: FY13 funding continues to support the regionalization and modernization of 95 worldwide AF Civilian Personnel Operations sites, including the Regional Service Center at Randolph AFB, TX. The hardware associated with the regionalization implementation and the subsequent technology refresh support a variety of AF personnel network applications such as: Defense Civilian Personnel Data System, Personnel Automated Records Information System, Employee Benefits and Information System, Interactive Voice Response System, and Business Objects.
c. PERSONNEL SERVICE DELIVERY (PSD): FY13 funds procure replacement hardware and upgrades central personnel computing systems and network architecture. It supports the Air Force Director, Plans and Integration initiative, creating integrated personnel/pay functionality, using web self-service capability and a central contact center. It supports the preparation, migration and deployment of the Defense Integrated Military Human Resource System to the USAF.
9. AIR FORCE INTELLIGENCE, SURVEILLANCE, AND RECONNAISANCE AGENCY (AFISRA):
a. INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE (ISR) INNOVATIONS PROGRAM: A family of systems providing high impact, quick reaction capabilities to warfighters for mission planning, rehearsal, visualization, and intelligence gathering purposes. Program components include: Eagle Vision, DoD's only worldwide deployable commercial imagery ground station capability, and ISR innovations, rapid prototyping, operational evaluation and fielding of short notice, high payoff capabilities addressing immediate gaps and/or shortfalls identified by warfighting activities. Eagle Vision provides direct downlink commercial imagery to operational commanders for mission support purposes. Eagle Vision is composed of the Data Acquisition Segment (DAS) and Data Integration Segment (DIS). Funds support procurement of Imagery Ingest Capability Upgrades/tech refresh (via National Geospatial Agency Imagery) and Eagle Vision DAS and DIS upgrades/tech refresh to support communications that provide improved processing capability, additional satellite capabilities and imagery, and system baseline upgrades/tech refresh. FY13 funding supports five systems/units (1 AD/4 ANG / 0 AFR). Funding for this effort is in PE 0207277F.
b. INTEGRATED BROADCAST SERVICE (IBS): No FY13 funding requested. Beginning with FY11, funding for this effort is in the 'Intelligence Communications Equipment' budget line and will no longer be reported in this P-1 line. This effort is funded in PE 0305179F.
10. US AIR FORCE ACADEMY (USAFA): Both efforts are funded in PE 0804721F.
a. AIR FORCE ACADEMY COMPUTER SUPPORT: Air Force Academy uses two separate networks for day-to-day operations. Approximately $75 \%$ of the support is provided to USAFAEDU (academic network), providing the Academy's interface for mission elements, the cadet wing, DRU and direct mission support organizations to DoD/AF military sites, commercial internet, other colleges and universities.

| :--- | :--- | :--- | :--- |

13. AIR FORCE SPACE COMMAND/SPACE AND MISSILE CENTER
a. RESEARCH AND DEVELOPMENT SPACE AND MISSILE OPERATIONS (RDSMO) PROGRAM: This Air Force umbrella program includes funding for the RDT\&E Support Complex (RSC), Multi-Mission Space Operations Center (MMSOC), and the Mobile Range, including the Remote Tracking Station Block Change Transportable Space Test Resource (RBC TSTR). This effort is funded in PE 0305173F, Space and Missile Test and Evaluation Center.
(1) RSC/Mobile Range Upgrades: The RSC is an operations center responsible for flying a number of science \& technology assets in space. FY13 Funds will procure upgrades and hardware required for a lights out, remote operable telemetry system dedicated to the RSC, as well as four world-wide deployable, ocean-going capable, lights out, remote operable telemetry systems.
(2) MULTI-MISSION SPACE OPERATIONS CENTER (MMSOC): FY13 funds will procure MMSOC hardware, software, and communications capabilities needed to install systems and perform necessary testing for four operational satellite ground systems. The MMSOC's main objective is to transition research and development space vehicle technology with residual military utility to operational status for immediate real world support and initial operational utility assessment for future acquisition programs. The MMSOC is also designed to be a satellite command and control (C2) spiral evolution resource for new satellite systems.
(3) REMOTE TRACKING STATION BLOCK CHANGE TRANSPORTABLE SPACE TEST RESOURCE (RBC TSTR): Effort will recapitalize deployable Air Force Satellite Control Network (AFSCN) remote tracking station block change hardware, software, and communications capabilities needed for telemetry support and space vehicle compatibility test of satellites. No FY13 funding requested.
b. SPACE INNOVATION AND DEVELOPMENT CENTER (SIDC): FY13 funds will be used to develop, evaluate, test, and integrate space application and utility concepts, as well as new technologies, while providing combat effects to warfighters such as aid in mission planning of GPS-aided/guided munitions. Its innovation, education, and training activities foster solutions to operational deficiencies and enhance the integration of space systems into Air Force operations, thereby enabling service and joint warfighters to realize the full potential of existing and planned space capabilities. The two following SIDC efforts are funded in PE 0305174F, Space Warfare Center.
(1) DISTRIBUTED COMMUNICATIONS ARCHITECTURE: This SIDC-operated system provides a network based communications capability enabling dispersed space personnel to participate in space exercises and wargames and to assist in development, testing, and validation of SIDC innovation projects supporting the Combat Air Forces. It can also support limited command and control capabilities for space operations. FY13 funds will be used for replacement/upgrade of existing Local Area Network (LAN) equipment for the SIDC facility while incorporating new technology into the system.
(2) SPACE ANALYSIS CENTER: Air Force Space Command's Space Analysis Center uses modeling and simulation tools to conduct operations research, military utility analyses, tradeoff studies, and other evaluations of space mission areas to guide planning, programming, requirements generation, analyses of alternatives, and other activities. Related modeling and simulation tool development is funded in PE 0305174F, Space Warfare Center. FY13 funding procures computing equipment supporting analysis capabilities.
c. INFORMATION OPERATIONS TRAINING: FY13 funds requested to procure student mission training systems (hardware, software, infrastructure, and facility modifications) supporting Information \& Cyber Operations training needs of approximately 700 students per year. This effort is funded in PE 0208021F.

## 14. NATIONAL SECURITY EMERGENCY PREPAREDNESS

- SITE R AUTOMATED DATA PROCESSING SUPPORT: No FY13 funding requested. Previous funds procured hardware, computers, storage, local and long-haul communications, infrastructure, data replications, and other networking equipment to improve/expand both the classified and unclassified AF C4 systems at a HQ SAF relocation site. Equipment ensured connectivity, computing, and information retrieval capability. Funding also supported the development of a continuity of operations web portal, which is designed to track personnel in route to alternative sites, their training status, and pertinent continuity of operations (COOP) documents. This effort is funded under PE 0902398F.

15. US TRANSPORTATION COMMAND (USTRANSCOM)

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F: Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 4 : Spcl Comm-Electronics Projects

| ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- |

- COALITION MOBILITY SYSTEM (CMS): CMS enables the machine-to-machine exchange of air and sealift schedules to support Coalition Task Force operations. CMS began as a United States Pacific Command Joint Concept Technology Demonstration in FY07. FY13 funding will support Phase II of the CMS effort with the objectives of 1) making a modified CMS prototype operational, and 2) providing a user capability on a coalition network. The development funding associated with this program is in RDT\&E, defense wide BA 3, Program Element 0603713F, "Deployment and Distribution Enterprise Technology." Air Force funding for this effort is in PE 0408020F.

16. AIR FORCE CIVIL ENGINEER (AF/A7C)

- CIVIL ENGINEER'S (CE) IT TRANSFORMATION: This is a New Start in FY13. CE IT Transformation program's mission is to transform CE's business processes to better serve the CE customers and meet AF Transformational Goals. The plan is to leverage industry best practices, optimize core business processes, and replace existing outdated IT capabilities with a set of commercial off-the-shelf (COTS) software solutions and a service provider to deploy and maintain the system. This COTS solution will provide a robust, enterprise-wide CE capability and will consist of an integrated set of embedded / configurable best business practices and capabilities to support the following CE missions: Real Property Management; Work \& Supply Management, Project Management, Energy Management, Housing Management, Financial Management, Environmental Management, Planning, Emergency Services, Fire Operations and EOD. FY13 funds will be used to purchase software licenses for NexGen IT Capability Groups 1.0 and 2.0. Funding for this effort is in PE 0901279F.

## 17. AIR FORCE MANPOWER AND PERSONNEL (AF/A1X)

- AIR FORCE INTEGRATED PERSONNEL AND PAY SYSTEM (AF-IPPS): This is a New Start in FY13. AF-IPPS will be a web enabled, Commercial-Off-The-Shelf (COTS) based, SECAF "" 3 - 1 "" (Active, Reserve, and Air National Guard) initiative solution that will integrate many existing personnel and pay processes into one self-service system. The system represents the AF commitment to modernizing business practices and providing enhanced support for today's service members and their families. AF-IPPS will align with Department of Defense (DoD) data standards for personnel, pay, and accounting, including the Common Human Resource Information Standards (CHRIS) and the Enterprise Information Web (EIW) effort, which will ensure compliance with the Business Enterprise Architecture (BEA) Funding for this effort is in PE 0901250F.

AF-IPPS FY13 procurement dollars will procure COTS software and hardware necessary for the program to deliver/deploy Increment 1 capabilities for the AF Military Enterprise. This amount includes sufficient software licenses for production, training and MAC II Continuity of Operations (COOP) environments that support multiple releases towards program development, enabling fielding of a solution that supports approximately 505,000 users and provides scalability for future growth of users. Funds will also be used to procure COTS hardware to support the training environment. The value represents projected costs based on current technology studies and potential vendor solutions that include ERP, application support/management tools, and other business support software.
18. AIR NATIONAL GUARD (ANG)

- INFORMATION OPERATIONS: This is a New Start in FY13. ANG Information Operations encompass Network Warfare and Information Operations capabilities that provide for the integrated employment of cyberspace defense, cyber force application and related training. ANG Cyberspace defense activities include units and associate personnel organized, administered, recruited and trained to ensure DOD use of its networks and deny adversarial use of the same ANC Cyber Force application capabilities provide trained personnel with the ability to destroy, disrupt, corrupt, or usurp information resident in or transiting through adversarial networks.

FY13 funds will be used to initiate stand-up of an ANG Network Warfare squadron in Maryland. Unit will require the communications infrastructure to provide connectivity to US Cyber Command, Air Force and Intelligence networks, cyber training range components and workstations and related software. Procurement of these functions will entail Information Transfer and End Building nodes to support growth from 59 to 120 squadron personnel: SIPR, JWICS, and NSAnet connectivity, and IT components such as servers, firewalls, routers, workstations and software to enable training, network warfare planning and access to specialized applications and data. Funding for this effort is in program element 0503056F.

Items requested in FY13 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Description:

1. GCCS-AF IMPLEMENTATION: The Global Command and Control System-Air Force (GCCS-AF) program provides the common AF infrastructure hardware and software necessary to pass AF command and control (C2) data among commands, their components, and the joint GCCS. This program procures GCCS components which include, but are not limited to, servers, work stations, commercial-off-theshelf (COTS) software, and associated peripherals to provide users with the full suite of joint baseline capability (including the common operating picture) and AF specific applications such as the Deliberate Crisis Action Planning and Execution Segments (DCAPES), and the AF's feed into the Joint Operations Planning and Execution System. GCCS-AF is integrated at the following locations to establish initial and full joint connectivity and operational capability across the spectrum of intelligence, operations, manpower, and logistics: AF supported warfighting commanders, Headquarters United States Air Force, major command headquarters (MAJCOM), numbered air forces, wings, Air National Guard (ANG) bases, Air Force Reserve (AFR) bases, and remote sites. Each site will comply with current Air Force and Department of Defense (DoD) network initiatives by employing a standardized interface among AF base-level classified C2 networks, AF base-level network control centers, and the joint Defense Information Systems Agency Secret Internet Protocol Router Network. This program provides a flexible open system, distributed C2 architecture necessary to support the joint GCCS. GCCS supports AF operations by installing and upgrading a site's classified C2 system through extensive use of COTS technology that adheres to AF command and control, communications, and computer architectures and standards Procurement funding for GCCS-AF is in program element (PE) 0303150F, Global Command and Control System-Air Force.
2. MQ-9 UNMANNED AERIAL VEHICLE (UAV): The MQ-9 Reaper and MQ-1 Predator aircraft are single-engine, remotely piloted aircraft designed to operate over-the-horizon at medium-to-high altitude for long endurance sorties. These aircraft carry intelligence surveillance reconnaissance (ISR) sensors and weapons to provide real-time ISR capability and to prosecute critical emerging time-sensitive-targets The aircraft are employed using a remote split ops concept of operations that use OCONUS ground station sites as nodes for passing command and control and sensor data information between the aircraft and CONUS based ground control stations. Procurement funding for MQ-9 is in PE 0205219F, MQ-9 Unmanned Aerial Vehicle.

## Description:

1. GLOBAL MOBILITY COMMAND AND CONTROL (C2) ARCHITECTURE AIR MOBILITY COMMAND (AMC): The AMC C2 architecture is an integrated, command-wide system that supports US Air Force airlift/air refueling missions around the globe with centralized control/decentralized execution. To execute America's Global Reach mission, Air Mobility Command's Tanker Airlift Control Center (TACC) plans, schedules, and directs a fleet of more than 1,300 mobility aircraft. The TACC operates combat delivery, strategic airlift, air refueling, and aeromedical evacuation operations around the world. Funding for this effort is in program element 0401840F.
a. WING LOCAL AREA NETWORK (LAN): Wing LAN provides equipment at AMC bases to build an enhanced, robust, and reliable command-wide, intra-building wired and intra-base wireless networking infrastructure for command and control (C2) at AMC bases and operating locations. The Wing LAN infrastructure ensures connectivity with critical Air Force systems, such as the Information Transport System (ITS), Objective Wing Command Post (OWCP), Global Combat Support Systems (GCSS), Global Decision Support System (GDSS), and Consolidated Air Mobility Planning System (CAMPS) as well as infrastructure for Land Mobile Radio (LMR) systems providing intra-base command and control, base security, emergency management, flightline operations/maintenance, and crash response.
b. DEPLOYED SATELLITE COMMUNICATIONS (DSATCOM): Funding provides C2 communications capabilities for deployed Mobility C2 Forces and Mission Support Team C2 operations. These operations rapidly install mission support communications at austere base locations where communications to support air mobility operations is nonexistent or insufficient. The DSATCOM program is the primary funding vehicle for procuring communications equipment supporting these components. The resources directly support C2 and In-Transit Visibility (ITV) of deployed and enroute personnel, aircraft, and cargo providing critical communications to Contingency Response Groups (CRG). CRGs are self-sufficient groups of multi-skilled, highly-trained Airmen, representing different Air Force specialty codes, who can rapidly deploy anywhere in the world with little notice to open air bases for any follow-on mission.

The AN/TSC-159A Hard-side Expandable Lightweight Air Mobile Shelter (HELAMS) is the primary weapon system providing this support. It is a rapidly deployable, self-contained C2/ITV command center. This shelter functions as the base command post during the initial phases of airbase build-up. It contains integrated communications equipment such as radios, computers, printers, and fax machines. Shelters currently in use are at end-of-life.
c. FUEL EFFICIENCY PROGRAM. As a leading consumer of aviation petroleum, oils, and lubricants (AVPOL), AMC tanker and airlift platforms require industry software solutions that provide the means for increased fuel efficiency. AMC will modernize the Advanced Computer Flight Plan (ACFP) system, integrate a ground-based flight planning solution system into ACFP and augment this component with an additional airborne component that can be used during mission execution. The software efforts will provide the means to plan accurate fuel loads for the aircraft and also ensure proper power settings, altitudes, and descent profile adjustments in flight.

## P-1 Line Item Nomenclature:

## 29 - MOBILITY COMMAND AND CONTROL

ID Code (A=Service Ready, B=Not Service Ready) : A
Program Elements for Code B Items:
Other Related Program Elements:
2. AIR FORCE SPECIAL OPERATIONS COMMAND (AFSOC) TACTICAL COMMAND AND CONTROL (TAC C2) PROGRAM: AFSOC TAC C2 program purchases enhanced communication systems and equipment essential for Special Tactics (ST) combat controllers, pararescue personnel, combat weather operators, and tactical air control parties to perform their mission. The ST operators use this equipment to gather and transmit assault zone suitability and weather data and to perform tactical airfield/assault landing/drop zone operations. Funding for this effort is in program element 0408011 F .
3. Mobility Air Force Distributed Mission Operations (MAF DMO). Supports the modification and enhancement of high fidelity MAF aircrew training and support systems to ensure full employment of DMO capabilities to meet combat readiness training needs. Use of enhanced DMO-capable trainers provides a cost-effective means of conducting daily training, mission rehearsal, joint force exercise, and tactics development activity. Funding for this effort is in program element 0401897F.

## Description:

The Air Force (AF) Physical Security Systems program provides turnkey procurement, installation, integration, and acceptance testing of base defense physical security systems to protect aircraft, to include remotely pilot aircraft and infrastructure required to operate them, missiles, nuclear weapons, and other critical war fighting resources on more than 200 installations worldwide to include active AF, Air Force Reserve, and Air National Guard installations as well as numerous expeditionary, temporary, and semi-fixed locations. At some locations, the AF has a need to provide initial physical security systems. At other locations, there is a continuing need to upgrade and modernize existing physical security systems presently installed at fixed sites worldwide. These existing systems must be replaced or upgraded approximately every five years, depending on environmental conditions, type of sensor, and availability of spare parts due to technical obsolescence. The program funds modern security systems such as, but not limited to, Intrusion Detection Systems (IDS); Visual Detection and Assessment Systems (VDAS), ground surveillance radar systems; explosive detection systems; physical delay and/or denial systems; fence-mounted sensor systems which can include integration into an existing fence, refurbishment/replacement of an existing fence or initial installation of a fence; access control systems; identity management systems; and annunciator/data fusion systems that provide comprehensive battlespace awareness. The program also funds night vision/reconnaissance, surveillance and target acquisition technologies required for Air Force Security Forces personnel to engage enemy forces twenty-four hours a day under conditions of degraded visibility due to darkness, adverse weather, battlefield obscurants, foliage and man-made structures. These devices enable near to long range target acquisition, identification and engagement to include significant fratricide reduction, which improves battlefield command and control in "around the clock" home station and combat operations. It focuses on technology that can bring an immediate improvement to the mounted/dismounted Airman's equipment. It develops or enhances equipment that provides the individual Airman day/night situational awareness and individual targeting capability. Program funds are also used to pay for power and communication infrastructure and other IDS support requirements (e.g. HVAC for temperature control within server and annunciator control rooms). IDS are required for Protection Levels (PL) 1-4 assets and facilities (ex. AF aircraft parking areas). The program will respond to transient and on-going security threats and provide tactical, semi-permanent and fixed site security systems which may require design \& engineering, installation, infrastructure and allied support, integration, acceptance testing, modeling and simulation, training, Multiple Integrated Laser Engagement System (MILES) Gear, and interim contractor support. This program also directly supports the Homeland Defense elements of antiterrorism, counterterrorism, critical infrastructure protection, intelligence, and consequence management. Other physical security delay/denial systems funded in this program include remotely operated mobile sensor systems to include directed energy weapons for force protection applications, non-lethal weapons, and remotely operated weapons mounting \& fire control systems. This program also funds testing of physical security systems and equipment at various test locations.

System Cost
*Item Nomenclature
Justification:

 systems such as ground surveillance radar and unmanned ground/airborne surveillance systems.

 effort is in Program Element (PE) 0207588F.

 that have been evaluated as potentially soft targets for terrorist attacks. Funding for this effort is in PE 0208047F.

 systems. Nuclear Weapon Storage Areas (WSAs) are located throughout the CONUS and vault storages areas at main operating bases in Europe. Funding for this effort is in PE 0207589F.

 interior security system at WSAs. Funds provide security upgrade planning at various other WSAs and priority AF locations. Funding for this effort is in PE 0101122 F .

 enhance nuclear security and correct long-standing deviations. Funding for this effort is in PEs 0207589F and 0207588F.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications <br> Equip / BSA 4 : Spcl Comm-Electronics Projects

P-1 Line Item Nomenclature:
30 - AIR FORCE PHYSICAL SECURITY SYSTEM

|  | ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: |
| :--- | :--- | :--- |

c. MINUTEMAN SQUADRON SECURITY: Funds procurement of intrusion detection sensors, alarm annunciators, and surveillance systems required to maintain and replace critical Minuteman warhead
storage security command and control subsystems that can no longer be supported. Funding for this effort is in PE 0101213F.
3. NON-STRATEGIC SECURITY SYSTEMS: Force protection security equipment reduces risk to AF personnel, nonnuclear PLs 1-4, weapon systems and facilities at AF, ANG and AFR installations. This includes protection of flightlines (mass and dispersed aircraft parking areas, runways, controlled movement areas, etc.), critical support facilities, infrastructure, personnel and perimeters of restricted areas, controlled areas, and installation perimeters. DoD downsizing, reductions in forward basing, and aircraft technology advances elevated AF weapon systems into increasingly valuable national power projection capabilities. However, the security afforded most AF aircraft, associated personnel, and facilities have not kept pace with potential threats. Funding for this effort is in PE $0207589 F$.
a. BASE PHYSICAL SECURITY SYSTEMS (BPSS): Reduces the risk to AF personnel, weapon systems, and facilities. DoD downsizing, reductions in forward basing, and aircraft technology advances evolved AF weapons systems into increasingly valuable national power projection capabilities. However, the security afforded most AF aircraft and associated personnel and facilities in terms of equipment or manpower has not kept pace with the changing world environment, state-of-the-art technology and potential threats. Force Protection BPSS contracts enable the AF to meet both BPSS and flightline security requirements in accordance with the Aerospace Expeditionary Force concept. FY13 funding procures, tests, and installs equipment including a variety of sensors,sensor platforms, unmanned air and/or ground vehicles, assessment devices and communication equipment to meet a broad range of intrusion detection needs (mobile, semi-permanent/expeditionary and fixed, perimeter, tactical and flightline).
b. FIXED SITE SECURITY: Projects support long-term physical security requirements in the face of enduring and emerging threats. Critical assets at AF installations worldwide require permanently installed IDS and access control systems. Detection and access control systems integrate alarms, sensors, entry control, identity management functions, and annunciators into consolidated packages in support of priority resource protection. This effort funds integration of Transformational Technology Insertion, to fully leverage existing government owned equipment to enhance SF unit's capability to see, understand, and act first to defeat threats. This is accomplished through the successful integration of long and short range ground based radar, long and medium range thermal imagers, and other relevant sensor data into one common operating picture.

OVERSEAS CONTINGENCY OPERATIONS
4. FIXED SITE IDS: FY12 funds procure fixed site IDS for Protection Level $2 / 3 / 4$ resources at AI-Udied AB (Qatar), AI-Dhafra AB (UAE), and Ali AI Salem AB (Kuwait). These USCENTCOM bases are programmed for long term/enduring use and currently have a mix of Expeditionary TASS and IDS packages which lack interoperability with contiguous IDS and future upgrades. Permanent fixed site IDS solutions will integrate disparate sensor systems and ensure required security standards are met for critical war fighting assets located at enduring bases. Funding for this effort is in PE 0207589F.

Items requested in FY13 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

Remarks:
(1) This line is comprised of multiple procurement actions of low quantity purchases with the aggregate cost of each individual project totaling less than $\$ 5 \mathrm{M}$.
(2) Funds multiple procurement actions of low quantity purchases of tactical equipment for deployable logistic details.
(3) Projects range in cost between $\$ 8,000,000$ and $\$ 20,000,000$. Unit cost displayed represents the average cost of all projects.
(4) FY10 funding mitigates nuclear deviations and vulnerabilities, to include delay/denial technologies, across the nuclear enterprise.
(5) Projects range in cost between $\$ 250,000$ and $\$ 5,000,000$. Unit cost displayed represents the average cost of all projects.
(6) FY11 funding total includes $\$ 25,000,000$ to install security systems at 2 NATO storage sites.
(7) FY12 funding total includes $\$ 25,000,000$ to install security systems at 2 NATO storage sites.
(8) FY12 funding includes $\$ 26,420,000$ for fixed site security solutions for facilities supporting PL $2 / 3 / 4$ resources.
(9) FY13 funding includes $\$ 3,976,000$ for Integrated Commercial Intrusion Detection System (ICIDS) at Joint Base Elmendorf-Richardson.
(10) FY13 funding includes $\$ 22 \mathrm{M}$ for reconnaissance aircraft security system.

## Description:

 interoperability among service ranges, the encryption of range/aircraft data links, and associated communication devices.

 will be used to field P5CTS replacing legacy systems at Air Force installations and Air National Guard (ANG) Combat Readiness Training Centers.

 provisions include the capability to monitor and control an extended, realistic target environment for simulated ordnance delivery and aircrew training for airborne laser designators.
3. ELECTRONIC COMBAT THREAT SYSTEMS UPGRADES (PE 0207429F):
a. JOINT THREAT EMITTER (JTE): This Air Force program provides state-of-the-art surface-to-air missile (SAM) threat simulation incorporating commercial technology into a modular architecture to maximize diverse capabilities and configurations for joint aircrew training. A transportable single reprogrammable unit provides multiple (up to 3) threat presentations, realistic aircraft tracking simulation, and video feedback debrief functions. JTE is designed to reduce range operations and maintenance requirements of legacy systems. Increment I provides realistic electronic warfare training by simulating electronic combat signals produced by surface to air missile and anti-aircraft artillery threats. JTE Increment II (JI2) will provide next-generation realistic electronic warfare training by simulating electronic combat signals produced by surface to air missile and anti-aircraft artillery threats.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 4 : Spcl Comm-Electronics Projects

P-1 Line Item Nomenclature:
31 - COMBAT TRAINING RANGES

ID Code (A=Service Ready, B=Not Service Ready) : A Program Elements for Code B Items:
Other Related Program Elements:
b. LEGACY RANGE THREAT SYSTEMS (RTS): This program modifies and upgrades multiple Legacy RTS to extend the serviceable life of the systems including Miniature Multiple Threat Emitter System (Mini MUTES) modernization program; Multiple Threat Emitter System (MUTES); Modular Threat Emitter (MTE); tactical radar threat generator; Threat Reaction Analysis Indicator System (TRAINS); Unmanned Threat Emitter (UMTE) modernization, and band simulators and associated mission support to these systems.
c. UNMANNED THREAT EMITTER (UMTE): This Air Force program simulates SAM and Anti-Aircraft Artillery (AAA) threats. The system is a threat representative emulator used on combat training ranges to expose pilots to EW threats during mission preparation and rehearsal.
4. RED FLAG AK-PARC UPGRADES: No FY13 funding requested.
5. AGGRESSOR OPERATIONS (PE 0207218F): Funding supports Aggressor operations and are used for the procurement of equipment and materials to provide electronic warfare training for aircrews. Equipment includes the advanced capabilities pod utilized in air-to-air training; spare equipment; and ground support equipment. Procures equipment and systems for the 527 th Space Aggressor Squadron at Schriever AFB, CO. These systems and subsystems will enable the squadron to replicate potential adversary's systems, strategy, doctrine, and tactics for denying space services during Combat Air Force exercises, training, and testing to enhance US space superiority and force readiness. Systems planned for procurement includes radio frequency and GPS jammers as well as satellite communication (SATCOM) systems.
a. F-16 AGGRESSOR OPERATIONS: No FY13 funding requested.
b. F-15 AGGRESSOR OPERATIONS: No FY13 funding requested.
c. SPACE AGGRESSOR OPERATIONS: No FY13 funding requested.
6. NEVADA TEST AND TRAINING RANGE AND UTAH TEST AND TRAINING RANGE IMPROVEMENTS AND MODERNIZATION (PE 0207428F): No FY13 funding requested.
7. TARGET CONTROL SYSTEMS (TCS) MODERNIZATION (PE 0305116F): This effort is a new start in FY13. Target control system such as the Gulf Range Drone Control System (GRDCS) provides precise control and location tracking of aerial targets used for air-to-air missile development tests and evaluation programs, as well as tracking of shooters and launched missiles. Funding requested to procure modernized subsystems and pods that provide over-the-horizon capability compatible with the GRDCS. This procurement supports the TCS modernization effort.

## Justification:

FY13 ACTS Upgrades (P-5) \$4.378M continue fielding P-5 Combat Training Systems and upgrades to include range improvements and software system upgrades.
FY13 ACTS Range Improvements $\$ 3.191 \mathrm{M}$ continues procurement and fielding of Joint Advanced Weapons Scoring System (JAWSS) systems on CAF ranges.
 improvements supporting installation and unit mission requirements.

FY13 Target Control System Modernization (NEW START) $\$ 0.795 \mathrm{M}$ intitiates improvements to the control systems supporting drone operations.
 Air Force mission requirements.

## Description:

U.S. military forces operate in an information age where the need for precise, instantaneous intelligence is increasing and expanding across the entire spectrum of military operations. However, this increasing technical sophistication leads to a dependency on technology that, in turn, may represent potentially crippling vulnerabilities. The Air Force (AF) addresses these vulnerabilities through Information Operations (IO). IO includes those actions taken to gain, exploit, defend, and attack information and information systems. Information Warfare (IW) consists of actions conducted to attack an adversary's information and information systems while defending one's own.

 and C2W missions.

| ID Code (A=Service Ready, $B=$ Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- | :--- |

 procure equipment and tools for the following:

 the advantage within cyber relevant windows of opportunity. This effort is funded in PE 0208021F.

 Qualification training for AFSPC, 24AF (AFCYBER), the 67 NWW, 688 IOW, and the 689 CCW; as well as the Air Operations Center IO Teams. This effort is funded in PE 0208021F.
 influence operations, electronic warfare, command and control warfare, security, foreign systems and technology to support Air Force major commands and joint/national decision makers.

 0208021F
 processors and storage capacity must be added to JIOWC analysis networks and systems to improve performance of IO computer models.
b. COMBAT ANALYSIS SYSTEM: Funding provides field commander support systems, including automated support systems for IO training.

d. COMPUTER TRAINING SIMULATION: Funding provides for computer hardware, which hosts IO planning analysis tools used for training at centers worldwide.

## Appropriation / Budget Activity / Budget Sub Activity:

3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications

32-C3 COUNTERMEASURES
Equip / BSA 4 : Spcl Comm-Electronics Projects
ID Code (A=Service Ready, B=Not Service Ready) : A

## Program Elements for Code B Items:

Other Related Program Elements:
e. IO RED TEAM SUPPORT: IO red team support consists of periodic evaluation of the defensive readiness of units, headquarters, and direct reporting units. The support team participates as the aggressor unit in operational test, training and exercise events. It also develops policies and procedures for conducting red team assessments in concert with appropriate organizations, such as major commands, who have overall responsibility for the effective implementation of defensive counter information vulnerability assessments of commands.
4. AIR FORCE INTEL ANALYSIS AGENCY (AFIAA): AFIAA provides tailored substantive intelligence assessments and imagery products for SecAF, CSAF and staffs. Directs and manages all overhead imagery requirements for civil air analysis, global Tactics Analysis, effects based characterizations for operational course of action development. AFIAA was previously under AIA and is now a component of the Intelligence Directorate at the Air Staff (HAF/A2).
a. SENSOR HARVEST: This program is a Command and Control Warfare (C2W) and information tool designed to support strategic and operational planners. Funding provides upgrades of critical computers, processing systems and infrastructure to support holistic IO and nodal analysis in support of unique aspects of targeting that enable the shift from conventional to IW/C2W targeting.

Items requested in FY13 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Description:

 provide the key support foundation for the Air Force's global engagement strategy and capabilities through GCSS-AF.

 through deployable and standard CMOS architectures. Procurement funding for CMOS is in Program Element (PE) 0708012F, Logistics Support Activity.

 Management Information Systems (FMIS) Development.

FIRST is fully deployed and moving into sustainment and will be funded within PE 0308610F.

| Appropriation / Budget Activity / Budget Sub Activity: |
| :--- |
| 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications |
| Equip / BSA 4 : Spcl Comm-Electronics Projects |

P-1 Line Item Nomenclature:
33 - GLOBAL COMBAT SUPPORT SYSTEM - AIR FORCE FAMILY OF SYSTEMS

| ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- | :--- |

receivables, cost and revenues, and fiduciary reporting. DEAMS is compliant with the Clinger-Cohen Act, Business Enterprise Architecture (BEA), and integrates into Global Combat Support System-Air Force (GCSS-AF).

DEAMS Increment 1 Technology Demonstration has been released to Scott AFB, Illinois and will mature the technology demonstration solution to achieve functional stability, deployment experience, infrastructure improvement, and business process optimization. Release 1 Deployment will deliver capability to Air Mobility Command (AMC) without Transportation Working Capital Funds (TWCF) and Release 2 will deliver capability to AMC with TWCF. Release 3 will leverage COTS capabilities within Oracle R12 to refine FM business processes and optimize the DEAMS solution in preparation for mass deployment and will involve a re-host to leverage the latest DoD infrastructure technologies. Release 4 will deliver capability for USTRANSCOM operations integration with AF AMC, Army's Surface Deployment and Distribution Command (SDDC), and will provide data interface with the Navy's Military Sealift Command. An Initial Operational Test and Evaluation (IOT\&E) will be performed on the Increment 1 solution prior to a Full Deployment Decision (FDD) in Release 5. FDD approval will authorize Release 5 deployment to Continental US (CONUS) locations and Release 6 deployment to Outside of Continental US (OCONUS) locations.

Procurement funding for DEAMS is in PE 0901538F, Financial Management Information Systems (FMIS) Development.
4. EXPEDITIONARY COMBAT SUPPORT SYSTEM (ECSS): ECSS utilizes a Commercial-Off-The-Shelf (COTS) Enterprise Resource Planning (ERP) application to replace wholesale and retail legacy logistics Information Technology (IT) systems. ECSS is a component of the larger Expeditionary Logistics for the 21st Century (eLog21) systems architecture and consists of modules that will streamline and integrate financials, order management, purchasing, inventory management, distribution, and other business functions of the Air Force onto one platform. Use of ERP/COTS products will provide the warfighter and the AF enterprise with DoD and industry best business practices and capabilities, including product support \& engineering, supply chain management, expeditionary logistics Command \& Control, acquisition \& procurement, and maintenance, repair and overhaul. ECSS will comply with the DoD IT Standards Registry (DISR), Business Enterprise Architecture (BEA), Chief Financial Officer (CFO) Act, and the Joint Financial Management Improvement Program (JFMIP). ECSS supports Financial Improvement and Audit Readiness (FIAR). ECSS will reside on the Global Combat Support System-Air Force (GCSS-AF) Integration Framework (IF). FY11-13 efforts include: requirements/gap analysis, business process reengineering, data cleansing, solution development, piloting, initial operational test and evaluation (IOT\&E), organizational change management, training, IOT\&E site preparation, risk reduction activities, and logistics modernization/remediation activities to achieve FIAR compliance for legacy systems. Procurement funding for ECSS, in FY11 - FY13, is in PE 0708610F, Logistics Information Technology.
5. GLOBAL COMBAT SUPPORT SYSTEM-AIR FORCE (GCSS-AF): This program element encompasses GCSS-AF's Integration Framework and its presentation layer for operational users. As the customer interfaces on GCSS-AF, the presentation layer provides the worldwide standard security and single sign-on for accessing a variety of functional systems. The framework uses additional security features of Public Key Infrastructure (PKI) and AF Directory Services, negating duplication of security features in each of the functional systems being modernized within the GCSS-AF FOS. This effort procures application, security, web, and proxy servers, software and associated licenses, and engineering support. Previous procurement funding was in PE 0303141F, Global Combat Support System.

Items requested in FY13 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

Justification:

 intelligence. FY13 funding will continue fielding TBMCS FL Spiral 1.1.3 Maintenance Release 2 to 35 locations (25 AD/5 ANG/5 AFR). Funding for this effort is in PE 0207410F.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications <br> Equip / BSA 4 : Spcl Comm-Electronics Projects

P-1 Line Item Nomenclature:
34 - THEATER BATTLE MANAGEMENT C2 SYSTEM

| ID Code ( $A=$ Service Ready, $B=$ Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- |

a. TBMCS FL PROGRAM MANAGEMENT ADMINISTRATION (PMA): FY13 funding includes provisions for government contract oversight, technical expertise, and program office support associated with the fielding of TBMCS FL.
b. TBMCS FL TRAINING \& FIELDING: FY13 funding will support Type 1 training \& fielding. As contractors field the TBMCS FL upgrades, they will provide specialized training at each location.
c-e. TBMCS FL Spiral 1.1.3: FY13 funds will be used to procure hardware and associated software licenses for fielding to various sites.
2. UNIT LEVEL/UNIT COMMAND AND CONTROL (UL/UC2): Provides the wing and base commanders, and their battle staffs with timely and accurate information for effective decision making. UL/UC2 also provides secure, automated, deployable, and distributed wing-level command and control system with connectivity to TBMCS Force Level systems. UL/UC2 has operations and intelligence configurations. FY13 funding will support fielding UL/UC2 Increment 2 to 47 active duty locations. Funding for this effort is in PE 0207410F.
a. UNIT LEVEL/UNIT COMMAND AND CONTROL HARDWARE AND COMMERCIAL-OFF-THE-SHELF (COTS) SOFTWARE: FY13 funds will replace clients, servers, miscellaneous hardware, and associated software licenses for UL/UC2 sites.
b. UNIT LEVEL/UNIT COMMAND AND CONTROL PROGRAM MANAGEMENT ADMINISTRATION (PMA): FY13 funding includes provisions for government contract oversight, technical expertise, and program office support associated with the fielding of UL/UC2. Additionally, FY13 funding will support Type 1 training \& fielding. As contractors field the UL/UC2 upgrades, they will provide specialized training at each location.
3. PERSONNEL RECOVERY COMMAND AND CONTROL (PRC2): Provides PRC2 services supporting all Combatant Commands and Services. Capabilities include web-based access to isolated personnel reports for all DoD personnel, C2 tools for performing command and control of recovery efforts for downed airmen/isolated ground troops, and rapid identification of personnel in distress (for example, those using a 406 MHz beacon locator). PRC2 is used within AOCs, Joint Personnel Recovery Centers, and Rescue Coordination Centers to provide the capabilities and services for planning and executing recovery of isolated personnel, and rapidly disseminating time-sensitive personnel recovery information. Funding for this effort is in PE 0207410F.
a. PERSONNEL RECOVERY COMMAND AND CONTROL HARDWARE AND COTS SOFTWARE: FY13 funds will procure various hardware pieces and associated software licenses for fielding to various sites.
b. PERSONNEL RECOVERY COMMAND AND CONTROL PROGRAM MANAGEMENT ADMINISTRATION (PMA): FY13 funding includes provisions for government contract oversight, technical expertise, and program office support associated with the fielding of PRC2.

Items requested in FY13 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## P-1 Line Item Nomenclature:

34 - THEATER BATTLE MANAGEMENT C2 SYSTEM

Date: February 2012

## Item Nomenclature:

THEATER BATTLE MANAGEMENT C2 SYSTEM
 1.1.3 (ANG); e. TBMCS FORCE LEVEL, SPIRAL 1.1.3 (AFR):

Varying quantities and unit costs due to number/types of equipment being procured for specific sites.
The footnote below applies to the following items: a. UL/UC2 HARDWARE AND COTS SOFTWARE:

MULTIMAX, Largo, MD; and NCI Information Systems, Reston, VA. Award/delivery dates reflect date of first award and delivery.
The footnote below applies to the following items: $b$. UL/UC2 PROGRAM MANAGEMENT ADMINISTRATION (PMA):
 support.
 1.1.3 (ANG); e. TBMCS FORCE LEVEL, SPIRAL 1.1.3 (AFR):

Specs Avail. date: Program purchases latest versions of COTS hardware available for delivery
The footnote below applies to the following items: a. TBMCS FORCE LEVEL PROGRAM MANAGEMENT ADMINISTRATION (PMA):
 schedule support.
The footnote below applies to the following items: $b$. TBMCS FORCE LEVEL TRAINING \& FIELDING:
TBMCS Force Level Training and Fielding is being accomplished under a series of Work Orders with Ogden Air Logistics Center who provides system support, fielding and training
The footnote below applies to the following items: c. TBMCS FORCE LEVEL, SPIRAL 1.1.3 (AD); d. TBMCS FORCE LEVEL, SPIRAL 1.1.3 (ANG); e. TBMCS FORCE LEVEL, SPIRAL 1.1.3 (AFR):

 Austin, TX; CENTECH, Montgomery, AL; MULTIMAX, Largo, MD; and NCI Information Systems, Reston, VA. Award/delivery dates reflect date of first award and delivery.
The footnote below applies to the following items: a. PRC2 HARDWARE AND COTS SOFTWARE:

 fielding include Technical Refresh, Recurring Events (RE's) and Integrated Air \& Missile Defense (IAMD).

 accomplished, each site is unique and requires its own specifically designed site-engineered fielding plan and associated hardware, which drives differences in site specific (i.e. unit) costs.

 extensive fielding of complex recurring events to all AOC entities currently supported on the 10.1 baseline. Funding for this effort is in program element (PE) 027410 F .
a. INCREMENT 10.1 FIELDING: FY13 funds may be used to support distributed AOC enterprise efforts, which may include fielding an AF AOC and an Operational Support Center (OSC).

 differences in site specific requirements. Therefore, there is no meaningful way to measure quantities as the technical refresh of each site is significantly different.

 RE to each site is significantly different.

 developed in using FY12 RDT\&E funds from PE 0207410F, Project Number 675117 Integration Development.
2. PROGRAM MANAGEMENT ADMINISTRATION (PMA): Funding for this effort is in PE 0207410F. The breakdown of this activity includes the following:
 AOC weapon system.
 documents for the AOC WS. The funds will also be used to maintain the AOC WS technical documentation in a common location.
c. TRAINING: FY13 funds will be used to provide initial cadre instruction for installation and difference training related to operating and supporting the fielded AOC WS.

## Description:

1. Prior to FY11, AIR FORCE Intranet (AFNET), Information Transport System (ITS), and Voice Switching System (VSS) programs were included as part of the overall Combat Information Transport System (CITS) program (program element 0303112F WSC 835070 funding line). The AF Service Acquisition Executive directed a re-structure of the CITS program. As part of this re-structure, AFNet, ITS, and VSS funding is identified as a separate line item in the FY11 budget. The following activities have transferred for $\mathrm{FY} 11+$ as indicated:
A. INFORMATION TRANSPORT SYSTEM (ITS): Requirements transferred to Information Transport System (ITS) P-1 Line.
B. AIR FORCE INTRANET (AFNET) (Formerly NM/ND): Requirements transferred to AIR FORCE INTRANET (AFNET) P-1 Line.
C. VOICE SWITCHING SYSTEM (VSS): Requirements transferred to VOICE SWITCHING SYSTEM (VSS) P-1 Line.
2. BASE INFORMATION INFRASTRUCTURE (BII): In addition to the changes mentioned above, starting in FY12 all the efforts previously reported under the BII budget effort (save one) have moved to one of the following budget lines: Information Transport System, AFNet, and Voice. These efforts included infrastructure licenses, help desk, and AF comm mods. The one effort left in this budget line is the Information Transport System (ITS) Support effort. This effort will be described under the Information Transport System budget line beginning in FY13.

ITS SUPPORT: Provides complete system life cycle support for all ITS fielded systems in accordance with Life Cycle Management Plans (LCMPs) and planning, including both hardware and software. Lifecycle support includes but is not limited to: (1) providing: modernization planning, capacity planning, acquisition planning, product integration, system optimization, updating system architectures, acquisition reporting, software patch management, enterprise license management, patch testing/validation, mission operations support, warehouse for equipment, shipping to fielded locations, and maintaining system Certification and Accreditation, and (2) procuring: COTS hardware and software equipment for technology modernization, break/fix actions, vendor warranties and support agreements with base and governmental agencies as required to accomplish support activities at fielded locations.

## Remark:

AFNet Inc 2 QTYS realigned across the FYDP due to HAC/SAC reductions. FY13 implements the new security architecture for the SIPRNet.
AFNet Inc 3 QTYs in FY12 include 5 AETC, 23 AFSPC, 45 PACAF, 5 AF Global Strike Command, 16 ACC, 3 AFDW, 18 AFMC, and 12 USAFE migrated bases/sites. FY13 includes 4 ACC, 8 AFMC, 2 AFSOC, and 60 USAFE migrated bases/sites.
AFNet Support QTYs now roll-up all items that previously were called out separately (AFNet Inc 1 and AFNet Legacy Support) in the Feb 2011 PDOC and an additional 3 AF guard bases.

## Description:

Prior to FY11, funding for this effort was described in the 'Base Information Infrastructure (BII)' budget line. Funding for this effort is in program element 0303112F

 support for the legacy voice switches and switching systems still active through the Air Force. VSS provides system support for critical telephony systems and appliances.

Defense Red Switch Network (DRSN): FY13 funds will procure upgrades for DRSN nodes to meet the mandated configuration and replaces end of life equipment throughout the Air Force. DRSN is required to ensure secure, reliable nuclear command and control throughout the Department of Defense, in addition to secure, reliable command and control of joint operations

FY13 funding will be used to upgrade mission critical DRSN switches to the mandated DISA configuration and fund the voice support efforts mentioned above.
Reduction in FY13 funding levels from previously reported levels is a result of the transition of hardware and software sustainment activities to operations and maintenance funding from this procurement line.
Items requested in FY13 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Description:

FY11 funding totals include $\$ 28,784,000$ appropriated for Overseas Contingency Operations

 procures critical communications and electronics equipment in direct support of ongoing Contingency operations across the AOR.

 current and future operations throughout the AOR. This effort is funded in program element (PE) 0201122F.

 The Phase 2 EoIP equipment requires replacement, along with technology refreshment, to meet evolving warfighter requirements. This effort is funded in PE 0207422F.

## Appropriation / Budget Activity / Budget Sub Activity: $\quad$ P-1 Line Item Nomenclature: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 5 : Air Force Communications

| ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- |

associated information assurance tools, land mobile radio standardization, joint radio relay upgrades, as well as deployed air traffic control and landing systems and navigational aid systems. All efforts are funded in PE 0201131F. Major FY13 procurement initiatives are detailed below:
a. AIR TRAFFIC CONTROL SYSTEMS FOR AFGHANISTAN: With the current operations and planned transition to Afghanistan control, Air Traffic Control Systems need modernization improvements and upgrades to meet current mission requirements and establish a sound foundation for the transition to Afghan control. The FY13 efforts will include purchasing Ground to Air Radios (GATR), Instrument Landing System (ILS) improvements, and radar improvements. If this is not funded, it will result in unsafe flying conditions for military and civil aircraft.
b. DEPLOYABLE Ku-BAND EARTH TERMINAL (DKET) MODIFICATIONS: This FY13 initiative will upgrade the remaining Ku-band satellite terminals (DKETs) to employ new satellite modem technology to gain $33 \%$ savings in satellite bandwidth usage. This multi-year effort transitions multiple employed deployable Ku-band satellite terminals (DKETs) to the Wideband Global SATCOM (WGS) as mandated by the Office of the Secretary of Defense. The upgrade will provide critical band-diversity for the users in the AOR and reduces the dependence on commercial Ku-band transponder leases. The transition is very important for effective C2 communications. Failure to fund will result in decreased capability to supply mission related video and voice communications to the warfighter.
c. Base Command, Control, Communications, Computers, and Intelligence (C4I) SUPPORT: This FY13 initiative will support asset positioning and upgrades to the CENTCOM Theater Posture Plan (TTP) enduring locations identified for post OEF operations. This effort combines prior year efforts (described in paragraphs d., e., g., h., i., j., k.) and will provide system upgrades to ensure communication cable infrastructure expansion, Emergency 911 services, DSN telephone switches, technical control facilities, and DOD CS 1000 phone switches, land mobile radios (LMR), and unclassified/classified data networks maintain current interoperability and information assurance certification requirements required by the Department of Defense and public law.
d. AL UDEID INFRASTRUCTURE EXPANSION: Several large tenant units are relocating to AI Udeid, and existing organizations continue to grow. The host nation has provided multiple new facilities for U.S. use, but these facilities do not have the infrastructure cabling. Funding requested in FY12 supported new tenants with communication services and utilizes the host nation-provided facilities, ultimately impacting base command and control and approved unit transition plans. No FY13 funding requested.
e. EMERGENCY 911 SERVICE: This initiative provides 911 service to Ali AI Salem AB, Kuwait and Manas AB, Kyprgyzstan in accordance with standards set forth in NFPA 1221. No FY13 funding requested.
f. AOR AIR SURVEILLANCE RADAR (ASR) IDENTIFICATION FRIEND OR FOE (IFF) UPGRADE: The current IFF capability is becoming logistically unsupportable at several sites across the AOR and a vital upgrade is necessary. Several upgrades have been done in FY11 and FY12. No FY13 funding requested.
g. DSN TELEPHONE SWITCH AL MUBARAK: This FY12 initiative funds a replacement DSN telephone solution for AI Mubarak AB. The Kuwaiti government mandated the relocation of the US Forces Compound at AI Mubarak. The switch replacement initiative provides customers DSN services during the relocation and minimizes the impact to the mission at AI Mubarak. No FY13 funding requested.
h. THUMRAIT INFRASTRUCTURE EXPANSION: Thumrait changed missions, transitioning from a War Reserve Material (WRM) location to an enduring Aerial Port of Debarkation (APOD) mission. This FY12 initiative extends the existing communication infrastructure to new facilities which could support the increase in personnel and facilities. The initiative is required to transition the base from tactical to sustainable COTS networks. No FY13 funds requested.
i. KANDAHAR ENCLAVE UPGRADES: The number of personnel and facilities at Kandahar continue to increase, as well as the increased usage of the Afghan Mission Network. According to Operational Plans (OPLANS), the amount of support required will have surpassed the capability of the existing AFCENT Tactical Communication Compound by FY12. The FY12 initiative addresses additional equipment and infrastructure required to provide C2 communications to US Forces serviced by the AFCENT communications networks on NIPRNET, SIPRNET, DSN, and CENTRIXS-ISAF. No FY13 funding requested.
j. NEW TECH CONTROL FACILITIES BAGRAM: The existing communications facilities must be relocated due to their proximity near an aircraft ramp's explosive ordnance arch. The FY12 initiative procures new electronics equipment for the new technical control facility and network communications center. Due to C 2 requirements, the existing equipment must remain operational until all the services transfer from the old to the new facility, and the new facility is completely operational (if the old equipment is shut down prior to the new equipment standup, it will cause complete loss of C2 communications for several days during the relocation). No FY13 funding requested.

 standard that meets current interoperability and information assurance certification requirements listed on the Approved Products List. No FY13 funding requested.

 funded in PE 0201122F. No FY13 funding requested.
5. SIPRNET STORAGE ARRAY NETWORK (SAN): FY11 OCO funding procured a SAN to expand and upgrade current capability at CENTCOM Forward Headquarters in Qatar.

 CENTCOM AOR.
 and Configuration Management Data Base (CMDB) Project for the CENTCOM AOR. The remedy system is used to track user trouble calls in the CENTCOM AOR.
8. SERVER LIFECYCLE REPLACEMENT: FY11 OCO funding procured life cycle replacement servers at CFH Qatar.

 contingency operations at Headquarters, USCENTCOM.

the command must be sustained and upgraded to meet the ever increasing demands of current, ongoing contingency operations. Without OPAF funding, the vital life cycle replacement of communications equipment directly supporting all C2 and C4 operations will be at significant risk and will catastrophically affect the ability of the ongoing contingency operational missions across the AOR.

JCSE: FY13 procurement dollars in the amount of $\$ 3.509 \mathrm{M}$ will procure communications equipment based on strategic planning guidance; which includes major upgrades to mobile satellite systems, Everything over Internet Protocol (EoIP), and COMSEC equipment. Current employed commercial-off-the-shelf, EoIP, and satellite terminal equipment is approaching the end of its 6 -year life cycle and needs to be replaced. The Phase 2 EoIP equipment requires replacement, along with technology refreshment; to meet the modernization program goals which include meeting emerging real-world operational requirements with improved capabilities, smaller footprint, reduced operations and maintenance costs, and seamless integration with the global information grid. Per the Planning Guidance, the AF is mandated to fund onethird of the fair share of JCSE's validated equipment modernization plan. JCSE's Modernization Program is built/restructured based on COCOM requirements and emerging technologies. Services influence JCSE's spending plan through recommendations in concert with Major Defense Acquisition Program (MDAP) schedules, ensuring that Service dollars meet Joint Service requirements.

USAFCENT: FY13 procurement funds in the amount of $\$ 24.921 \mathrm{M}$ will procure numerous C4 equipment items critically required for HQ USAFCENT, Shaw AFB, and the CAOC/AFFOR Staff, AI Udeid, Qatar, to effectively conduct its communications support missions directly supporting CFACC C2 and all operational missions being conducted by the CFACC and Staff. The C4/IT supporting the CFACC's mission must be sustained and upgraded to meet the ever increasing demands from the ongoing contingency operations, and to be able to support contingency plans. Without OPAF funding, all C2 and C4 operations at USAFCENT locations will be at significant risk and will catastrophically affect the ability of the ongoing contingency air operational missions across the AOR.

Items requested in FY13 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

Remarks:
The footnote below applies to the following items: 1. USCENTCOM COMMAND AND CONTROL SYSTEMS (PE 0201122F):
Executed via MIPR to SPAWAR in Charleston, SC. \$25.1M time and materials contract \#N65236-07-D-6868 awarded to SAIC, San Diego, CA. Contracts
\#N65236-07-D-6868-051 also awarded to SAIC for engineering services; contract has one option year. Multiple contract methods and types used for additional smaller acquisition efforts.

 AL MUBARAK:

LLC, Annapolis, MD; Trident Systems Incorporated, Fairfax, VA; General Dynamics, Needham, MA; Lockheed Martin Integrated Systems, Inc, Sumter, SC; Award/delivery dates reflect date of first award and delivery.
The footnote below applies to the following items: 4. SOCCENT SUPPORT (PE 0201122F):
Executed via MIPR to NAVAIR, St Inigoes, MD with contract \#NVZR053714B.
 UPGRADE:

## Remarks:

_ 2013 Systems / Sunnyvale, CA
FY11 will upgrade the current Software Integration Facility to include development functionality for S2F2
The footnote below applies to the following items: 2.1 S2E2 Software Non-Recurring; 2.3 S2E2 System Test Environment; 2.5 S2E2 SMGT:
FY12 will procure the System Testing Environment (STE) for high fidelity DT\&E.
The footnote below applies to the following items: 2.1 S2E2 Software Non-Recurring; 2.4 S2E2 Integrated Maintenance Facility; 2.5 S2E2 SMGT; 2.6 S2E2 SMGT Integration \& Test
FY13 will procure 1 fully tested SMGT deliverable in Jul 2015.

ID Code (A=Service Ready, B=Not Service Ready) : A
Program Elements for Code B Items:
Other Related Program Elements: 0305164F, 0305165F, 0305265F

1. KEY DATA LOADING INSTALLATION FACILITY (KLIF)/GPS SECURITY DEVICE: FY13 funding provides for the programming of black key (cryptographic) algorithms into the Selective Availability Anti-

Spoofing Module (SAASM), providing an accurate positioning solution for GPS users using secure equipment. Funding will procure support for Key Data Processors (KDP), ensuring uninterrupted support to SAASM vendors. SAASM vendors are required to use government-provided KDP as part of the security architecture of GPS User Equipment. Funding for this effort is in PE 0305164F (GPS User Equipment).
2. DEFENSE ADVANCED GPS RECEIVER (DAGR): No FY13 funding requested.
3. Architecture Evolution Plan (AEP) Extension: No FY13 funding requested.
4. HANDHELD TESTING SUPPORT: No FY13 funding requested.
5. OCX: No FY13 funding requested.

Items requested in BY are identified on the following (P-5) and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Description:

The United States Nuclear Detonation (NUDET) Detection System (USNDS) provides a near real-time worldwide, highly survivable capability to detect, locate, and report any nuclear detonations in the earth's atmosphere or in near space. USNDS supports NUDET detection requirements across five mission areas: Integrated Tactical Warning and Attack Assessment (ITW/AA), Nuclear Force Management (NFM), Space Control (SC), Treaty Monitoring (TM) and a classified mission.

The USNDS program is jointly sponsored and funded by the Department of Defense (DoD), through the US Air Force, and the Department of Eneergy (DoE), through the National Nuclear Security Administration (NNSA) and its Nuclear Detonation Detection (NA-22) office, respectively. NNSA/NA-22 supplies, at no cost to DoD, NDS NUDET space sensors as Government Furnished Equipment (GFE) to the Air Force's USNDS Program Office (SMC/GPGN), who is responsible for all acquisition and systems engineering, integration and test (SEIT) activities on space vehicles, to include GPS and additional hosts, and their supporting ground control segments.

DoD funds their contribution to the NDS program in PE 0305913F with RDT\&E, Procurement and Operation \& Maintenance dollars. NDS payload integration onto GPS satellites is funded through the GPS Space \& Control Program Element (PE) 0305165F for GPS IIF spacecraft and GPS III Space Segment PE 0305265F for GPS III spacecraft.

USNDS consists of nuclear detection space sensors and ground control segments. The space segments consists of three sensor payloads: the Radiation Detection Capability (RADEC) payload for Defense Support Program (DSP) satellites, the Global Burst Detection payload for Medium Earth Orbit (MEO) platforms (GPS satellites) and the Space and Atmospheric Burst (SABRS) payload for Geosynchronous Earth Orbit (GEO) platforms. The GBD payload consists of optical, X-ray, and Electromagnetic Pulse (EMP) sensors. The SABRS payload consists of neutron, gamma ray, and space environmental sensors. Together these sensors in orbit on GEO and MEO platforms comprise the global NUDET detection capability for USNDS. Space Sensors communicate NUDET detection to the ground control segment which includes the Integrate Correlation and Display System (ICADS), Ground NDS Terminals (GNTs), and Universal Ground NDS Terminals (UGNTs). These ground systems perform data analysis and provide a decision support tool to the Air Force controllers concerning probability of NUDET occurrence. ICADS consists of two fixed ground terminals and GNT provides ground receiving, analysis, and reporting capabilities to national authorities, commands, and forward users. UGNT will upgrade GNT with survivable and endurable capabilities. The ground control segment is being modernized and continuously improved through an incremental evolutional acquisition approach.

## Description:

The Eastern Range (ER) at Patrick Air Force Base/Cape Canaveral AFS, FL, and the Western Range (WR) at Vandenberg AFB, CA, make up the Spacelift Range System (SLRS), also known as the Launch and Test Range System (LTRS). The SLRS provides tracking, telemetry, communications, command destruct, and other capabilities to safely conduct national security, civil and commercial spacelift operations; intercontinental and sea-launched ballistic missile evaluations; national missile defense tests; and aeronautical tests. Decreasing reliability of aging range equipment leads to higher operations and maintenance ( $O \& M$ ) costs and increased risk of launch delays.

The AF is addressing range shortcomings through modernization and sustainment efforts. Modernization addresses requirements to make the ranges more flexible, centralized, and capable of parallel operations to support evolving launch and test demands. Sustainment projects replace or upgrade aging equipment to be more reliable and sustainable. These efforts increase responsiveness to launch demands, enhance range safety, standardize logistics support, and reduce O\&M costs. Associated RDT\&E, AF funding is in program element 0305182F, Spacelift Range System, Project 674137 , LTRS Modernization. The AF is modernizing and sustaining range systems (command destruct; communications; range safety; meteorological; radar; telemetry; optics/imaging; data handling; planning and scheduling; timing and sequencing; and surveillance) as follows:

1) Range Standardization and Automation (RSA) Phase IIA contract completes WR Mission Flight Control Center and associated systems with FY11 funding by correcting operational and information assurance deficiencies and transitioning systems to operations. RSA IIA ended in October 2011;
2) Spacelift Range System Contract (SLRSC) procures and integrates modernized instrumentation systems, executes sustainment projects to correct equipment deficiencies and replace aging equipment (reducing reliance on diminishing manufacturing sources, eliminating single points of failure, and reducing support costs), and provides interim supply support, through early FY13;
3) Follow-on LTRS Integrated Support Contract (LISC), to be awarded in early FY13, will continue sustainment and logistics efforts done by SLRSC, in combination with operations and maintenance efforts previously done under separate contracts; and,
4) Separate Systems Engineering and Integration (SE\&I) contract consolidates and expands systems engineering efforts to provide requirements analysis, architectures/roadmaps, engineering management plans, interface control documents, etc., to guide modernization and sustainment efforts under SLRSC, LISC, and other AF and GSA contracts.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 6 : DISA Programs

ID Code ( $A=$ Service Ready, $B=$ Not Service Ready) : A
Program Elements for Code B Items:
Other Related Program Elements:
5) Other DoD and GSA contracts will modernize range communications networks, flight termination systems, and other range systems (e.g., radars and transportable telemetry/command systems). For range communications network and flight termination upgrades, use of other DoD and GSA contract vehicles will capitalize on ongoing efforts that address global information grid interface, information assurance, digital encryption, internet protocol usage, and obsolescence issues.

Justification:

1. SLRS MODERNIZATION:
 Mission Flight Control and ended in Oct 11 using FY11 funds.

 AF, DoD, and GSA contracts capitalizes on applicable experience and expertise these contracts offer.
 internet protocol version 6 (IPv6), via other AF, DoD, and GSA contracts, to capitalize on applicable experience and expertise offered by these contracts. No FY13 funds required.
 conversion to internet protocol version 6 (IPv6), via other AF, DoD, and GSA contracts, to capitalize on applicable experience and expertise offered by these contracts.
2. SLRS SUSTAINMENT:

 safety; communications; data handling; meteorological; optics/imaging; timing and sequencing; planning and scheduling; and surveillance. No FY13 funds required.
b) SLRS INTERIM SUPPLY SUPPORT: FY13 funds pay for interim supply support, to include supplies and associated interim supply support management, via SLRSC and LISC contracts.
c) OPERATIONAL SUPPORT: FY13 funds pay for operational space wing support to integration, test, and turnover of new systems via modernization and sustainment efforts.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications

P-1 Line Item Nomenclature:
45 - SPACELIFT RANGE SYSTEM SPACE
Equip / BSA 6 : DISA Programs
ID Code (A=Service Ready, B=Not Service Ready) : A Program Elements for Code B Items:

Other Related Program Elements:
d) SYSTEMS ENGINEERING AND INTEGRATION: FY13 funds continue independent, comprehensive systems engineering and integration efforts, to include systems architecture maintenance, interface control, configuration management, etc., to support SLRSC completion, transition to LISC, and use of other AF, DoD, and GSA contracts for network communications and flight termination system upgrades. SE\&I ensures modernization and sustainment efforts address operational requirements, launch enterprise transformation plans, and current OSD standards for net centricity, information assurance, digital encryption, internet protocols, global information grid interface, and test and training enabling architecture.
e) PROGRAM MANAGEMENT ADMINISTRATION (PMA): FY13 funds pay advisory and assistance services supporting the System Program Office (SPO) and indirect support to the SPO to include information technology, education, and training support.
f) FFRDC ENGINEERING SUPPORT: FY13 funds pay for FFRDC technical engineering support for AF management of modernization efforts and sustainment projects.
g) INFORMATION ASSURANCE: FY13 funds information assurance certification and authorization support to enable protected operation of new systems.

Items requested in FY13 are identified in the P-5s and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

Remarks:

- Unit quantities and costs vary widely for multiple types and configurations of equipment being procured under modernization and sustainment project cost elements each fiscal year.
- FY11/12 funding breakdown has changed since FY11 and FY12 President's Budgets due to technical delays, revised operational plans/priorities, and extended LISC preparations.

## Description:

FY 2011 funding totals include $\$ 4.3 \mathrm{M}$ appropriated for Overseas Contingency Operations.

 There are also research and development efforts related to some of these efforts, and that RDT\&E AF funding is also in PE 0303601F.

Justification:

 in PE 0303601F

a. GBS RECEIVE SUITES: The receive suites link users to information sources via GBS, offering near-worldwide service.
 teleport sites. Funds will procure equipment, integration and installation, upgrades, systems engineering, and PMA to meet user requirements for broadcast transmission via WGS.
c. JOINT Internet Protocol (IP) MODEM:
d. GBS RUCKSACK TERMINALS: These are man portable variants of the GBS terminals.
 enabled GBS receive suites.

to support intercepts from initial commit through final data uplinks to the defensive action vehicles. UEWR went operational in September 2007, began transition of hardware responsibility to the Air Force in
FY09, and will be completed in FY12.
 range, phased array radar whose primary mission is to provide USSTRATCOM with credible ITW/AA data on all SLBM and ICBMs penetrating the coverage area. The secondary mission is to support the SSA mission by providing the Space Surveillance Network (SSN) with metric observations and Space Object Identification (SOI) data on tasked satellites and objects. This one-of-a-kind system was developed in the early 1970's, and has operated continuously since 1977.

PARCS EVOLUTIONARY MODERNIZATION: PARCS Evolutionary Modernization program procures modifications to replace unsupportable and unreliable system components. PARCS equipment is composed of unique, custom-built components that became obsolete in the early 1980s. Most spare parts for this equipment are no longer available. Without these modifications there is a high risk that equipment failures will cause unacceptable mission downtime in order to troubleshoot and repair. FY13 will fund replacement of unsupportable PARCS equipment to include, but not limited to (1) Digital Data Group 2 (DDG 2), and (2) PARCS Mission Data Processor (PMDP) Tech Refresh. The DDG 2 project deploys the replacement Digital Data Group. The PMDP Tech Refresh replaces current end-of-life data processing equipment with the latest sustainable technology and equipment assembled for mission-critical requirements that require optimum availability and manageability.
b. PAVE PHASED ARRAY WARNING SYSTEM (PAVE PAWS): PAVE PAWS radar is a ground based system with missions to support the Missile Correlation, Space Surveillance and Missile Defense Centers. The primary mission is to provide United States Strategic Command (USSTRATCOM) with credible Integrated Tactical Warning/Attack Assessment (ITW/AA) data on all Sea-Launched Ballistic Missiles (SLBMs) penetrating the coverage area and predicted impact (L\&PI) data for attack assessment and response determination. The secondary mission is to provide credible data on all Inter-Continental Ballistic Missiles (ICBMs) penetrating the coverage area. The tertiary mission is to support the Space Situational Awareness (SSA) network providing near-earth satellite surveillance and tracking, reporting observational (metric), SOI on man-made satellites and maintenance of the space catalog to prevent the significantly increasing potential for collisions with national assets, including manned space platforms.

PAVE PAWS EVOLUTIONARY MODERNIZATION: The PAVE PAWS Evolutionary Modernization Program consists of modifications that replace obsolete or unsupportable system components and subsystems. The PAVE PAWS mission equipment and associated sustainment suites consist of a mix of unique, custom-built components, processors, and display system that are increasingly more difficult to maintain due to availability of replacement parts and obsolete COTS based subsystems that are no longer supported by the original equipment manufacturers. In addition, Sub-Array Power Supplies, Solid State Modules, Beam Steering Unit, and other radar front-end equipment are $30+$ years old, highly inefficient, and require replacement. Without these modifications there is a high risk that equipment failures will cause unacceptable mission downtime in order to troubleshoot and repair. FY13 will fund replacement of unsupportable EWR \& UEWR mission and sustainment equipment to include, but not limited to, the Silicon Graphics Inc.(SGI) Origin 3800 signal/data processors for Beale AFB, CA, sub-array power supplies (SAPS)and analysis \& display hardware.
c. CAPE COD UPGRADED EARLY WARNING RADAR (UEWR): The Cape Cod EWR located at Cape Cod Air Station, MA, is an Ultra High Frequency (UHF) radar that is planned to be upgraded as part of a joint effort alongside the Missile Defense Agency's (MDA) Clear EWR Upgrade at Clear Air Force Station, AK. The Cape Cod EWR upgrades include, but are not limited to, inclusion of the Cape Cod UEWR into the BMDS sensor architecture, improving BMDS sensor coverage and providing new engagement options against long range missile threats, the elimination of obsolescence issues currently facing AFSPC sustainment of the radar, and the improvement of UEWR and Site elements vital to the BMDS mission. The mod roll-up is shown on the P-5.
3. GROUND-BASED ELECTRO OPTICAL DEEP SPACE SURVEILLANCE (GEODSS) SERVICE LIFE EXTENSION PROGRAM (SLEP): The GEODSS SLEP will replace aging unsupportable mission critical sub-systems with modern sustainable components, allowing continued mission operations through 2025. GEODSS is a three-site optical telescope system dedicated to the Space Surveillance Network (SSN). The GEODSS sites, located in Socorro, New Mexico; Maui, Hawaii; and Diego Garcia (British Indian Ocean Territories), provide time-critical deep-space tracking information for the Joint Space Operations Center (JSpOC). The GEODSS SLEP will modernize the Sensor Controller, Communications, and Data processing Subsystems for the Maui and Diego Garcia sites. The program will replace the obsolete, diminishing supportable components of the GEODSS Sensor Controller Group (SCG) with sustainable hardware/software technology. FY13 funds Phase II SLEP mod kits to replace Data Processing Group(DPG) and Data Communications Group (DCG). Funding for this effort is in PE 0305940F.
4. JOINT SPACE OPERATIONS CENTER (JSpOC) MISSION SYSTEM (JMS): JMS provides integrated space situational awareness information and C2 of space forces for the Joint Functional Component Command for Space (JFCC-SPACE). It will allow CDRJFCC-SPACE to plan, direct, coordinate, and control operations of assigned forces. The JMS program will provide a net-centric, Services Oriented

| :--- | :--- | :--- | :--- |

Modifications include required procurement, nonrecurring engineering, installation, testing, configuration management, security, quality assurance and technical documentation. If not funded, down time and maintenance cost associated with repair of failed equipment will increase, lowering system operational availability

FY13 SLBM procurement will fund: replacement of unsupportable EWR and UEWR front-end equipment to include, but not limited to, the Silicon Graphics Inc.(SGI) Origin 3800 signal/data processors, subarray power supplies (SAPS), maintenance bench updates, and program office support.

FY13 Cape Cod UEWR funding will be used to support and accomplish the requirements of the upgrade. This includes, but is not limited to, the steps associated with integrating Cape Cod UEWR into the MDS sensor architecture, the resolution of obsolescence issues affecting AFSPC sustainment, the Cape Cod Environmental Assessment, and program office support.

FY13 GEODSS SLEP funding pays for Data Processor Group (DPG) and Data Communication Group (DCG) mod kits and other configuration items to upgrade the system as needed.
FY13 JMS funds procure COTS hardware, software, and warranties to tech refresh the operational and development enclaves ( 2 Secret, 2 TS/SCI).
FY13 NCSDS funds procure COTS hardware and warranties to tech refresh operational sidecars currently on Space Surveillance Network sensors.
Items requested in BY are identified on the following (P-5) and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Remarks:

Remarks:
(1) Quantity/unit cost data represents the average unit cost per installation site. Due to requirement variances between sites, there may be large unit cost data fluctuations between fiscal years.

## Description:

Funding procures GPS OCS commercial equipment that has become obsolete/unsupportable or requires upgrades. Funding will procure equipment for the OCS ground sites including the Master Contro Station (MCS), Alternate Master Control Station (AMCS), four Ground Antennas (GAs), six Monitor Control Stations (MCS), Contractor Lab Facility and Telecommunications Simulator Test Set (TSTS). Modifications include required procurement, non-recurring engineering, installation, testing, configuration management, security, quality assurance and technical documentation. If not funded, down time and maintenance costs associated with repair or failed equipment will increase, lowering system operational availability.

There are no FY13 OCO dollars in this effort.

## Description:

PAVE PHASED ARRAY WARNING SYSTEM (PAVE PAWS): PAVE PAWS radar is a ground based system with missions to support the Missile Correlation, Space Surveillance and Missile Defense Centers.
 (SLBMs) penetrating the coverage area and predicted impact (L\&PI) data for attack assessment and response determination. The secondary mission is to provide credible data on all Inter-Continental Ballistic Missiles (ICBMs) penetrating the coverage area. The tertiary mission is to support the Space Situational Awareness (SSA) network providing near-earth satellite surveillance and tracking, reporting observational (metric), SOI on man-made satellites and maintenance of the space catalog to prevent the significantly increasing potential for collisions with national assets, including manned space platforms.

PAVE PAWS EVOLUTIONARY MODERNIZATION - FRONT END: The PAVE PAWS Evolutionary Modernization Program consists of modifications that replace obsolete or unsupportable system components and subsystems. The PAVE PAWS mission equipment and associated sustainment suites consist of a mix of unique, custom-built components, processors, and display system that are increasingly more difficult to maintain due to availability of replacement parts and obsolete COTS based subsystems that are no longer supported by the original equipment manufacturers. In addition, Sub-Array Power Supplies, Solid State Modules, Beam Steering Unit, and other radar front-end equipment are $30+$ years old, highly inefficient, and require replacement. Without these modifications there is a high risk that equipment failures will cause unacceptable mission downtime in order to troubleshoot and repair. This effort will fund replacement of unsupportable EWR \& UEWR mission and sustainment equipment to include, but not limited to, sub-array power supplies (SAPS).

## Description:

PAVE PHASED ARRAY WARNING SYSTEM (PAVE PAWS): PAVE PAWS radar is a ground based system with missions to support the Missile Correlation, Space Surveillance and Missile Defense Centers. The primary mission is to provide United States Strategic Command (USSTRATCOM) with credible Integrated Tactical Warning/Attack Assessment (ITW/AA) data on all Sea-Launched Ballistic Missiles (SLBMs) penetrating the coverage area and predicted impact (L\&PI) data for attack assessment and response determination. The secondary mission is to provide credible data on all Inter-Continental Ballistic Missiles (ICBMs) penetrating the coverage area. The tertiary mission is to support the Space Situational Awareness (SSA) network providing near-earth satellite surveillance and tracking, reporting observational (metric), SOI on man-made satellites and maintenance of the space catalog to prevent the significantly increasing potential for collisions with national assets, including manned space platforms.

PAVE PAWS EVOLUTIONARY MODERNIZATION SGI - REPLACEMENT: The PAVE PAWS Evolutionary Modernization Program consists of modifications that replace obsolete or unsupportable system components and subsystems. The PAVE PAWS mission equipment and associated sustainment suites consist of a mix of unique, custom-built components, processors, and display system that are increasingly more difficult to maintain due to availability of replacement parts and obsolete COTS based subsystems that are no longer supported by the original equipment manufacturers. In addition, Sub-Array Power Supplies, Solid State Modules, Beam Steering Unit, and other radar front-end equipment are $30+$ years old, highly inefficient, and require replacement. Without these modifications there is a high risk that equipment failures will cause unacceptable mission downtime in order to troubleshoot and repair. This effort will fund replacement of unsupportable EWR \& UEWR mission and sustainment equipment to include, but not limited to, the Silicon Graphics Inc.(SGI) Origin 3800 signal/data processors for Beale AFB, CA.

## Description:

FY2011 funding totals include $\$ 8.2 \mathrm{M}$ appropriated for Overseas Contingency Operations.

 a Defensive Counterspace (DCS) program and Counter Communications System (CCS), and an Offensive Counterspace (OCS) program. Developmental funding for RAIDRS and CCS is in Program Element 0604421 F (PE), Counterspace Systems.

The RAIDRS program performs attack detection, geo-location, reporting, characterization, and mission impact assessment for US owned, operated, or used space systems. RAIDRS capabilities support the National Security Strategy of the United States. RAIDRS is focused on detecting, characterizing, geolocating and reporting satellite communications (SATCOM) radio frequency interference using currently existing commercial-off-the-shelf and government-off-the-shelf technology. The event information provided by RAIDRS will allow operators to identify possible interference against space capabilities and enable rapid employment of protective responses. Funding for this effort is in PE 0604421F.

The CCS program prevents adversaries from employing satellite communications against the United States and its allies. CCS is a ground-based transportable radio frequency (RF) jammer that interferes with adversary command and control (C2) and propaganda transmitted via satellite. CCS will be incrementally upgraded to add advanced techniques and additional target capabilities identified in the CCS Block 20 CDD. Funding for this effort is in program element 0604421F.

Ground-based Satellite Emitter Location Network's (GSELN) mission is to provide the intelligence community a ground-based electromagnetic interference (EMI) geolocation system for commercial and threat satellite communications. GSELN will operate utilizing current NSA and Air Force Intelligence, Surveillance, and Reconnaissance Agency's infrastructure located in key regions around the world. GSELN consists of multiple systems employing commercially available technology in conjunction with existing government equipment. GSELN expands upon the AF's RAIDRS capabilities, in that; it will include non-US communication EMI events. Funding for this effort is in PE 0604421F.

Justification:

1. RAPID ATTACK IDENTIFICATION DETECTION AND REPORTING SYSTEM (RAIDRS):
a. SITE PREPARATION AND ACTIVATION: No FY13 funding is requested.
b. INTERIM CONTRACTOR SUPPORT (ICS): Funding in FY13 provides one year of ICS.
2. COUNTER COMMUNICATIONS SYSTEM (CCS):
a. CCS BLOCK 10 UPGRADES: No FY13 funding is requested.
b. COUNTER COMMUNICATIONS SYSTEM (CCS) UPGRADE: No FY13 funding is requested.
 1st increment of P3I. The P3I is a multiple-increment upgrade for the CCS Block 10.

 Air Force mission requirements.

Exhibit P-5, Cost Analysis: PB 2013 Air Force

## Appropriation / Budget Activity / Budget Sub Activity:

 3080F / BA 3 / BSA 6
## P-1 Line Item Nomenclature:

 48-COUNTERSPACE SYSTEMSDate: February 2012
Item Nomenclature (Item Number, Item Name, DODIC):

1. Rapid Attack Identification Detection and Reporting System

| Resource Summary | Prior Years | FY 2011 | FY 2012 | FY 2013 Base | FY 2013 OCO | FY 2013 Total |

## Description:

FY11 funding totals include $\$ 2,552,000$ appropriated for OCO.
FY12 funding total include $\$ 9,445,000$ requested for OCO.
FY13 funding totals include $\$ 7,000,000$ requested for OCO.

 six Air Force Special Operations units, and six Air Support Operations Squadrons. Funding for this effort is in PE 0207422F.

 funds associated with this program are located 0207444F.

 continues to be instrumental in providing ground communications for TACPs during federal emergency relief operations and Homeland Defense initiatives.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 7 : Organization And Base

P-1 Line Item Nomenclature:
49 - TACTICAL C-E EQUIPMENT

ID Code (A=Service Ready, B=Not Service Ready) : A
Program Elements for Code B Items:
Other Related Program Elements:
3. TACTICAL RADIO SYSTEMS/JTRS: The Joint Tactical Radio System (JTRS) is a family of software programmable tactical radios that provide voice, data, and video communications for military users
in the air, on the ground, and at sea. Common radio architecture and programmable software waveforms will provide joint interoperability between the services. The JTRS program is built around an open system Software Communications Architecture (SCA), a critical set of rules that make software programmable radios function properly and ensure interoperability. Development funds are in Program Element 0604280N, Joint Tactical Radio Systems (JTRS). Funding for this effort is in PE 0207423F.

In 2005, the Department of Defense established the Joint Program Executive Office (JPEO). As such, the JPEO has full directive authority for all JTRS research, development, testing, and evaluation of waveforms, radios, common ancillaries, network management, and associated software.
4. BATTLEFIELD AIR OPERATIONS KIT (BAO Kit): BAO Kit will develop a Family of Systems (FoS) that provides a state-of-the-art Command, Control, Communications, Computer, Intelligence, Surveillance and Reconnaissance (C4ISR) suite for Air Force Special Operations Command's (AFSOC's) Battlefield Airmen. This program will develop and enhance technologies for Battlefield Airmen Combat Controllers (CCT) to recognize, identify, range, nominate and designate targets during both day and night. BAO Kit will also significantly reduce the time required to find, fix, track, target and engage the enemy by providing highly accurate target grid coordinates in three dimensions, generating target imagery both pre and post-strike, and transmitting target data to Command and Control centers. All BAO Kit systems are light, compact and portable for use by dismounted Battlefield Airmen. Modernization efforts focus on reducing the weight of the equipment carried by the dismounted operator. Funding for this effort is in PE 0408011F. Development funds are in PE 0408011F.
5. TACTICAL AIRBORNE CONTROL SYSTEM EQUIPMENT: Tactical Airborne Control System Equipment encompass two types of simulators that provide scenario based training for geographically separated Joint Terminal Attack Controllers (JTACs), Combat Control Teams (CCTs), Tactical Air Control Party (TACPs), and various CAS Platforms. Funding for this effort is in PE 0207418F.
6. BATTLEFIELD WEATHER: Acquires meteorological and space environmental sensing equipment supporting the global missions of the AF, Army, SOF, combatant commanders, and other government agencies. Fixed and transportable equipment provides observing and forecasting capabilities for home station and deployed locations in support of worldwide Air and Space Expeditionary Forces and Army Forces. Weather system technological upgrades provide critical support to modern air and space combat operations. These systems enhance the effectiveness of AF weapon systems and precision munitions by accurately predicting environmental impacts to optimize targeting, weaponeering, and bomb damage assessment, as well as space systems operations and effectiveness. AF weather programs are aligned under five core capabilities: 1) weather data collection, 2) product tailoring/warfighting applications, 3) weather data analysis, 4) weather forecasting, and 5 ) weather data dissemination. Through this alignment, AFW ensures an integrated and systems oriented approach to program management decisions. Funding for this effort is in PE 0305111F. The development funding for Weather Observation/Forecast is in PE 0305111F, Weather Service.
7. PATRIOT 7: PATRIOT 7 is a course that trains battlefield airmen in the use of tactical intelligence, surveillance, and reconnaissance tools prior to deploying to combat. Students learn how to use the Remote Operated Video Enhanced Receiver (ROVER) systems during multiple field training exercises. The equipment procured includes ROVER variants; video transmission systems to simulate battlefield video systems; training range equipment; and other peculiar \& common support equipment. This effort is funded in PE 0901212F.

 mandates/directive and cryptographic modernization standards. The program has three components, explained in the following paragraphs:

 during expeditionary operations. FY13 procurement dollars in the amount of $\$ 0.100 \mathrm{M}$ will procure mandated upgrades for 99 satellite terminals.

 that have reached end-of-life and are no longer supportable.

 to the Global Information Grid.

 fratricide, and prevents collateral damage in civilian occupied areas.
 program collaborates with the Battlefield Airmen Program to standardize and gain cost efficiencies, when possible, for equipment consolidated procurements

 program focuses on modernizing six main components:

 forward observers to improve target acquisition during all weather conditions. FY13 funding will procure 491 targeting devices and replace aging targeting devices.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications Equip / BSA 7 : Organization And Base

off the shelf available technology, FY13 funding will procure approximately 1,122 ruggedized computers that can accommodate technology upgrades to the Close Air Support Software (CASS) and digital communication links with C 2 nodes
c. MANPACK/HANDHELD RADIOS: These multiband radios with ancillary equipment are capable of providing the required LOS and BLOS digital communications connectivity needed to perform the TACP mission. Funding will procure COTS, Software Compliant Architecture (SCA) handheld and manpack radios which will modernize fielded radios which currently fall short of full network-centric operations due to narrow bandwidths and relatively slow data transfer rates. FY13 efforts will replace aging manpack/handheld radios.
d. TACP MOUNTED SYSTEMS AND MOBILE COMMUNICATION SYSTEMS (MCS): The TACP-M equipment suite is the primary combat enabler for Joint CAS operations on the digitized battlefield. The TACP program procures specialized communications equipment to provide ASOC data link gateway capabilities as well as multiple channel, on-the-move and re-locatable digital data and voice communications in both rack and vehicle mounted configurations. The equipment is comprised of specialized C 2 systems, and multiple variants of SCA-compliant radios, streaming video receivers, computers, and all necessary ancillary equipment for joint CAS operations on the digitized battlefield.

The program includes the post-production integration of TACP equipment suites into standalone, re-locatable racks as well as multiple vehicle families to include the High Mobility, Multi-Wheeled Vehicle (HMMWV), Mine-Resistant Ambush-Protected (MRAP) vehicle, the Stryker Light Armored Vehicle (LAV), and future TACP tactical vehicles.
Prior to FY13, the Air Force cancelled the production option of the HMMWV variant of the Vehicular Communications System (VCS) due to HMMWV survivability issues. The requirement for a mobile communication capability remains, as such, the Air Force requested acceleration of a mobile communications capability into the TACP Stryker LAV, an acceleration of a dismounted communication capability (i.e. Dismounted Communication Package (DCP)) for use with the Tactical Operation Center, and the initiation of a Capability Development Document to identify the long term solution for mobile communication capability integrations. FY13 funds will provide interim sustainment support to the TACP Stryker suite.
e. VIDEO RECEIVERS: Streaming video transmitter/receivers allow attack aircraft with targeting pods and unmanned aerial vehicles equipped with video transmitters to transmit streaming video to personnel supporting ground commanders. FY13 funding will procure 140 video receivers.
f. TACP CLOSE AIR SUPPORT SYSTEM (CASS): TACP CASS provides digital communications between the TACP, CAS aircraft, and various air and battlefield C2 and situational awareness (SA) systems. This software includes interfaces for employing ASOC, TACP, and JTAC capabilities as an integrated system. The funding is utilized to keep fielded versions current with the constantly changing external interfaces and supplies software modifications and does not pertain to any new development efforts. FY13 funding will procure 19 integrated communications access packages, and one new version of close air support software.
3. TACTICAL RADIO SYSTEM/JTRS: FY13 procurement dollars in the amount of $\$ 56.229$ procures 550 JTRS radios. The AF JTRS Procurement and Integration Office will execute JTRS procurement and logistics strategies to meet AF warfighter requirements for radio communications by collaborating with JPEO JTRS, Air Force Command and Control Integration Center, Cryptologic Systems Division, Warner Robins-Air Logistics Center, the AF Major Commands, and other services' JTRS program offices. This program supports procurement and fielding of JTRS communication capabilities using available technologies and Government off the Shelf (GOTS) and/or COTS radios to fulfill communication requirements and worldwide flying operations. The JTRS program consists of distinct product development efforts that include ground mobile radio; airborne, maritime, fixed (AMF); handheld, manpack, small form fit; multi-functional information distribution system JTRS; and consolidated single channel handheld radio. The Air Force will continue to procure Software Communications Architecture (SCA) compliant ground radios on the commercial market, including JTRS-approved Consolidated Single Channel Handheld Radios(CSCHR) and the AN/PRC-117G 1-Channel Manpack, until equivalent JTRS HMS capabilities are delivered.
4. BATTLEFIELD AIRMEN OPERATIONS (BAO) Kit: FY13 funding in the amount of $\$ 11.469$ million will procure Human Machine Interface (HMI) components to optimize user information intake. Funding will be used to reduce the risk of fratricide, reduce the weight carried by individual Airmen, and reduce the time required to find, fix, track, target, and engage the enemy.
a. NON LINE OF SIGHT (XLOS) TARGETING SYSTEM: Battlefield Airman operate this unmanned aircraft system to covertly navigate, sense, map, reconnoiter, and target from behind enemy lines. No FY13 funding requested.
b. HUMAN MACHINE INTERFACE (HMI): FY13 funding will procure 735 HMI components that will provide integrated operator interface between all the machine components by using unified visual and auditory displays and controls, such as head-mounted displays and tactical earplug connectivity with communications. This system provides optimized user information portrayal and control of peripheral devices, to

| :--- | :--- | :--- |

include modernization of communications, computing devices, portable electrical power generation and management, targeting and situational awareness software (machine to machine) designed to reduce risk of fratricide and reduce the time required to employ precision effects on the battlefield to single-digit minutes.
c. LIGHT COMMUNICATIONS SYSTEM (LCS): LCS is a comprehensive modular light weight 4 channel communications capability that provides legacy communications interoperability. Provides secure voice, data and video Situation Awareness (SA). This tactical SA and connectivity provides the ability to conduct assigned missions in a mounted environment. LCS provides a suitable antenna capability which allows quick install and un-install from a variety of vehicles. No FY13 funding requested.
d. LINE OF SIGHT (LOS): LOS integrates a target designators and sensors to enhance targeting effectiveness at ranges less than 3 km . The equipment provides Battlefield Airmen with the ability to geo-locate targets in both eye safe and non-eye safe spectrums. The modernization of this equipment will significantly reduce the weight carried by the operator. No FY13 funding requested
e. HUMAN MACHINE INTERFACE 117G VIDEO DOWNLINK: This FY11 OCO effort procured the remaining units that had an improved full-motion video downlink capability from the PRC-117G manpack radio. No FY13 funding requested.
f. PRC-152 RADIO BLUE FORCE TRACKER UPGRADE: This FY11 OCO effort procured updates for existing PRC-152 manpack radios which supports the Blue Force Tracking capability. The software and hardware upgrade reduced the risk of fratricide and increased interoperability with Joint and Coalition forces. No FY13 funding requested.
g. LIGHT COMMUNICATIONS SYSTEMS-OCO: This FY12 OCO request accelerates the procurement of LCS. LCS is a comprehensive modular light weight 4 channel communications capability that provides legacy communications interoperability. The system provides secure voice, data and video Situation Awareness (SA). This tactical SA and connectivity provides the ability to conduct assigned missions in a mounted environment. LCS provides a suitable antenna capability which allows quick install and un-install from a variety of vehicles. No FY13 funding requested.
h. PRC-152 BLUE FORCE TRACKER \& PRC-117G VIDEO: The FY12 OCO request purchases PRC-152 hand-held radios and the PRC-117G man-pack radios for AFSOC Special Tactics operators. These radios are software configurable to support advanced waveforms allowing operators to carry less gear. No FY13 funding requested.
5. TACTICAL AIRBORNE CONTROL SYSTEM: FY13 procurement funding in the amount of $\$ 8.092$ million procures Joint Terminal Control Training and Rehearsal System (JTC TRS) and Joint Theater AirGround Simulation System (JTAGSS) for operators executing overseas contingency operations.
a. JTC TRS: This simulator project trains personnel controlling air support for combat operations by providing both a stand-alone and Distributed Mission Operations (DMO)-capable high-fidelity Joint Terminal Attack Controller (JTAC), and Combat Control Team (CCT) simulation system. The JTC TRS will be able to connect to DMO networks to allow geographically separated high-fidelity close air support platforms, JTACs and CCTs to train together in a risk-free environment. The JTC TRS enables operators to conduct Joint Close Air Support (JCAS) training/mission rehearsal using tailored, dynamic scenarios that are relevant to mission tasking. Furthermore, the simulator will be capable of providing tactical air traffic control training for CCT using tactical application of austere airbase operations.

JTC TRS provides the capability to network with aircrew full mission trainers, mission training centers, and Air Support Operations Centers (ASOC). Its primary focus is to provide an air-ground virtual training environment for networked air ground training and mission rehearsal capability that will develop both JTAC and CCT skills and train aircrew to accomplish complex JCAS missions in close proximity to friendly ground forces. JTC TRS will be fully interoperable with joint/sister Service air ground simulation using industry standards. Training with JTC TRS has the potential to reduce civilian casualties, collateral damage and fratricide by improving coordination between air and ground personnel, and increasing JTAC and aircrew proficiency. The JTC TRS program will be a "buy-to-budget" program.

The acquisition strategy for production of the fixed configuration of the JTC TRS will be based on full and open competition with an evolutionary acquisition approach using incremental development. The portable version of the JTAC trainer is planned to be an option on the production contract for JTC TRS. Because the production of the JTC TRS is late to need, and there is a pressing need for JTAC/TACP/ CCT training, HQ ACC/A3, in conjunction with the National Guard Bureau, intends to initiate and manage procurement of in interim limited training capability using products already available while the fullcapability JTC TRS system undergoes development and production.
b. JTAGSS: The Joint Tactical Air-Ground Simulation System (JTAGSS) trains ASOC and Special Operations Forces (SOF) personnel in to perform command and control (C2) battlestaff operations. The JTAGSS can operate in either a stand-alone mode, or connected to other DMO-capable high-fidelity simulation facilities to allow geographically-separated Theater Air Control Systems (ASOCs), CAS platforms,

ID Code (A=Service Ready, B=Not Service Ready) : A Program Elements for Code B Items:
Other Related Program Elements:
and JTAC and CCT personnel to train in an integrated virtual environment. The JTAGSS will enable operators to conduct C2 training and mission rehearsal of JCAS assets using tailored, dynamic scenarios that are relevant to current real-world mission taskings. Scenarios can range from irregular warfare to major combat operations.

JTAGSS will have the capability to network with all other ground and air DMO-capable trainers, CAS platform full mission trainers, mission training centers, and JTC TRS virtual mission trainers. JTAGSS will be fully interoperable with joint/sister Service air and ground simulators using open industry standards. Training with JTAGSS will improve mission effectiveness by reducing the risk of civilian casualties, collateral damage, and fratricide by improving command and controls skills in rapidly changing and uncertain combat environments. The JTAGSS program will be a "buy-to-budget" program and the FY13 funding will enable procurement of an estimated four JTAGSS for air support operations training.

The acquisition strategy for the JTAGSS trainer will be to field advance technology demonstration units in two increments. Increment 1 will field initial capability to perform proof of concept and technology validation of mission simulations for all ASOC crew positions including detailed communications planning, asset deconfliction, integration of joint fires, and other critical mission areas required for integrated TACP/ASOC C2 mission success. At the completion of the technology validation, a production contract will be competitively awarded to complete JTAGSS deployment and integration.
6. BATTLEFIELD WEATHER: FY13 funds in the amount of $\$ 430 \mathrm{~K}$ will procure 10 manpack radios to support battlefield weather tactical crews from 8 AD and 2 ANG units.
7. PATRIOT 7: No FY13 funds requested.

OVERSEAS CONTINGENCY OPERATIONS SUPPLEMENTAL REQUEST
4. BAO Kit:
b. HUMAN MACHINE INTERFACE: Requested funding will procure units to complete the BAO HMI basis of issue. This effort is funded in PE 0408011F
h. PRC-152 BLUE FORCE TRACKER UPGRADE \& PRC-117G VIDEO: Requested funding will procure updates for existing PRC-152 man pack radios to support Blue Force Tracking (BFT) capability. This effort is funded in PE 0408011F.

Items requested in FY13 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Justification:

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications

P-1 Line Item Nomenclature:
50 - COMBAT SURVIVOR EVADER LOCATOR
Equip / BSA 7 : Organization And Base
ID Code (A=Service Ready, B=Not Service Ready) : A Program Elements for Code B Items:
Other Related Program Elements:
communications sites to support secure two-way over-the-horizon data messaging, and (3) a ground segment featuring a rescue center workstation and application software to enable routing of messages and two-way communication to/from isolated personnel. CSEL radio refers to the handheld radio only.
2. CSEL ANCILLARY EQUIPMENT: FY13 Funds will procure: Radio Set Adapters (RSA), mission planning software, rechargeable and non-rechargeable batteries, battery chargers, charger adapters, battery discharge devices, training aids, radio repair kits, CSEL Planning Computer, RSA repair kits, Radio modification kits and UBS equipment.
3. PRODUCTION ENGINEERING: FY13 funds will be used for the overall planning, directing, and controlling of the definition and production of CSEL radios inclusive of spares, incorporation of upgrade modifications, ancillary equipment, program office support, and other production-related activities.
4. DIRECT MISSION SUPPORT: FY13 funds will be used for developing technical orders and equipment installation. FY13 funds may also be used for data development associated with CSEL, including the production of technical publications, engineering data, management data, support data, and data repository.

Items requested in BY are identified on the following (P-5) and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

FY13 funds will also fund program management administration and direct mission support.

## Remarks:

 kits, and UBS equipment. Costs per fiscal year are contingent upon total quantity purchased.
(2) Includes secret internet protocol router network, electronic proving ground, joint interoperability test command, Joint Personnel Recovery Agency, UBS support and other government and contractor travel/support
 funds purchased all needed VHF/UHF Module (VUM) hardware and the effort to upgrade 3273 radios. In FY12, 4129 radios will be upgraded and the remaining 9721 radios will be upgraded with FY 13 funds.

Other Related Program Elements:
understanding. FY13 funding will also continue evolution into High Definition (HD) video production and the next generation of digital photography. This equipment includes cameras, editing and duplication systems, and all accessories necessary for image capture, processing, and distribution. This program funds 19 production centers and base multimedia facilities which provide products for combat operations, education and training and corporate communications. Funding for this effort is in program element (PE)0102890F.
2. COMBAT CAMERA SYSTEMS: FY13 continues replacement of heavily used and worn mobile combat documentation video and digital photography cameras and night vision lenses, portable video recorders, portable nonlinear digital video editors, and mobile digital photography editing workstations in support of worldwide Combat Camera and multimedia forces. This program provides for technology upgrades to portable video and photo systems and includes lightweight digital cameras and camcorders providing higher quality imagery to the warfighter. These newer systems reduce the transportation footprint, streamline the work load and enable combat camera personnel to transmit motion and still imagery across satellite as well as terrestrial systems. This critical capability provides warfighters with greater flexibility in decision-making with real-time operational and combat imagery. Funding for this effort is in PE 0102890F.
3. WESTERN TEST RANGE DIGITAL IMAGING SYSTEMS: Previously identified as "WESTERN TEST RANGE VIDEO SYSTEMS." This program replaces 35 ye...

## Description:

The Base Communications Infrastructure ( BCl ) program enables timely and assured delivery of data and voice communications supporting a wide range of Air Force organizations and decision makers. This program provides Air Force (AF) Major Commands (MAJCOMs), the Air Reserve Component (ARC), including the Air National Guard (ANG) and the Air Force Reserve (AFR), with effective Command and Control (C2) of information systems, and procures robust base communications infrastructure that every worker, office, and organization depends on to perform their mission. BCI supports upwardgenerated communications requirements from the MAJCOM and ARC respective bases. BCI funding supports life cycle management of network servers, routers, ductwork, cables, Local Area Networks (LANs), voice and data switches, and End Building Node (EBN) hardware in order to maintain consistent, compatible, and interoperable infrastructure and architecture. MAJCOM and ARC bases require their own communications improvement funds to tailor the base communications environment to specific operational missions supported by the base. Funds are also needed at MAJCOM and base level to react quickly to mission changes, support new military construction projects and handle the multitude of smaller, individual communications, computer, air traffic control and weather instrumentation connectivity needs. The ANG funds their entire base communications procurement requirement within the BCI program line. Additionally, AF-wide downward directed efforts which provide base-wide fiber optic networks, modernize base control centers, and replace main base telephone switches are funded under the "Information Transport Systems," "AFNET," and "Voice Systems" budget lines.

FY13 funds procure LMR infrastructure at Vance and Keesler AFBs. The existing LMR infrastructure for AETC is aging and experiencing numerous reliability and radio coverage shortfalls. The AETC wide-area LMR Trunked Network offers a solution supports remote sites at a greatly reduced cost. This trunked LMR network will increase LMR capabilities for all users and support AES encryption, P25 interoperability standards, and provides additional network management tools that reduce workload. LMR systems provide vital wireless communications capabilities that support C2 and other critical communications for emergency response, in-garrison support, and training capabilities. The LMR system provides effective communication between fire, security, medical, command post, and disaster preparedness personnel and serves as a primary means of base-level emergency dispatch capabilities supporting the Emergency Operations Center (EOC) and Emergency Communications Center (ECC).
4. HQ AIR FORCE MATERIEL COMMAND (HQ AFMC): FY13 program supports the continued expansion of AFMC's LMR enterprise trunking model (regionalization) with the funding of AFMC LMR Enterprise Infrastructure Region III. AFMC's LMR enterprise model provides C2 communications in direct mission support as well as trunked communications support for emergency responders participating in base, local, civil, and federal disaster response operations. These efforts are necessary to correct vulnerabilities of network equipment while improving system maintainability and availability. Funding for this effort is in PE 0708550F.
5. HQ PACIFIC AIR FORCES (HQ PACAF): FY13 program funds support PACAF base communications operations, command-wide circuits, transformation efforts, and life cycle replacement of base information technology systems. The large geographic separation throughout the command significantly raises the importance of a robust communications infrastructure. FY13 program funds continued expansion and improved robustness of the PACAF SIPRNET to improve war fighter access to secure voice, video, and data systems on SIPR. Funds will also support replacement of Fiber Multiplexer Transceivers (FMTs) in Korea. FMTs are used extensively to extend the base switch (phones and on-base dedicated circuits) to most areas of a base. These devices are used to create trunk connections between the main base telephone switch and remote telephone switches. Also, FMT devices are critical to the Dial Central Office architecture, but are obsolete and have are no longer maintainable. FMT replacement is necessary to avoid a major disruption of telephone service and/or dedicated circuits. Funding for this effort is in PE 0208550F.
6. HQ AIR COMBAT COMMAND (HQ ACC): FY13 funding will replace ACC Communications Support Squadron's 20 -year-old electrical infrastructure in Langley AFB Building 25. The existing infrastructure is at its end of useful life expectancy. The growth in mission and the age of the facility mandate immediate changes to allow continued operation of the MAJCOM Communication Coordination Center, critical environmental support to Knowledge Operations mission infrastructure, and several key ACC programs housed in Building 25. In addition, FY13 funds will be used by ACC to procure F-22 Deployable Debrief Facilities (DDFs) and to cover emerging requirements as a result of the F-22 aircraft beddown. Funding for this effort is in PEs 0207138F, 0208015F, and 0208550F.
 mission planning and debriefing for both operations and maintenance personnel. This funding buys DDFs to support the increased special access workload of the F-22s to augment the current Combat Air Force (CAF) inventory of DDFs. Funding also helps solve a CAF problem as 1st and 2nd Generation DDFs are wearing out from nearly continuous deployments over the last nine years. The 3rd Generation shelters purchased with this funding are far more secure and vastly more durable than the 1st and 2nd Generation shelters, some of which (2nd Generation) were purchased for early F-22 squadrons. FY13 funding will procure one DDF.
 Tyndall and Langley AFBs within ACC.

FY13 ACC OCO Request:
FY13 OCO funds procure communications equipment to facilitate the standup of three new squadrons. In support of Operation Enduring Freedom, OSD (per RMD 700, Dec 09) directed the growth of MQ-1 and MQ-9 Combat Air Patrols (CAPs) from 50 to 65 by 4th quarter FY13. To accomplish this objective, the ACC Commander directed that two squadrons (the 15th Reconnaissance Squadron (RS) and the 18th RS) be divested from Creech AFB and relocated to a base TBD. The FY13 requirement is to procure required communications equipment to facilitate operation for the two squadrons relocating from Creech AFB and one remaining squadron to meet the OSD direction for the 65 CAPs. Establishing a new squadron requires the following communications equipment procurement to ensure uninterrupted combat capability: Squadron Operations Center (SOC), Intrusion Detection System (IDS) for the squadron and Ground Control Station compound, and Joint Worldwide Intelligence Communications System (JWICS) equipment. Without these OCO funds, AF will be unable to comply with OSD direction.
7. HQ AIR MOBILITY COMMAND (AMC): Provides AMC HQ and bases with interoperable, integrated, and secure communications. The communications infrastructure enables AMC to provide airlift, air refueling, special air mission, and aero medical evacuation for US forces and other authorized agencies. In addition, the program provides information technology and communication capabilities to allow AMC

As a result of the Fort Hood Follow-on Review, FY13 E\&I funds were directed to provide domestic installation emergency management (IEM) infrastructure to meet the requirements of DoD Instruction 6055.17 , DoD IEM Program. This AF-wide program provides funds for deployment of Mass Notification and Warning Systems to alert base personnel of emergency situations. Funding also supports an Enhanced 911 capability providing dispatchers with the street address of a caller using a wired telephone.
12. U.S. AIR FORCE ACADEMY (USAFA): No FY13 funding requested. Funding for this effort is in PE 0805550F.

Items requested in FY13 are identified on the following P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Description:

FY11 funding totals include $\$ 470,000$ appropriated for Overseas Contingency Operations.
FY12 funding totals include $\$ 8,000,000$ requested for Overseas Contingency Operations.

1. AIR TRAFFIC CONTROL AND LANDING SYSTEMS (ATCALS): ATCALS is a combination of United States Air Force (USAF) ground facilities and equipment, both fixed and tactical, with associated avionics, personnel, and procedures that provide air traffic control worldwide to USAF/Department of Defense flying missions. The ATCALS line includes basic air navigation equipment that provides enroute and terminal navigation control and separation, approach, departure, and landing guidance. ATCALS also provides equipment required to ensure interoperability with systems operated by the North Atlantic Treaty Organization, the US National Airspace System, and the International Civil Aviation Organization. A key element of the ATCALS modification effort is the ATCALS Modernization initiative. The ATCALS Modernization initiative combines organizational realignments, process improvements, and investment in state-of-the art commercial off-the-shelf technology to update 30+ year old ATCALS to support the mission for the next 20 years while producing significant manpower, operations, and maintenance savings. Activities also include acquisition planning and document preparation to support both current program execution, definition of future program implementation strategies, and low cost modifications. This effort is funded in Program Element (PE) 0305114F. The modification roll-up is shown on the P-5.
2. WEATHER OBSERVATION AND FORECAST SYSTEM: This system consists of meteorological and space environmental sensing equipment providing information to support the worldwide missions of the USAF, Army, Special Operations Forces (SOF), combatant commands, and other government agencies. Fixed and transportable equipment provides warfighters at in-garrison, contingency, and deployed locations with accurate, relevant, and timely terrestrial and space weather observations and forecasts. This effort is funded in PE 0305111F, Weather Service.
3. SHARED EARLY WARNING SYSTEM (SEWS): FY13 funds procure equipment upgrades for the SEW-specific equipment at Theater Combatant Commander locations and the Centralized Distribution Facility at Peterson AFB CO, where data is initially received and filtered, and at the inject points where data is transmitted to SEWS customers and other foreign partner nations. Upgrades are prioritized based on the adjudicated OSD/Joint Staff-coordinated Integrated Priority List (IPL) for SEWS. This effort is funded in PE 0308699F, Shared Early Warning System.
4. BALLISTIC MISSILE EARLY WARNING SYSTEM (BMEWS): BMEWS is a ground-based radar system whose primary mission, missile warning (MW), provides United States Strategic Command (USSTRATCOM) with credible Integrated Tactical Warning/Attack Assessment (ITW/AA) data on all Inter-Continental Ballistic Missiles (ICBMs) penetrating the coverage area. This data includes an estimation of launch and predicted impact (L\&PI) locations and times. BMEWS also provides the Cheyenne Mountain Air Force Station (CMAFS), CO and other users with ITW/AA data on Sea-Launched Ballistic Missiles (SLBMs) penetrating the coverage area. Additionally, BMEWS supports the Space Situational Awareness (SSA) mission by providing near-earth satellite surveillance, tracking and identification as required by

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F : Other Procurement, Air Force / BA 3 : Electronics and Telecommunications <br> P-1 Line Item Nomenclature: <br> 54 - COMM ELECT MODS <br> Equip / BSA 8 : Modifications

the Space Control Center, Distributed Space Command and Control - Dahlgren, and the Joint Intelligence Center. The BMEWS consists of three sites: Thule Air Base (AB), Greenland; Clear Air Force Station (AFS), AK; and Royal Air Force (RAF) Fylingdales, UK. Each site provides unique coverage to a different geographic area. This effort is funded in PE 0305909F.

UPGRADED EARLY WARNING RADAR (UEWR) MODIFICATIONS: At RAF Fylingdales, United Kingdom and Thule AB, Greenland, radars have completed Upgraded Early Warning Radar (UEWR) modifications, changing the AN/FPS-123 radar to an AN/FPS-132 configuration. This modification adds a new co-primary mission, Missile Defense (MD). The MD mission is to detect, track, and count the individual objects in a ballistic missile attack early in their trajectory. This data is used by the Ground-Based Midcourse Defense (GMD) Fire Control Communications (GFC/C) Component for interceptor commitment and for directing ground-based radar operational responses. The GFC component uses the information to support intercepts from initial commit through final data uplinks to the defensive action vehicles. Thule AB and RAF Fylingdales UEWRs will complete the transfer from the Missile Defense Agency to the Air Force in FY12. Modifications for the Clear AB, Alaska, radar from the AN/FPS-123 to an AN/FPS-132 configuration are currently scheduled to occur in FY15.

HIGH-ALTITUDE ELECTROMAGNETIC PULSE (HEMP) PROTECTION PROGRAM: No FY13 funding requested.
BMEWS EVOLUTIONARY MODERNIZATION PROGRAM consists of modifications that replace obsolete or unsupportable system components and subsystems. The BMEWS mission equipment and associated sustainment suites consist of a mix of unique, custom-built components, processors, and display systems that are increasingly more difficult to maintain due to availability of replacement parts and obsolete COTS based subsystems that are no longer supported by the original equipment manufacturers. In addition, Sub-Array Power Supplies, Solid State Modules, Beam Steering Unit, and other frontend equipment are $30+$ years old, highly inefficient, and require replacement. Without these modifications there is a high risk that equipment failures will cause unacceptable mission downtime in order to troubleshoot and repair. FY13 will fund replacement of unsupportable UEWR \& EWR equipment to include, but not limited to, the Silicon Graphic Inc. (SGI) Origin 3800 signal/data processors, prototype subarray power supplies (SAPS), and analysis \& display hardware.
5. AN/FPS-117 ESSENTIAL PARTS REPLACEMENT PROGRAM: The AN/FPS-117 radar supports the NORAD, USNORTHCOM, and PACOM missions. The radars are part of the Atmospheric Early Warning System (AEWS), providing radar data to both USAF and Federal Aviation Administration control systems in Alaska. The radars also provide air surveillance capability as part of a bi-national defense program with Canada. This effort is funded in PE 0102325F. FY13 funds provide for hardware installations, Program Management Administration (PMA) and Direct Mission Support

The USAF FPS-117s (versions $1 \& 4$ ) are no longer in production; however the latest FPS-117 (version 7, aka Block 3) is in production. The Original Equipment Manufacturer (OEM) has continued to advance this radar system's technology and perform service life upgrades for other developing nations, however, sixty-five percent of line replaceable units (LRUs) installed in the North American system are no longer manufactured by the OEM and many subcomponents are obsolete rendering the AEWS unsupportable. These solutions improve supportability and reduce sustainment costs by drastically reducing the LRU count. There is low technical risk and minimal developmental activity required to procure this replacement hardware and software for installation.

Air surveillance is NORAD's number \#1 issue as stated by the NORAD Commander to Congress in March 2008. Without the immediate replacement of this equipment, NORAD will lose air surveillance capability by 2013 due to failing radars. This Essential Parts Replacement Program is needed to restore the radar system capability before projected catastrophic failures by 2013 , compromising persistent surveillance of the homeland. The AN/FPS-117 Essential Parts Replacement Program restores the radar system capability to its original availability rates by eliminating parts obsolescence and replacing high failure rate components. The goal is to ensure the FPS-117 radar can support the war fighters' air surveillance mission beyond 2025.

## Justification:

FY13 ATCALS Modernization initiatives include, but are not limited to the following:

 flight inspection capabilities. The localizer antennas have already been replaced. FY13 funds will procure six systems (3 AD/2 ANG/1 AFR).

 risk if low-dollar modifications are not provided to reverse unfavorable operational availability metrics.

 (Deployable ATCALS equipment).
 Base Instrument Landing System modification program.

FY13 Weather Observation and Forecast modernization initiatives include, but are not limited to, the following:

 infrastructure at multiple security levels will ensure timely receipt of weather information by warfighters at worldwide fixed and deployed locations and incorporate net-centric requirements.
b. MOD \#02-002, AUTOMATED SURFACE OBSERVING SYSTEM (ASOS): No FY13 funding requested.

ID Code (A=Service Ready, B=Not Service Ready) : A
Program Elements for Code B Items:
Other Related Program Elements:
c. MOD \#00-001, NEXRAD UPGRADES: FY13 funding will refresh computer and network hardware/software to ensure continued supportability. Funding will also modify generator shelters to contain possible fuel leaks. Funding supports the tri-agency cost sharing agreement between the Department of Defense, the Department of Commerce, and the Department of Transportation.
d. MOD \#06-001, AIR FORCE COMBAT CLIMATOLOGY CENTER UPGRADE: No FY13 funding requested.
e. MODs \#11-003,4, and 5 OBSERVING SYSTEM 21ST CENTURY (OS-21): Upgrades fixed and deployable weather observing systems providing safety of flight and resource protection information at AF and Army airfields and operating locations worldwide. FY13 funding will upgrade components of deployable observing systems including lightning detection capability, uninterruptable power supply for laptop modems, and remote restart capability.
f. MOD \#07-001, WEATHER FORECASTING MODERNIZATION: FY13 funding will provide technology refresh for computer processor, memory, and storage devices supporting numerical weather prediction within the AF Weather Strategic Center. Refresh required to meet increasing processing demands of numerical mesoscale weather models and to reduce sustainment costs associated with legacy equipment. Additionally, upgrades needed to support ensemble forecasting processes and Operational Risk Management techniques that will yield improved weather and cloud forecasts for AF and Army operations worldwide.
g. MOD \#08-001, IMPROVED SOLAR OBSERVING OPTICAL NETWORK (ISOON): FY13 funding will upgrade components of the Solar Observing Optical Network (SOON) providing solar flare analysis and reporting. Upgrades needed to replace 1960s technology and to provide new capabilities including resolution increases and vector magnetograms.
h. MISCELLANEOUS LOW COST MODIFICATIONS: FY13 funding will enable low cost modification efforts for fixed and deployed configurations of the Air Force Weather System's terrestrial and space environmental collection, analysis, forecasting, and dissemination platforms.
i. MOD \#09-001, MARK IV-B: FY13 funding will upgrade worldwide polar-orbiting and geostationary weather satellite readout system. Modifications needed to support new satellites and data types. Additionally, modifications will improve system supportability. If system fails, satellite imagery for cloud analysis and forecast would be unavailable to decision-makers for target engegement, bomb damage assessment, flight safety, and resource protection.

There are no BMEWS FY2013 OCO dollars.
There are no SEWS FY2013 OCO dollars
FY2013 BMEWS procurement dollars will include, but not limited to, (01) "kit" and (01) "install" for an operational support suite to validate the Silicon Graphic Inc.-Replacement (SGI-R) deployment designs and to purchase prototype SAPS and maintenance bench updates.

FY2013 SEWS procurement dollars in the amount of $\$ 0.322 \mathrm{M}$ installs 01 "item(s)" in support of installation and unit mission requirements for Air Force personnel.
Items requested in FY13 are identified on the following P-5 and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Description:

 Air Force (RAF) Fylingdales, UK. Each site provides unique coverage to a different geographic area. This effort is funded in PE 0305909F.

BMEWS EVOLUTIONARY MODERNIZATION FRONT END SUSTAINMENT FY13 PROGRAM consists of modifications that replace obsolete or unsupportable system components and subsystems. The BMEWS mission equipment and associated sustainment suites consist of a mix of unique, custom-built components, processors, and display systems that are increasingly more difficult to maintain due to availability of replacement parts and obsolete COTS based subsystems that are no longer supported by the original equipment manufacturers. In addition, Sub-Array Power Supplies (SAPS), Solid State Modules, Beam Steering Unit, and other front-end equipment are 30+ years old, highly inefficient, and require replacement. Without these sustainment there is a high risk that equipment failures will cause unacceptable mission downtime in order to troubleshoot and repair. FY13 will fund replacement of unsupportable UEWR \& EWR equipment to include, but not limited to, Sub-Array Power Supplies.

## 55 - NIGHT VISION GOGGLES

| ID Code (A=Service Ready, B=Not Service Ready) : A | Program Elements for Code B Items: | Other Related Program Elements: |
| :--- | :--- | :--- |

AN/PVS-15 Groundcrew Goggle: This binocular goggle is a helmet-mounted or hand-held night vision system. The binocular goggle is primarily used by Special Forces for night drop operations. They can be used in all nighttime ground operations. Binocular goggles provide the added ability to maintain night vision operations in the event one of the two tubes fail.

AN/PVS-18 Groundcrew Goggle: No FY13 funding requested.
Aircrew Goggles:
AN/AVS-9 (F4949G-TG) Aircrew Goggle: The F4949-TG night vision goggles provide aircraft and ground personnel with the capability to see the horizon, terrain features and enemy ground fire as well as reducing the potential for air-to-ground fratricide and possible mid-air collisions during night operations. This goggle is helmet mounted and weighs approximately 28 ounces. The F4949-TG series goggle is equipped with pinnacle tube technology.

Night Vision Cueing and Display (NVCD): ACAT III program being acquired by both the Air Force and Navy. The Air Force is the lead acquisition program office and will contract for Navy and Air Force requirements. This system combines the functionality of panoramic NVG (PNVG) 3rd generation night vision with the HUD symbology and sensor/cueing capabilities of Joint Helmet Mounted Cueing System (JHMCS) already installed in F-15, F-16, and F/A-18 combat aircraft. The system will be compatible with the current JHMCS helmet and will use the power and data provided by the JHMCS universal connector on the helmet. NVCD is a modular system that can be configured for a Wide Field of View (FoV) (WFoV-4 Tube) or Standard FoV (FoV-2 Tube). WFoV provides pilots with a panoramic 100 degree x 40 degree FOV improving the pilot's tactical situation awareness compared to the standard 40 degree circular FOV with the 2-tube configuration. Air Force Combat Air Forces (CAF) and Naval Air Forces (NAF) are to be the primary users and the system is intended to be fielded for pilot use with the $\mathrm{F}-15, \mathrm{~F}-16$, and $\mathrm{F} / \mathrm{A}-18$ platforms. NVCD is a buy-to-budget program with an emphasis on tailoring the acquisition procurement strategy toward most efficient economic order quantities within contractor capacity and budget constraints of both services. NVCD received Milestone C approval in April 2010.
${ }^{* * *}$ Navy procurement funding for NVCD can be found under Other Procurement Navy P-1 Item Nomenclature 424400, Aviation Life Support, BA-3, SYS215. Associated Air Force development funding was provided in PE 0207170F.

Test Sets:
Test Set, Infinity Focus (ANV-20/20): NVGs require an operational checkout prior to flying. The ANV-20/20 is a portable instrument, which allows quick and accurate evaluation and adjustment of all goggle parameters.

Test Set, Infrared Viewer (ANV-126A): The ANV-126A is a commercial upgrade and replacement of the ANV-126. It is suitable for both field operational checks and depot level NVG maintenance. It provides accurate checks for NVG resolution, gain, power drain, binocular goggle collimation, image quality, and image distortion. The ANV-126A uses state of the art technology and provides enhanced capabilities to the user.

Justification:

FY13 OCO dollars, $\$ .902 \mathrm{M}$, procures 292 AN/PVS-14 (groundcrew goggles) in support of installation and unit mission requirements for Air Force personnel.

 support to combat operations.
 equipment needed to support current Air Force mission requirements.

Remarks
Night Vision Cueing \& Display (NVCD) unit costs are subject to change pending final contract negotiations.

NVCD program received $\$ 19 \mathrm{M}$ Congressional reduction (contract delay) in FY12 PB.

## Description:

This program provides a wide variety of base support and safety of flight items for warfighters with worldwide application
ALEP program received $\$ 5.8 \mathrm{M}$ Congressional reduction (contract delay) in FY12 PB.
Modular Aircrew Common Helmet (MACH) program within RDT\&E PE 0604706F terminated in FY12. $\$ 6.217 \mathrm{M}$ of FY 11 MACH funds were rescinded and program received $\$ 7.101 \mathrm{M}$ Congressional reduction (early to need) in FY12 PB.

 personnel parachutes, ejection seats/equipment, survival radio test sets, life rafts, life preservers, and anti-exposure coveralls.

PEs associated with this P-1 Line are: 0207227F, 0604706F, 0702833F
Projected Allocations for Component Requirements (Subject to Total Force demands and priorities)

## Description:

The Mechanized Material Handling Equipment line provides funding for Mechanized Material Handling Systems (MMHS) and Storage Aids Systems (SAS)

 and to provide Air Force capability to respond to crises and threats whenever they occur in the world.

Program elements associated with this P-1Line are 022834F, 072834F, 082834F, 042834F, 052834F, 052844F

## P-1 Line Item Nomenclature:

## 57 - MECHANIZED MATERIAL HANDLING EQUIPMENT

FY13 procurement funds MMHS/SAS equipment which increases the productivity of Air Force support personnel, enhances management control of assets, reduces multiple handling of logistics material, increases flexibility at a minimum investment cost, enhances safety, reduces losses due to damage of materials in transport, and reduces congestion and delays in supply, passenger, and air freight terminal operations.
\$30M increase in FY12 is related to the following requirement:
Where: MMHS will be installed in the new Japanese Facilities Improvement Program funded Air Freight Terminal facility at Yokota AB Japan
Mission: Yokota is the air hub of the western Pacific, supporting the Defense Transportation System in the region. Customers include U.S. military from all services as well as diplomatic missions located on mainland Japan and throughout the western Pacific. The system is also critical for rapid response/deployment and humanitarian relief missions in this part of the world.

Mission Change:
Delay funding and installing the system as planned could jeopardize funding for the remaining phases of the new terminal being constructed by the Government of Japan. This would result in a new air freight terminal with no equipment to make it operational for its intended purpose. Furthermore, losing funding for the remaining phases will render the new facility inaccessible for cargo operations from three sides due to unprepared ground, a pre-existing building, and an undemolished old freight terminal. Estimates to pave the unprepared ground are over $\$ 1 \mathrm{M}$ and this paving would be removed once MMHS installation begins. The accessible area would be greatly congested with movement constrained by trucks and material handling equipment (MHE). There is not enough space for a pallet grid storage area and MHE parking if the existing terminal remains and the new MMHS is not installed and operational. There would be an increased risk in operations due to congestion of vehicles operating around vacant buildings, undeveloped grounds, and increased forklift operations inside the freight terminal; and forklift traveling distances between K-loader parking and pallet grid yards.
"Note: The $\$ 30 \mathrm{M}$ Yokota AFT project was showing under PACAF and is now showing under AMC since it is an AMC requirement."
MMH projects are identified on the attached P-40A and are representative of items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

(The following Resource Summary rows are for informational purposes only. The corresponding budget requests are documented elsewhere.)

## Description:

Base Procured Equipment:

 training ranges; and to satisfy air conditioning and heating requirements

Power Conditioning \& Continuation Interfacing Equipment (PCCIE):
 years. The PCCIE program is structured into small projects (less than 125 kilovolt amps (kva)) and large projects (greater than 125 kva) and includes associated ancillary equipment.
 0901212F

Projected allocations for Reserve Component Requirements (subject to Total Force demand and priority).

System Cost
*Item Nomenclature represents Item Number, DODIC, and Item Name for the P40A and P5; Name for the P18 and P23; Modification Number and Modification Title for the P3A; Item Number and Item Name for the P10
Justification:
Base Procured Equipment:

 natural disasters; new operational methods to increase efficiency and safety; and energy conservation initiatives.

Power Conditioning \& Continuation Interfacing Equipment (PCCIE):
The new systems collectively satisfy critical user requirements and will:

1. Reduce overall footprint and weight by $50-60 \%$.
2. Reduce operating and sustainment costs by $30 \%-50 \%$.
3. Reduce acquisition costs as it applies to installation since many newer systems consist of more internal pre-wiring.
4. Lower parts count dramatically improves reliability by reducing the potential points of failure within the system.
5. Produce greater energy savings and higher operating efficiency in all configurations, typically between $92 \%$ and $93.5 \%$; with all types of loads.

The Uninterruptible Power Supply (UPS) systems protect sensitive electronic equipment/systems such as command and control centers, intelligence missions, radars, etc.

## Description:

FY12 funding includes $\$ 18.1 \mathrm{M}$ for Overseas Contingency Operations.
FY13 funding includes $\$ 60.09 \mathrm{M}$ for Overseas Contingency Operations.

 Airfield Damage Repair (ADR) program provides civil engineers specialized airfield damage repair equipment/materials to rapidly repair and recover airfields after atack.

 and danger when investigating and eliminating explosive hazards. The Navy is the Lead Service for EOD.

Program elements associated with this P-1 Line are: 0208028F (Contingency Operations) and 0204424f (Explosive Ordnance Disposal Forces)

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F: Other Procurement, Air Force / BA 4 : Other Base Maintenance and Support Equip / BSA 5 : Base Support Equipment

## ID Code (A=Service Ready, B=Not Service Ready) : A Program Elements for Code B Items: Other Related Program Elements:

JCREW box Mounted A kit installs in HMMWVs and contains mounting hardware and antennas, etc. FY13 OCO funding will procure 246 Mounted A Kits ( $\$ 6.65 \mathrm{M}$ ), 82 , Mounted B Kits ( $\$ 10.25 \mathrm{M}$ ), and 80 Dismounted units (\$14.88M)

 three (3) units.

 Demolition Devices provides safe and efficient long range standoff when detonating explosive charges. FY13 funding will procure four (2) units.

 at a main operating base to support recovery after attack or a single/multiple kits can be deployed to a forward operating base to repair varying degrees of damage.

FY13 funding (\$2.648M) will procure four (3) R1 kits.
FY13 funding ( $\$ 0.556 \mathrm{M}$ ) will procure one (1) R2 kit.
 capbility. At OCO locations supported by this R1 kit procurement, basic repair equipment items need to be procured at the same time.

 disruption to flight operations at the base while cleaning and painting are accomplished.

Remarks
This program provides funds for the procurement of equipment and supporting systems necessary to accelerate the fielding of innovative technologies that include models or prototypes in support of major defense acquisition programs to meet national security needs. The Air Force is not requesting funds in FY13.

## Description:

FY11 funding includes $\$ 16.588 \mathrm{M}$ for Overseas Contingency Operations Request.
FY12 funding includes $\$ 9.800 \mathrm{M}$ for Overseas Contingency Operations Request.
FY13 funding includes $\$ 9.400 \mathrm{M}$ request for Overseas Contingency Operations Request.

 locations.

Program element associated with this P-1 Line is: 0401135F.
The AF continues to modernize major BEAR components to replace obsolete items (e.g. Refrigeration, water systems, power generation, and expeditionary airfield lighting):

 and other components such as fluid control valves.
 sites.

## Appropriation / Budget Activity / Budget Sub Activity:

3080F: Other Procurement, Air Force / BA 4 : Other Base Maintenance and

## P-1 Line Item Nomenclature: <br> 62 - MOBILITY EQUIPMENT

Support Equip / BSA 5 : Base Support Equipment
ID Code (A=Service Ready, B=Not Service Ready) : A

## Program Elements for Code B Items:

Other Related Program Elements:
Expeditionary Airfield Lighting System: Runway lighting system designed to be rapidly installed at contingency airfields and at other locations that need temporary airfield lighting. The lighting kit for runways includes runway edge and threshold lights, precision approach path indicator (PAPI) lights, incandescent and strobe approach lights, distance to go marker lamps, airfield arresting system marker lamps, taxiway lights, and battery-operated obstruction lights. Also includes generators, cables, control panels, transformers and regulators packaged on six (6) mobile trailers.

Mobile Aircraft Arresting System: This air transportable barrier arresting Bak-12 mounted on a mobile trailer to accommodate the recovery of fighter aircraft returning to battle damaged airfield.
Hygiene: Hygiene includes Shower, Shave and Latrine, and Self Help Laundry system which provides personal hygiene facilities in support of BEAR bases.
Refrigeration: Refrigeration units designed for the carriage of deep frozen, frozen, chilled and general cargo by road, rail, air, and sea (above or below deck), suitable for austere environmental conditions. It is used to support the BEAR services, feeding and mortuary operations.

Shelters: Shelters vary in sizes and are needed for billeting, kitchen, hygiene, and aircraft and equipment maintenance. Includes lighting, electrical equipment, and environmental control units. Shelter Fly is a sunshade with liner that is designed to reduce the shelter thermal load from solar exposure and the shelter flooring is designed to increase the shelter system's insulation capabilities.

## Appropriation / Budget Activity / Budget Sub Activity: <br> 3080F: Other Procurement, Air Force / BA 4 : Other Base Maintenance and

P-1 Line Item Nomenclature:
63 - ITEMS LESS THAN $\$ 5$ MILLION (BASE SUPPORT EQUIP)
Support Equip / BSA 5 : Base Support Equipment
ID Code (A=Service Ready, B=Not Service Ready) : A Program Elements for Code B Items:
Other Related Program Elements:
FY13 procurement dollars in the amount of $\$ 1.894 \mathrm{M}$ procures two (2) aircraft arresting barriers and one (1) Deployable Debrief Facility (DDF) shelter supporting operations and unit mission requirements for Air Force personnel.

FY13 OCO dollars in the amount of $\$ 9.175 \mathrm{M}$ will procure 127 FORCE components.
FORCE enables support of aircraft in a deployed environment by establishing a fuel storage and aircraft fuel servicing system or augments existing deficient fuels infrastructure. FORCE consists of a series of fuel storage bladders, equipment and plumbing assemblies that allow for receipt, transfer, storage, and issue of fuel products.

Items requested in FY13 are a continuing requirement, are identified on the P-40A and are representative of the items to be procured. Items procured during execution may change based on critical equipment needed to support current Air Force mission requirements.

## Remarks

FORCE effort consists of procurement of multiple components such as 210 K gallon fuel bladders, 50 K gallon fuel bladders, FORCE Modules, and tank gauges
Federal Stock Class (FSC)
 (brief/Debrief), Maintenance (classified parts storage), and ALIS (physical ALIS servers). FY13 requires one set of 3 for Edwards OT.

## Justification:

Items requested in FY13 are representative of items to be procured. Items procured during execution may change based on critical equipment needed to
support current Air Force mission requirements.
